What constitutes a 'document' and how does it function?

According to the *Oxford English Dictionary*, the etymological origin is the Latin 'documentum', meaning 'lesson, proof, instance, specimen'. As a verb, it is 'to prove or support (something) by documentary evidence', and 'to provide with documents'. The online version of the *OED* includes a draft addition, whereby a document (as a noun) is 'a collection of data in digital form that is considered a single item and typically has a unique filename by which it can be stored, retrieved, or transmitted (as a file, a spreadsheet, or a graphic)'. The current use of the noun 'document' is defined as '*something* written, inscribed, etc., which furnishes evidence or information upon any subject, as a manuscript, title-deed, tomb-stone, coin, picture, etc.' (emphasis added).

Both 'something' and that first 'etc.' leave ample room for discussion. A document doubts whether it functions as something unique, or as something reproducible. A passport is a document, but a flyer equally so. Moreover, there is a circular reasoning: to document is 'to provide with documents'. Defining (the functioning of) a document most likely involves ideas of communication, information, evidence, inscriptions, and implies notions of objectivity and neutrality – but the document is neither reducible to one of them, nor is it equal to their sum. It is hard to pinpoint it, as it disperses into and is affected by other fields: it is intrinsically tied to the history of media and to important currents in literature, photography and art; it is linked to epistemic and power structures. However ubiquitous it is, as an often tangible thing in our environment, and as a concept, a document *deranges*.

the-documents.org continuously gathers documents and provides them with a short textual description, explanation, or digression, written by multiple authors. In *Paper Knowledge*, Lisa Gitelman paraphrases ‘documentalist’ Suzanne Briet, stating that ‘an antelope running wild would not be a document, but an antelope taken into a zoo would be one, presumably because it would then be framed – or reframed – as an example, specimen, or instance’. The gathered files are all documents – if they weren’t before publication, they now are. That is what the-documents.org, irreversibly, *does*. It is a zoo turning an antelope into an ‘antelope’.

As you made your way through the collection, the-documents.org tracked the entries you viewed. It documented your path through the website. As such, the time spent on the-documents.org turned into this – a new document.

This document was compiled by _____ on 01.03.2022 11:18, printed on _____ and contains 60 documents on 123 pages. (<https://the-documents.org/log/01-03-2022-3885/>)

the-documents.org is a project created and edited by De Cleene De Cleene; design & development by atelier Haegeman Temmerman.

the-documents.org has been online since 23.05.2021.

Notes

- De Cleene De Cleene is Michiel De Cleene and Arnout De Cleene. Together they form a research group that focusses on novel ways of approaching the everyday, by artistic means and from a cultural and critical perspective.

Flanders
State of the Art

During the night, both of us get unwell. One of us is shaking, intensely and relentlessly. The windows are open. For minutes that seem to be hours, it feels like it's freezing. We get extra blankets. Then, it gets too hot.

One of us dreams about *cocodrillos*. It starts out with a single animal, like the one we saw in the National Archaeological Museum, escaping from an aquarium, and ends with lots of little ones crawling all over the place. It's impossible to know how many have escaped.

The other dreams about seismologist Luigi Palmieri's unfortunate assistant and his family's quest to redeem his good name. To deprive him of the burden and guilt set upon him by Luigi Palmieri's report of the 1872 eruption of Vesuvius, the assistant's offspring were building a monument just below the observatory in which their great-grandfather fell asleep. The monument was permanently, and continuously, unfinished.

We both dream of hearing fireworks in Naples.

In the morning, we're slightly alarmed that we both got sick and feverish at the same instant. It's the middle of January, and the weather has been summerlike all week. A gentle morning breeze flies in from the Neapolitan bay while we wait for the bus to take us to the airport.

The road down from the top of Mount Vesuvius, at Atrio Del Cavaillo. The sun sets. The last tourist bus has headed down. Then the headlights of the guardian's car swing their way down. It must be freezing. I am holding an orange-sized piece of petrified lava, probably stemming from the 1872 or 1944 eruption. A kilometer further down the road, the old Observatory is empty. Nowadays, monitoring seismic changes is done in a research centre in the city of Naples. Their seismographic registrations can be followed online, in real time. Two headlights swirling along the slopes, underneath me, are coming upwards.

A visit to the Royal Observatory of Belgium, in Ukkel. Most of the domes are damaged and need repairing. Only a few telescopes are in use. It is difficult to find a good spot from which to film the site. When we asked the people at the Royal Meteorological Institute – the Observatory’s neighbouring institution – if we could access their building’s roof to film the observatory, the answer was ‘no’.

Notes

I (M.D.C.) remember there was a fire nearby. We couldn’t see the flames, but a tall dark plume of smoke rose above the trees lining the site. We didn’t insist any longer and ceased our attempt to access the roof, hoping we might find a good spot to film the smoke with a dome in the foreground.

The 48-inch Oschin Schmidt, a renowned reflecting telescope at Palomar Observatory, California, was used for the Palomar Observatory Sky Survey (POSS), published in 1958, one of the largest photographic surveys of the night sky.

Based on the man's pipe shadow's direction, thrown onto the telescope, there is reason to believe an off-camera flash was used to make the picture.

Every two weeks, *The New York Review of Books* falls into my letterbox. Those are good days. Most often, I won't get to reading it, but what I instantly do, is check the last page with 'The Classifieds'. The people writing the (genuine, not fictitious) adverts and inquiries reappear every so often. I happily assume the position of the implied reader, as they address the presumed readers of the review. There's a 'charismatic, aging French rock star' providing original songs in Franglais. There are top notch apartments in Paris for aspiring writers. There are those seeking love and astronomical peculiarities: 'Hitch my wagon to a star – Looking for a bright sophisticated senior star gazer! CStein3981@aol.com'.

Near Avenue 61 on an artificial island close to Seef, a truck is being towed after the driver lost control over the vehicle and flipped it onto its side. A warm wind blows in from the Persian Gulf.

A police officer signals us to come closer. ‘Why are you taking pictures?’ he asks. ‘This is just an accident. You have to delete the pictures from your phone. Now.’ After checking the pictures-folder on our phones, he gets in his car, drives a few metres, stops the car and rolls down his window. ‘And don’t do it again!’ he yells. Then he drives off, raising a cloud of sand in his wake.

10:03:23

In June, 2014, a severe hailstorm hit Belgium. Warnings were broadcast. A football game between the national teams of Belgium and Tunisia was paused. The morning after, there were small dents in the hood and the roof of the car, each a square centimeter in size, some 10 centimeters separated from each other. The storm didn't get a name.

Assessing the damage, the insurance company's expert took the dents into account to establish the wreck's worth.

10:04:19

A year ago, mid-August, just before sunrise, the mostly unlit office buildings line the road that leads to the underground parking. I turn off the ignition. I'm in F36. The walls are painted pink. Looking for the exit, I take the escalator and get stuck in an empty shopping mall. The music is playing but all the shops are closed off with steel shutters. So are the exits. I'm out of place. In keeping early customers out, the mall is keeping haphazard visitors in. I'm back in the parking lot. The elevator is broken. I take the stairs and walk by a homeless man, sleeping. There's shit on the floor. I open the door that leads out of the stairwell. It slams shut behind me. There's no doorknob. I find myself on a dark floor between mall and parking lot. People are sleeping; some are awake. Heads turn toward me. I start walking slightly uphill towards where I think I might find an exit, or an entrance. The scale of the architecture has shifted from car (F36) and customer (the closed mall) to truck. I find myself amidst the supply-chain. It takes five minutes, maybe fifteen, maybe more to get out and see the office buildings towering over me in the first light of day.

At the Tunis Institut National du Patrimoine, the sand-covered floor has traced Anne Teresa De Keersmaecker's movements to Steve Reich's *Violin Phase*. The venue empties out. It is dark and the way back to the hotel through the medina is labyrinthian and eerie. It has been a couple days since we arrived, and I have managed to make a mental image of the inner city by memorizing some waymarks – intersections, buildings, shops – coupled to a direction. Sometimes, a newly entered street would give out to such a waymark – a peculiar sensation: a flash of spatial insight, like a crumpled ball of paper unfolding. The narrow streets turn and turn. Some passages are closed at night. I must improvise a route, but the basic mental structure to do so is missing. Shopkeepers have moved their goods inside.

I have no sense of orientation. I can't estimate distances nor can I tell north from south. Everything is scaleless. My highly simplified scheme of the city's layout gets us to our destination. The functional interpretation of Tunis differs completely from the actual Tunis. It is a different city we crossed, and made while crossing.

(‘Imaginary landscape in the actual greater Gent, some thousands of years ago. A grassy riparian zone separates rivers from the edge of the forests’)

Imagine a deserted city of Gent, overtaken by nature, Thiery asks the reader in his book *Het woud* (*The Forest*). After fifty years, you return to the city. Buildings have collapsed, streets are overgrown. It has become an impenetrable, dense forest, except for the river on which the reader makes his or her way through it. In the first half of the twentieth century, Leo Michel Thiery made one of Belgium’s first botanical gardens for educational purposes. In the middle of an industrialized quarter of the city of Gent, the garden presented different sceneries. There were landscapes from the Alps, dunes, the Ardennes, steppe. Besides sceneries with chalk-, loam-, marl- and sand-based vegetation, there were forests, grasslands and swamps.

After his death, Thiery’s garden decayed. Decades later, it was restored, with the Alps, dunes, the Ardennes and steppe now classified as a protected view.

(‘Slice of more than three meters in diameter, sawn from a Mammoth-tree, given by California to the botanical garden of New York, and presented there’)

Thiery describes the ‘patriarchs’ of the plant world. This slice of a Sequoia, which fell in 1917 in Yosemite National Park, is 1694 years old. A woman of the New York Botanical Institute, where the slice of the patriarch is presented, counted the rings. If one would look at the picture with a magnifying glass, Thiery writes in a footnote, the reader (with good eyes and a fair amount of knowledge of the English language) would be able to read the labels indicating the important global events the tree witnessed. They are transcribed and translated by the author. The end of the Roman occupation of Great Britain. Columbus arriving in America. The Declaration of Independence. This is a lie: the text is illegible, even when using a magnifier.

In the photograph, the slice, as on view in the New York Botanical Institute, is presented upright. To prevent it from rolling away, two small triangular slices of wood were posited at the left and right side of the slice. The type of wood of these slices, nor the age of the patriarch from which they stem, are known.

Between the rhinos and the kangaroos in the Antwerp Zoo a wooden footpath curves through a grove of *Sequoiadendron Giganteum* trees. In the middle of this Californian forest, visitors find the giant slice of a felled tree of the same species. It was brought to the zoo in 1962 and was approximately 650 years old at the time. Eleven labels point out significant moments in history on the tree's growth rings. They range from zoo- and zoology-related moments (for instance: '1901: The Okapi is described as a species', or '1843: Foundation of the RZSA and opening of the Zoo', or '1859: Darwin publishes *The Origin of Species*', etc.), to cultural and historical milestones ('1555: Plantijn starts publishing books in Antwerp', or '1640: Rubens (baroque painter) dies', or '1492: Columbus in America'). Another label points to the last growth ring and reads: '1962: this tree is felled and this tree disc is installed at the Zoo.'

The label pointing to the centre of the tree implies a simultaneity between the tree's first growth year and the Battle of the Golden Spurs in 1302.

Notes

On closer inspection the slice seems to consist of two halves that were put together like a jigsaw puzzle. The resulting gap is skilfully patched with what appears to be wood from the same species – possibly even the same mammoth tree.

A mostly empty book designed to collect cigar bands. The bands are glued to the paper at their left side, so the information on the backside, explaining the image and referring to the series it belongs to and the number of different labels the series contains, can be looked up. The book has complete and incomplete series on Christopher Columbus (complete), tanks (incomplete), the origins of civilization (complete), Ancient cultures (incomplete), fashion (complete), South-American sculptures (complete), Ancient columns (incomplete), Nobel Prize Winners (incomplete), an unclarified series of seven men, most of whom are ‘prof.’ or ‘dr.’ (complete / incomplete), design plates (incomplete), famous Belgians (complete / incomplete), statesmen (incomplete) and football players (incomplete). The first page in the book is used to present two series. The left column presents the Egyptian dynasty (incomplete). The middle and right column present a series of bands by the brand Jubilé on the history of energy in telling scenes and pieces of machinery.

Series: Energy

Middle column, top to bottom:

- The writing telegraph. Hughes
- Experiment with a sulphur globe. William Gilbert
- Primitive telephone. Philipp Reis
- Wireless telegraph.¹ Guglielo [sic] Marconi
- The arc of Volta. Sir Humphry Davy
- Fire in the wagon. Thomas Alva Edison
- Experiments with lightning. Benjamin Franklin
- Cathode for creating X-Rays. Wilhelm Röntgen
- Rotating magnetic field. Galileo Ferraris

Right column, top to bottom:

- Electric discharge. William Watt
- Magnetic telephone. Antonio Meucci
- Muscles reacting to electricity. Luigi Galvani
- Voltaic pile. Alessandro Volta
- Oscillating circuit. Guglielo [sic] Marconi
- Development of the telephone. Graham Bell

- Telephone, beginning of the 20th century
- Next to his wireless telegraph. Guglielo [sic] Marconi
- Invention of the incandescent light bulb. Thomas Alva Edison
- Morse’s telegraph. Samuel Morse

The series is incomplete.²

Notes

- 1 The scene shows a man standing at a desk, sticking out his hand to an officer in a window that reads, in mirror writing: Customs.
- 2 On eBay a complete series is advertised (15 EUR), with a lo-res picture of the whole collection, including the five bands missing in my grandfather’s collection. The information on the back, however, is not given. It leads to a highly speculative history of energy.
 - A man in a gown watching a T-shaped object.
 - A child in a cellar, sitting on a stool at a table with gray objects.
 - A soldier kneeling beside a child, in front of a train, and in front of a boat.
 - A low table with a giant cartwheel of sorts and a box.
 - A vertical object with what seems to be a bell on top.

It's 21:49 on Tuesday May 4th 2021. I'm sifting through the folders of a back-up drive. When I reach Archief2A/2017/wigny donder, the subfolder contains 103 items (97 DNG-files, 1 JPEG-file and 5 PSD-files). The photographs are all very similar. They show the silhouette of the same tree and hills, the red light of the telecommunications mast on the left and the orange glow of the street's sodium lights. The thunderstorm moves from right to left. _44A3920 is the only exposure (10 seconds) that recorded lightning bolts.

I looked up *heat lightning*, also known as *silent lightning*, *summer lightning*, or *dry lightning*, which is simply cloud-to-ground lightning that occurs very far away, with thunder that dissipates before it reaches the observer. On YouTube I watched: *Top 10 Dangerous Lightning Strikes Thunder recorded on Camera (HIGH VOLTAGE!!)* followed by *Lightning Strikes at the 2019 U.S. Women's Open*. It's 22:07, I am doubtful at first but become convinced I can hear thunder afar.

10:14:25

During the 1950s, as part of the communist reconstruction, a large coal/gas power plant was built close to the village of Inota, Hungary. This is the place where I grew up. It operated until about 1994. In the run-up to the final shutdown of the operation they gradually lowered its output. By this time the coal mines in the neighboring city had shut down as well due to the diminishing yield of the low-quality brown coal they had mined for the purpose of fueling the power plant. This resulted in mass unemployment and general decline in the area. The small lake in the photo is an artificial reservoir that collected all the water from the nearby streams. The substantial flow of one of those rivers powered about 11 water-driven flour mills; I know this on account of my grandmother, who would often pick up bags of flour for bread.

The ruin in the photograph once was a pumping facility that drove the water from the lake to the power plant about 3 kilometres away. In the years following the systemic change of Hungary and its celebrated evolution towards a western-type capitalism in '89-'90, the rules of ownership and the perception of public and private property were somewhat elusive. The lack of state control resulted in a transfer of public property to private hands on a monumental scale throughout the whole country, and – by extension – the Eastern Bloc. At the time some of the village dwellers of Inota, driven by the force of a major change and the prospect of a new, prosperous future of capitalist entrepreneurship, gathered to disassemble the water-pumping facility along the artificial lake. Slowly, day by day, under the mist of this elusive moment, they carried away

carriageful after carriageful of bricks, disassembled from the facade of the building. It was perhaps a way of taking revenge, but certainly also claiming the moment's opportunity. The bricks made their way into the walls of the new-built family homes of some of the villagers. The former water pumping facility became a sort of material reservoir for the construction of a new future. The transformation from a water reservoir to a material (and ideological) one and its subsequent exhaustion, left a ruin that has remained untouched for the last 30 years. The bricks that were difficult to reach were left in place, thus forming a curtain around the upper part of the building just above the pillars. Freed from all perimeter walls, the leftover structure appeared as a pavilion-like, open floor plan.

Notes

- The cliffs at the sides of the valley on the photo served as the location for the film *My Way Home* (Így Jöttem, 1965) by the iconic Hungarian filmmaker Miklós Jancsó, about a 17-year-old boy who falls prisoner to the Russian army and forms a friendship with one of the foes. The film is said to display all the main themes of the director: the psychological presence of landscape, the randomness of violence and the arbitrary nature of power.
- In the distance a formation of meadows can be seen in the photograph. Those meadows make up 16 acres of land that were given to my grandfather and subsequently inherited by my mother. It was a reparation for having been stripped of their wealth by the Soviet establishment in the 1950s. The worth of the land is a couple thousand euros as of today. It is part of the largest consistent nature reserve area of the EU.
- While standing on the cliffs and looking south-eastward, the power plant can be seen. The orientation of the photograph is approximately north facing.
- Turning southwards one can see the stone cellar, about a kilometre away, where my grandfather's adolescent sister had spent more than a year, while two German SS officers occupied their family home. During the advancement of the Red Army, a Russian soldier, entering the cellar, attempted to take advantage of her. The soldier's superior intervened and shot him in the head without hesitation. My parents store potatoes and apples in the cellar to keep them from rotting in the summer and freezing in the winter. It is easy to say when a potato or an apple comes from the cellar; it has an unmistakable, musty taste.

A block of concrete. Fissures are showing and rebar is sticking out from all sides. If it were still straight, the block would measure approximately 130 x 15 x 40cm.

It is lying by the side of the road, a few hundred meters from a construction site. It appears to be shaped by impact. Maybe the block plummeted to the ground from a great height. Perhaps, something heavy hit it. For all one knows, it served as a column and was exposed to an unforeseen amount of pressure, causing it to buckle.

According to Eyal Weizman '[a]rchitecture emerges as a documentary form, not because photographs of it circulate in the public domain but rather because it performs variations on the following three things: it *registers* the effect of force fields, it contains or *stores* these forces in material deformations, and, with the help of other mediating technologies and the forum, it *transmits* this information further.'

Article 75 of the Royal Decree containing general regulations for road traffic and the use of public roads, published in *Het Belgisch Staatsblad* on 9 December 1975, lists the rules for longitudinal markings indicating the edge of the roadway.

According to 75.1, there are two types of markings that indicate the actual edge of the roadway: a white, continuous stripe and a yellow interrupted line. The former is mainly used to make the edge of the roadway more visible; the latter indicates that parking along it is prohibited.

In 75.2, the decree focuses on markings that indicate the imaginary edge of the roadway. Only a broad, white, continuous stripe is permitted for this purpose. The part of the public road on the other side of this line is reserved for standing still and parking, except on motorways and expressways.

On a pile of fresh hospital sheets, near the radiator, the tangerine curtains and the black marble window sill (the window looks out over the parking lot), underneath the two-day-old bouquet of flowers and next to a pile of magazines with a handwritten note on top (about a syrup that relieves slime and tastes like oranges), lie two sheets of paper.

Earlier that day the physiotherapist had come by. Twice. Once in the morning and once in the afternoon. He had each time drawn the first line, as an example. A straight line in the morning, a curvy line in the afternoon.

With a ballpoint pen my grandfather, who is recovering from an accident, diligently copied the examples (31 in the morning, 5 in the afternoon).

Fairly detailed map of the two major marble quarries on the island of Tinos, Greece. The spontaneous route-advice was prepared by a local marble worker, P.D., in the Karia region of the island on a locally extracted, green marble slab. The waved lines represent roads traversing uphill, while the straight lines represent roads following a contour line of the topography.

‘Tell your friend that the wine is for girls; it’s very sweet,’ the marble worker alerted my travel companion K.S. after offering us local sweet wine. The workshop smelled like boiled meat and bones.

Notes on map from left to right, top to bottom:

On May 6th 2020, 14h06 and 31 seconds, the Belgian Seismological Institute records an earthquake with a 1,7 magnitude in the region of Braine-Le-Compte. Three reactions from people in the neighbourhood, filed by the Institute, confirm the official seismological recordings. The Institute's website classifies the earthquake as a 'quarry blast'.

A skiing holiday with my in-laws. The ski pass does not allow you to visit Schatzalp. We buy a separate ticket and take the train up the hill to the hotel, which served as the backdrop for Thomas Mann's *Magic Mountain*. The stately hotel and former sanatorium is gorgeous.

Meanwhile, a new virus is spreading. Some people are coughing. I am keeping distance while waiting in line to take the train back down to the snow-covered village.

During the one day course *Safety and Avalanches*, teacher G.T. shows pictures of different manifestations of snow and ice. If one learns to read them, one can deduce the wind direction when hiking or skiing in mountainous terrain.

Wind direction is crucial for assessing the stability of the snow. G.T.'s examples are of Austrian origin. He speaks about 'Anraum': displaced snow can get stacked horizontally against an object, such as a tree or a cross. The snow 'grows and builds into the wind'. Counter-intuitively, the snow points to the side the wind is coming from. One can expect dangerous terrain in the direction of the 'unbuilt' side of the object.

The paths in the valley of the Bayehon are covered with ice. We are making our way down towards the valley of the Ghâster. The temperature is minus 15 degrees Celsius. The water in our drinking bottles is frozen. We are betting on the shelter indicated on the map (*Au Pied des Fagnes, Carte De Promenades*, 1:25.000, Institut Geographique National) to pitch our tent. There is almost no wind, but every breath of air feels like we're being hit with a thousand needles. What the map indicates as a shelter appears to be a picnic table.

In his debut novel 'De Metsiers' Hugo Claus employs a multiple narrative perspective. In the copy I picked up in a thrift store, there's a bookmarker between pages 44 and 45 where the perspective shifts from Ana to Jim Braddok. It's pouring. The pink piece of paper lists 9 sessions at a driving school. There's a total of 20 hours, taught alternately by Johan and Guy.

Notes

In 2000, 2006 and 2017 the twenty-sixth of December was a Tuesday. (Earlier years are improbable, since the Euro was not introduced yet.)

On Wednesday, May 9, 2018 at 2:23:14 PM Koh Elaine starts the thread *original or original copy* on the The Free Dictionary by Farlex's forum.

the-documents.c

'Is "original copy" correct or should it be "original"? Thanks.'

The seventh reply to Elaine's question is Wilmar's on Thursday (his was preceded by towan52, georgew, NKM, Koh Elaine, Sarriesfan, ChrisKC, Ashwin Joshi).

'An original copy IS the original.

Folks usually call the document first created the original, but some will say original copy. If I run that original thru the copy machine, I end up with two copies (yes, I said copies) of the same thing – the original and the duplicate of it (in terms of content). This is how the term is commonly used.

If your writing or conversation depends heavily on understand the difference, I would recommend using the terms original and duplicates. There are many times when that is very important, in that the original must be retained by a particular party, and the duplicates are marked as such and distributed or stored as required depending on the document and the circumstance.

If you are just trying to make sure that you have enough copies to distribute to everyone at the company meeting this afternoon, use whatever terms trips your trigger. But, if you want to ensure that you keep custody of the original, so that you can make additional duplicates (copies) when additional people attend, then be more specific about the words you use.

OH, and, please, in the future, include some context with your question. Asking if "word" is correct doesn't go very far in supplying a reasonably useful response.'

Our one year old's favourite toy he's not supposed to play with is the *HP Officejet Pro L7590 All-in-one* in my office. I have given up on forbidding him to play with it. We have a new game: he brings me one of his other toys, we put it on the flatbed, close the lid – as far as possible –, press the button 'START COPY – COLOR' and wait for the print to come out of the machine. When we place the original onto the copy, he laughs. So far we have copied his blue pacifier, his planet-earth-bouncy-ball and his rattling crocodile.

When I grew up, my parents told me that the number of raisins in the local baker's raisin bread attested to the result of the most recent soccer match of KAA Gent. A victory was celebrated by throwing more raisins into the dough than usual, a loaf following a painful loss was hardly a raisin bread at all.

The baker retired long ago. Today my two-year-old son picked out all the raisins from his slice of bread. KAA Gent's last game was a tie against Union.

Most mornings I eat three slices of bread. I stack them. Between the highest slice and the one in the middle I put a slice of cheese (young Gouda). I put the whole in the microwave¹ for 1 minute and 50 seconds. The result is what I like to call a *smelteram*².

On the morning of my thirty-second birthday the plate broke in half during heating.

Notes

- 1 A photograph showing a slice of bread with melted cheese on a white plate, placed inside a microwave oven. The microwave door is open, and the interior is visible.
- 2 A contraction of *smelten* (Dutch for melting) and *boterham* (Dutch for a slice of bread).

It's early spring. The pool is covered with a sheet of plastic. The deciduous trees are just leafing out. A tree stump serves as a placeholder for the diving board's foot – it was customary to take it indoors for winter – and keeps people from kicking its threaded rods sticking up from the silex tiles that line the pool.

The upper right corner of the plastic frame is missing. It's probably where the insect – now dead, dry and yellowish – got in. The frame was left behind in the laundry room overlooking the garden, the pool and the pool house. At the time it hadn't been used for quite a while. Half empty, the water green.

In summer, when the wind dropped, horse-flies came. You could shake them off temporarily by swimming a few meters underwater.

In the archive of the architect O. Clemminck, there is a piece of a plan of a building in a suburb in Gent. It presents the ground floor. There is a kitchen, a salon, an eating place, a meeting place. The missing part would have stated the exact address, the name, and maybe the profession of the owners. The plan of the first floor might have given an indication of the number of (anticipated) family members, based on the number and size of sleeping rooms.

At the southern edge of (the plan of) the lot, O. Clemminck has drawn a laundry room that gives out to a *vérandah*. The spelling of the Dutch word – nowadays written as *veranda* – is remarkable, as is its etymology, which is unclear and a matter of debate among scholars. The word might have Portuguese (*varanda*: railing) and Catalan roots (*baranda*: barrier), maybe also origins in the Lithuanian Žemaitan dialect (*varanda*: loop plaited from flexible wings) and might also be traced back to a Sanskrit root (*varandaka*: rampart separating two fighting elephants).

The *vérandah* O. Clemminck proposes is 2,40 meters by, at least, 2,80 meters.

All chairs are empty, but all face something different. The bottom photograph shows empty chairs facing empty desks. In the middle picture, empty chairs face each other (underneath the inaudible sound of the cinema above). In the top photograph, the chairs seem to be facing the photographer. However, the altar's in front of the photographer. He stands at the back of the provisional church. The chairs face the photographer and have turned their backs to the altar.

At the State Archive in Kortrijk, I am leafing through a 1955 photo album of the construction of the provisional church in Lokeren by the famous furniture company Kunstwerkstede De Coene. Gigantic wooden, prefabricated beams structure the building. It is cold. An old man in a grey suit shuffles between the racks to look up the date of birth of his great great grandmother. Snow covers the unfinished provisional roof. A bus passes, I reckon, through the pouring rain.

It snows on December 19, but the situation changes on the 22nd with the arrival of an Atlantic low-pressure area, bringing masses of hot and humid air. Thaw follows.

And then, it snows again on December 26 and 27, before the arrival of a new warm front on the same day. A significant and brutal rise in temperature ensues: at Lac Noir, at 920 m, the temperature shoots up from 0,3 °C on December 27 at 7 AM to 7,4 ° C on the 28th at 9 PM.

On March 23th 2015, a high pressure system above Panama Bay blew strong winds landwards. At the Gatun locks, one of the webcams overlooking the Canal neglected the traffic and briefly captured its own images. The ship's presumed passage through the Gatun locks wasn't recorded by this camera and the AIS-transponder did not save any data of the ship's transit from the Pacific to the Atlantic side of the canal: the Authenticity managed to swap oceans undetected.

On February 16th 2016, the transponder still signals the ship near the port of Bahia Las Minas. The current is calm, the ship has been practically immobile for a year.

Ten years ago, in November, I drove up to Frisia – the northernmost province of The Netherlands. I was there to document the remains of air watchtowers: a network of 276 towers that were built in the fifties and sixties to warn the troops and population of possible aerial danger coming from the Soviet Union. It was very windy. The camera shook heavily. The poplars surrounding the concrete tower leaned heavily to one side.

I drove up to the seaside, a few kilometers farther. The wind was still strong when I reached the grassy dike that overlooked the kite-filled beach. I exposed the last piece of film left on the roll. Strong gusts of wind blew landwards.

Months later I didn't bother to blow off the dust that had settled on the film before scanning it. A photograph without use, with low resolution, made for the sake of the archive's completeness.

The dust on the film appears to be carried landwards, by the same gust of wind lifting the kites.

I must have driven past this rocky landscape about sixteen times, going back and forth between viewpoints and the house the parents of a friend let me stay in. On the last day, I left early for the airport, pulled into a lay-by, took my tripod and camera out of the trunk of the red Volkswagen Polo rental car and made two photographs.¹ It was only when I got home, had the film developed, scanned it and was removing dust particles from the file, that I discovered the hand painted text on the rock: ‘PROIBIDO BUSCAR SETAS’.

I'm taking a scan of a family photo album given to me after my grandmother passed away, wanting to write something about the marvelous portraits inside. The genealogy is only partly clear to me: I recognize my dad as a kid, my uncle, my grandmother, her brother in the laboratory he (said he) ran. He smelled of cigars and severe perfume. The older photographs present people I don't know, but must be my ancestors. My grandmother told me stories¹ that, historically, reach further back than the figures I recognize in the photographs. There are no names and no dates in the album. The first two pictures seem to be the oldest ones.² I retract them from the album pockets in which they were slid to check if something is written on the backside. When I take the album away from the scanner's glass plate, particles of leather, gold varnish and sturdy cardboard come loose. I place a sheet of paper on the glass plate and press 'scan' again.

Notes

- 1 Once she (my grandmother) went home from school, sick, with her bicycle. She studied to become a nurse. The school was in Brussels, about 60 kilometers from her native village M. The milkman's van tipping over in front of my grandmother's parental house. A milk covered street. My great-grandfather, physician and mayor at M. Something happened during the Second World War having to do with telephones or radios when she was still a kid.

Halfway March my dad started finding empty clam shells on the banks of the Zuidlede along the pasture where he used to herd sheep. He had never seen this type of clam before. There were easily seventy of them along a hundred metre stretch of riverbank.

He brought two specimens to someone he knows in the neighbouring provincial domain. She would look into it, she said, and that she would probably pass it on to someone at the educational department.

Yesterday he (my dad) received a printout of the Dutch wikipedia-page on the Brakwaterstrandschelp (*Rangia Cuneata*). On the page Paul (who sends his regards at the bottom of the document) traced around the scallops with a blue ballpoint pen.

My dad added in capitals – also with a blue ballpoint pen – that the *Rangia Cuneata* is an invasive species, native to the Gulf of Mexico. The first time it was observed in Europe was in Antwerp in August 2005, most probably they reached Europe in the ballast water tanks of large ships.

WIKIPEDIA

Brakwaterstrandschelp

De **brakwaterstrandschelp** (*Rangia cuneata*) is een tweekleppigensoort uit de familie van de Mactridae.^[1] De wetenschappelijke naam van de soort is voor het eerst geldig gepubliceerd in 1832 door Sowerby I.

Brakwaterstrandschelp

A half a day's walk from the Fuente Dé *teleférico*, there are less and less traces of passers-by. The path to Sotres suddenly runs through a lush green. The fence between two pastures keeps the sheep from crossing and coincides with the border between two regions. A hole in the fence would change the landscape's hue.

The European flag symbolises both the European Union and, more broadly, the identity and unity of Europe. It features a circle of 12 gold stars on a blue background. They stand for the ideals of unity, solidarity and harmony among the peoples of Europe. The number of stars has nothing to do with the number of member countries, though the circle is a symbol of unity.¹

1. Coat of arms of Gmina Puck, a rural district in Puck County, Pomeranian Voivodeship, in northern Poland.
2. Illegible.
3. F.C. Hansa, Mecklenburg, Pommern, FC Hansa Rostock is a German association football club based in the city of Rostock, Mecklenburg-Vorpommern. They have emerged as one of the most successful clubs from the former East Germany and have made several appearances in the top-flight Bundesliga. Hansa Rostock's official anthem is "FC Hansa, wir lieben Dich total". Hansa struggles with hooliganism, estimating up to 500 supporters to be leaning towards violence. The club's logo consists of a red sailing ship with a blue sail showing the Rostock Griffin.
4. Mon École Écologique.org is an organization for environmental conservation. On 07.01.2021 there was no website listed on this URL.
5. Illegible.
6. Illegible, apart from '1962' in the middle.
7. Innocenti Bruderschaft, EL, 2018, a community of German Lambretta Innocenti riders and aficionados.
8. Imag'Ink, Bretignolles Sur Mer, Tatoueur, 06 06 44 13 51, a French tattoo shop.
9. Illegible.
10. Hardly legible, the only word that can be made out is 'Futbolom': Russian for soccer.
11. Kaluga on tour. Kaluga is a Russian city 150km southwest of Moscow. It is often called the cradle of space exploration thanks to the city's most famous resident: Konstantin Tsiolkovsky.
12. Hansa Ultras, F.C. Hansa. The Ultras are a group of F.C. Hansa fans (see: '3').
13. Illegible because '12' was stuck over it.
14. Illegible.
15. La Hutoise is a regional student-association for higher education students from the Belgian town of Huy and its surroundings. Its aim is to

bring together students from Huy in a spirit of camaraderie and to perpetuate student folklore. The logo consists of a two headed bird of prey with a cap on each head. The bird wears a scarf over one shoulder and holds a glass of beer in each paw.

16. F.C. Hansa, Grimmen. The F.C. Hansa logo (see '3' and '12') is combined with the coat of arms of Grimmen: a griffin on a pile of 10 bricks. Grimmen is a German town in Nordvorpommern on the banks of the river Trebel.
17. Illegible.
18. Heil Hansa. To the left of this text the F.C. Hansa logo (see '3', '12' and '16'), on the right a logo consisting of a black bull with his tongue out and a golden crown on his head. This controversial sticker led to several arrests in the run-up to the match between F.C. Hansa Rostock and Bayern München in February 2020. Supporters of F.C. Hansa had attached this sticker to public buildings on their way to the stadium.
19. Illegible because '16' was stuck over it.
20. The Cuban flag.
21. Illegible.
22. Illegible.
23. Kaluga (see '11').
24. De Veterinnen, a round, black sticker with a red print of a head wearing a round hat and a carnivalesque collar with a carrot for a nose. No further information found.
25. Złomol 11. Złomol is a yearly charity car rally racing event that starts in Katowice Poland. Contesters must drive a car that was built or designed during the communist era. The destination of the 2011 edition was Loch Ness.
26. F.C. Hansa, Mecklenburg, Pommern, identical sticker to '3', see also '12', '16', and '18'.
27. Torpedo Moscow, only for white. Football club Torpedo Moscow is a Russian professional club based in Moscow, founded in 1930. Some fans of the club wave far-right symbols and banners, both during and outside of matches. Massive fan-protest ensued when the club tried to sign a black player in 2018. The player's contract was cancelled.
28. Heil Hansa. See '3', '12', '16', '18' and '26'.
29. Illegible.
30. Illegible.
31. Illegible.
32. Illegible.

33. F.C. Hansa. Variation of '3' and '26' with a circle of yellow crops around the logo. See also '12', '16', '18' and '28'.
34. Live animals, contents: Rivne UA. These stickers are required by the International Air Transport Association for airline cargo pet travel. Rivne is a city in western Ukraine (UA) with an international airport. The sticker does not specify the transported animal but displays a dog, two birds, two fish and a turtle.
35. Illegible.
36. Illegible.
37. Illegible.
38. Illegible, apart from 'lska' on the bottom.
39. Norrland Fly Guys, Reading Water. The sticker displays a minimal landscape with two pine trees, and a shed on a chunk of floating ice, a single four-point star shines in the sky. Norrland is the northernmost part of Sweden. No further information found. Whether the 'fly guys' own airplanes or are involved in fly fishing is unclear.
40. This sticker displays – what appears to be – a smiling potato in front of an enlarged snow crystal. No further information found.
41. Traumsucht is an artist collective from Berlin. Their website lists German rap-artists
42. Illegible.

In the introduction to her book *Qu'est-ce que la documentation?*, French 'documentalist' Suzanne Briet asks what a document is. In a scrappy scan of her book I found online I am highlighting almost everything she writes. Is a star a document? Briet says it isn't. But the catalogues and photographs of stars are. When I quickly opened the file with Apple's 'Preview' application to check the above paraphrase, the highlighted sentences were illegible.

Notes

Briet is cited in Lisa Gitelman's *Paper Knowledge* (2014).

A Julien CAIN

DE tout temps la latinité et son héritage ont donné au mot *document* le sens d'enseignement ou de preuve. Le dictionnaire de RICHELET, comme celui de LITTRÉ, en apportent deux témoignages français. Une bibliographie contemporaine soucieuse de clarté a lancé cette brève définition :

Si l'on se réfère aux définitions « officielles » de l'Union Française des Organismes de Documentation, on constate que le document est présenté ainsi : «

Cette définition a été parfois mise en échec par des linguistes ou par des philosophes, épris comme il se doit de minutie et de logique. Grâce à leur analyse du contenu de la notion, on a pu proposer ici une définition, la plus approchée qui soit à l'heure actuelle, mais aussi la plus abstraite, et partant la moins accessible :

A notre époque de transmissions multipliées et accélérées, le moindre évènement, ou scientifique ou politique, lorsqu'il a été porté à la connaissance du public, s'alourdit aussitôt d'une « vêtture de documents » (Raymond BAYER). Admirons la fertilité documentaire d'un simple fait de départ : par exemple,

l'information de presse fait connaître l'évènement par des communiqués de journaux, de radio, par les actualités cinématographiques. La découverte fait l'objet d'une communication à l'Académie des Sciences. Un professeur du Muséum en fait état dans son enseignement. L'animal vivant est mis en cage et catalogué (jardin zoologique). Une fois mort, il sera empaillé et conservé (au Muséum). Il est prêté à une Exposition. Il passe en sonorisé au cinéma. Son cri est enregistré sur disque. La première monographie sert à établir partie d'un traité avec planches, puis une encyclopédie spéciale (zoologique), puis une encyclopédie générale. Les ouvrages sont catalogués dans une bibliothèque, après

I bought my son a gift while abroad: a toy turtle named Essie whose perforated shield projects stars onto the ceiling in blue, green or amber. ‘8 actual star constellations’, the box proclaims.

The manual explains how to power up the turtle and what the four buttons on Essie’s back do. The small document (recto: Chinese, verso: English) concludes with some ‘Words from Little Turtle ESSIE’. In it the turtle shifts from direct speech to illeism¹ and back.

Notes

- 1 The act of referring to oneself in the third instead of first person.

Seven years after the devastating flood, in 1954, the building of the dam is decided upon. Between 1959 and 1963 the infrastructure is built, and the reservoir gets filled with water in 1964 to act as a buffer for sudden floods and to guarantee a flowing Thur through the highly industrialized area downstream.

During the 1950s, as part of the communist reconstruction, a large coal/gas power plant was built close to the village of Inota, Hungary. This is the place where I grew up. It operated until about 1994. In the run-up to the final shutdown of the operation they gradually lowered its output. By this time the coal mines in the neighboring city had shut down as well due to the diminishing yield of the low-quality brown coal they had mined for the purpose of fueling the power plant. This resulted in mass unemployment and general decline in the area. The small lake in the photo is an artificial reservoir that collected all the water from the nearby streams. The substantial flow of one of those rivers powered about 11 water-driven flour mills; I know this on account of my grandmother, who would often pick up bags of flour for bread.

The ruin in the photograph once was a pumping facility that drove the water from the lake to the power plant about 3 kilometres away. In the years following the systemic change of Hungary and its celebrated evolution towards a western-type capitalism in '89-'90, the rules of ownership and the perception of public and private property were somewhat elusive. The lack of state control resulted in a transfer of public property to private hands on a monumental scale throughout the whole country, and – by extension – the Eastern Bloc. At the time some of the village dwellers of Inota, driven by the force of a major change and the prospect of a new, prosperous future of capitalist entrepreneurship, gathered to disassemble the water-pumping facility along the artificial lake. Slowly, day by day, under the mist of this elusive moment, they carried away

carriageful after carriageful of bricks, disassembled from the facade of the building. It was perhaps a way of taking revenge, but certainly also claiming the moment's opportunity. The bricks made their way into the walls of the new-built family homes of some of the villagers. The former water pumping facility became a sort of material reservoir for the construction of a new future. The transformation from a water reservoir to a material (and ideological) one and its subsequent exhaustion, left a ruin that has remained untouched for the last 30 years. The bricks that were difficult to reach were left in place, thus forming a curtain around the upper part of the building just above the pillars. Freed from all perimeter walls, the leftover structure appeared as a pavilion-like, open floor plan.

Notes

- The cliffs at the sides of the valley on the photo served as the location for the film *My Way Home* (Így Jöttem, 1965) by the iconic Hungarian filmmaker Miklós Jancsó, about a 17-year-old boy who falls prisoner to the Russian army and forms a friendship with one of the foes. The film is said to display all the main themes of the director: the psychological presence of landscape, the randomness of violence and the arbitrary nature of power.
- In the distance a formation of meadows can be seen in the photograph. Those meadows make up 16 acres of land that were given to my grandfather and subsequently inherited by my mother. It was a reparation for having been stripped of their wealth by the Soviet establishment in the 1950s. The worth of the land is a couple thousand euros as of today. It is part of the largest consistent nature reserve area of the EU.
- While standing on the cliffs and looking south-eastward, the power plant can be seen. The orientation of the photograph is approximately north facing.
- Turning southwards one can see the stone cellar, about a kilometre away, where my grandfather's adolescent sister had spent more than a year, while two German SS officers occupied their family home. During the advancement of the Red Army, a Russian soldier, entering the cellar, attempted to take advantage of her. The soldier's superior intervened and shot him in the head without hesitation. My parents store potatoes and apples in the cellar to keep them from rotting in the summer and freezing in the winter. It is easy to say when a potato or an apple comes from the cellar; it has an unmistakable, musty taste.

Yesterday I had my shoulder checked by a radiologist. He took an ultrasound and saw some minor inflammation of my right subscapularis.

After giving me some advice – ‘we could give you a shot of cortisone in the shoulder. It would relieve you from your pain for six weeks and then, without proper exercise, you’d be back where you are now’ – he walked towards the door. ‘I propose you do this exercise thirty times, three times a day.’

The radiologists put his right hand on the doorframe, his arm stretched, the weight of his body on it and then leaned forward and back again, while keeping his arm stretched. ‘This will increase the muscles around the sore subscapularis. It will take months.’ After giving me his advice, he sent me back into the dressing room. I put my shirt back on and went into the waiting room. The nurse called out my name, charged me 14,00 EUR and gave me a card. ‘This code will allow you to look at the images of the ultrasound at home’, she said.

Today I entered the code and password and – instead of my shoulder – found the röntgen-images of someone else’s broken heel.

Conducting research into the effects on energy consumption of blockchain-based applications such as bitcoin, I was triggered by the fact that many of the facilities making blockchain-mining¹ possible are located in Georgia. Low energy prices and a relaxed taxation policy are said to be among the reasons why companies such as Bitfury locate their plants there.

After a three-day hike in the Caucasus Mountains, on the Georgian side of the border with Chechnya, we are invited to pitch our tent in the garden of Murati, a local farmer in a small mountain village. We are overwhelmed by the scenery and Murati's hospitality. Many of the villages, thrown on the mountain flanks, have tower-like structures of some twenty meters high, making them all look fortified. They have no windows or doors on the ground floor.²

Murati invites us into his house to drink warm milk with his family and brings us cheese-filled bread. One of us speaks Russian. He inspects our backpacks, headlights and drinking bags. He tells us a 500 kilogram pig of his did not return to the house that night. The family is saddened.

In the evening, we see him taking his granddaughter by the hand. They walk to the highest point of the gravel road in front of his house and together watch the last light of the day fall on the snow-covered triangular peak of one of the Caucasus' highest mountains.

I'm mistrusting my memory and look the passage up in the journal we kept. The village is called Zagar. The mountain is Mount Tetnuldi. The granddaughter's name is Anna.

When I click through to one of the websites promising information on Georgia's blockchain economy, I happen to stumble on a dark web-related website and access is denied.³

Notes

1. 'Mining' is what is being done when data – a transaction – has to be added to the blockchain (which, in itself, is the sum of all previous transactions, added to each other as data). To do this, computers have to solve a complex mathematical puzzle, which is crucial for the trustworthiness of the system, but for which loads of energy is needed. Criticism on the effects of blockchain-mining is growing, as it has a gruesome effect on resources. In 2018, Andrew North writes, Bitfury used 28 million kilowatt-hours of electricity per month, equalling the consumption of 120,000 Georgian households.

To detect gravitational waves, physicists built enormous research centers, amongst others at Livingston, Louisiana. The facility mainly consists of two tunnels in an L-shape. Mirrors inside provide data. Disturbances from gravitational waves are miniscule. To prevent interference from outside, such as vibrations caused by people passing in the neighbourhood, the mirrors have to be detached from the earth. They ‘float’, suspended by glass fibers in a pendulum-like construction.

As I was watching my screen, a courier was on his way to deliver a book (Noel-Todd, J. *The Penguin Book of the Prose Poem: From Baudelaire to Anne Carson*. London: Penguin, 2019).

On the online thrift shop 2dehands.be the homepage generates a ‘for you’ section. On November 9th this section listed, among other things, a picture of the sky on a patch of concrete. On closer inspection, it became clear that it was the sky’s reflection in a mirror with a red frame and four lightbulbs in it, the kind you might see at the hairdresser’s or backstage in a television studio or theatre. The seller estimates the mirror’s current value to be 45,00 EUR. The listing includes five photographs. In the fifth one, the object for sale reflects a bucolic landscape: a blue sky, white clouds, some trees and a fragment of a barn.

Interior of Eben-Ezer: photocopies and replicas of among other things an *Edit du Roy* and a photograph of a *Marche pour la liberté de conscience*, 1956. Handwritten labels are added beneath the blue frames. Due to limited lighting, and an interdiction to use the camera's flash, some labels are illegible, even when zooming in on the picture. It is unclear what the bottom left replica of a painting is (it has a Brueghelian air to it) and the upper right replica of a photograph.

The walls are made of flint, harvested from quarries in the neighbourhood.

A cigar box, standing at the back of a shelf next to the heating installation, with in it silex-like stones with what seem to be traces of prehistoric usage.

In the garage, there were papers (the archive of O. Clemminck) and objects (stones, tiles) left to us by a man who had worked at the city archive. He was an acclaimed expert on our village's history.¹

Notes

- 1 A recent study by professor Philippe Crombé at Ghent University states that during the last Ice Age, in the region where I grew up, there was once a great lake, with, at the shores, proven presence of prehistoric man. As a kid, we dug up shells with a toothbrush, and set a perimeter with plastic tape. The former presence of a tavern where my parents now live, and the restaurant which still serves seafood at the other side of the road, prevented accurate dating.
