## What constitutes a 'document' and how does it function?

According to the *Oxford English Dictionary*, the etymological origin is the Latin 'documentum', meaning 'lesson, proof, instance, specimen'. As a verb, it is 'to prove or support (something) by documentary evidence', and 'to provide with documents'. The online version of the *OED* includes a draft addition, whereby a document (as a noun) is 'a collection of data in digital form that is considered a single item and typically has a unique filename by which it can be stored, retrieved, or transmitted (as a file, a spreadsheet, or a graphic)'. The current use of the noun 'document' is defined as '*something* written, inscribed, etc., which furnishes evidence or information upon any subject, as a manuscript, title-deed, tomb-stone, coin, picture, etc.' (emphasis added).

Both 'something' and that first 'etc.' leave ample room for discussion. A document doubts whether it functions as something unique, or as something reproducible. A passport is a document, but a flyer equally so. Moreover, there is a circular reasoning: to document is 'to provide with documents'. Defining (the functioning of) a document most likely involves ideas of communication, information, evidence, inscriptions, and implies notions of objectivity and neutrality – but the document is neither reducible to one of them, nor is it equal to their sum. It is hard to pinpoint it, as it disperses into and is affected by other fields: it is intrinsically tied to the history of media and to important currents in literature, photography and art; it is linked to epistemic and power structures. However ubiquitous it is, as an often tangible thing in our environment, and as a concept, a document *deranges*.

the-documents.org continuously gathers documents and provides them with a short textual description, explanation, or digression, written by multiple authors. In *Paper Knowledge*, Lisa Gitelman paraphrases ‘documentalist’ Suzanne Briet, stating that ‘an antelope running wild would not be a document, but an antelope taken into a zoo would be one, presumably because it would then be framed – or reframed – as an example, specimen, or instance’.

The gathered files are all documents – if they weren’t before publication, they now are. That is what the-documents.org, irreversibly, *does*. It is a zoo turning an antelope into an ‘antelope’.

As you made your way through the collection, the-documents.org tracked the entries you viewed.

It documented your path through the website.

As such, the time spent on the-documents.org turned into this – a new document.

A malfunctioning of the camera leading to a double-exposed negative. The car is decisive in establishing the relationship between the superimposed photographs. In the middle of the image, we see it parked in front of the house. Slightly less visible is the same car, repeated but further away. This makes it possible to deduce that the dark outline of the house, with the roof and the chimney, is also the same house as in the other photograph. This time, the house is photographed relatively frontally (the slightly angled point of view allows to bring the shed at the back of the house in the line of sight), and from nearby. At the bottom left, the lines that make up the street help to see the continuity of the one photograph, while the electric wires at the top right aid to comprehend the other one.

The camera malfunction speculates on a future addition to the plot. The dark, outlined shed's scale is realistic with regards to the scale of the house and itself (the shed) in the other photograph. Its position with regards to the other buildings seems logical. It imposes itself as a possible second shed for the owner to build in the next few years. In that future shed, the car, now standing in front of the house, could be comfortably parked.

June 2022, Marche-en-Famenne. I arrived half an hour early. Waiting for my family to pick me up at the station, near a linden tree, I found a yellow page lying on the pebbles in front of the wooden bench I sat on. It had been a hot day. The sun was finally setting. Music playing in the distance. A white Volkswagen. Windows closed. Hard basses, trembling across the road. Folded three times, the sheet of paper had the size of a DIN A7. A white BMW pulled over. Seven glass jars in a container.

'Meunerie Duyckers & Conors, les nouveaux moulins', better known as 'De Nieuwe Molens', is a flour mill established in 1897 in the north of Gent along the Verbindingskanaal. Due to increased production, the original 1897 building doubled in 1904.

Only the facade of the iconic warehouse has been preserved along with the recently renovated gasometers. The building is now part of the Tondeliersite. It has been converted into lofts and flats, and was extended with a new construction.

In Walter Benjamin's *The Arcades Project*, Convolute Q is dedicated to the panorama. Benjamin writes: 'Setup of the panoramas: View from a raised platform, surrounded by a balustrade, of surfaces lying round about and beneath. The painting runs along a cylindrical wall approximately a hundred meters long and twenty meters high. The principal panoramas of the great panorama painter Prévost: Paris, Toulon, Rome, Naples, Amsterdam, Tilsit, Wagram, Calais, Antwerp, London, Florence, Jerusalem, Athens. Among his pupils: Daguerre' (Q1a, 1).

I drove through the neighborhood seeking evidence of the disruption using a power outage map as a compass. Winding through quiet streets, I stumbled upon a lone blue PG&E truck idling opposite a charred utility pole with fragments of wood and wire strewn across the pavement. I parked my car and walked toward the truck to ask the driver what had happened. He pointed to the top of the pole where a porcelain insulator dangled precariously from a high-voltage line. "Tracking," he said curtly. "Is that like a short circuit?" I asked. "Kind of," he replied before pausing. He finally elaborated, explaining that the problem arises when moisture from morning fog settles on power lines, creating a pathway for electricity to arc across components.

He then input something into a handheld device before driving away, leaving the repair for another service team to complete. I gathered the debris intending to collect the remaining components that comprise a utility pole, each having failed in one form or another. I shipped the fragments to Maziar the following week.

During a two hour tour, H.V. (head of the science collection) guided us from the library to the observatory and back. Along the way, he touched upon various rarities: one hundred ninety-five volumes of the *Encyclopédie Méthodique* (according to H.V. the most complete copy left in the world), the severed summit of Mont Blanc ('Actually de Saussure brought back a triangular piece of rock from just below the snow line near the summit'), an original copy of the publication on the infamous Lügensteine ('These date back to the time before the hoax was unveiled')...

In guiding us from room to room, H.V. piled oddity upon curiosity. He showed a particular interest in all things fish-related.

According to @missbluesette, the green K-10 put up for sale by Fred from Zwolle that I came across on marktplaats.nl on 29 September 2022 is not green, but blue. The colour resembles turquoise, I explain, a colour I have always called green. No, turquoise is not green, but blue, she replies. And the texts of my Instagram posts are too long, she says, so she doesn't read them.

On 29 September 2022, I find a picture of a new Sparta K-10 on the website of cyclonewebshop.be. The bike is matt black and has a chaincase and a nice luggage rack at the front. The typical loop at the back is less noticeable in this photo. This is partly due to the colour of the bike.

This bike regularly pops up on the streets of the Brussels neighbourhood where I live. On 4 June 2021, it stands in Rue Verte, in front of the entrance to the Reine Verte Park. The park is built on one of the steepest slopes in Brussels. That condition required a clever park design, in which you can hang out or walk from Rue Verte to Rue des Palais, up, or vice versa, down. The park is well cared for by city services.

The bike is an orange Sparta K-10. It has a remarkably low entry and high handlebars. As a result, it seems to be a comfortable bike, albeit one whose body posture while cycling is not geared to the gradient of our neighbourhood, in which it usually stands. Moreover, it has no gears and the saddle is very slanted.

Yesterday I had my shoulder checked by a radiologist. He took an ultrasound and saw some minor inflammation of my right subscapularis.

After giving me some advice – ‘we could give you a shot of cortisone in the shoulder. It would relieve you from your pain for six weeks and then, without proper exercise, you’d be back where you are now’ – he walked towards the door. ‘I propose you do this exercise thirty times, three times a day.’

The radiologists put his right hand on the doorframe, his arm stretched, the weight of his body on it and then leaned forward and back again, while keeping his arm stretched. ‘This will increase the muscles around the sore subscapularis. It will take months.’ After giving me his advice, he sent me back into the dressing room. I put my shirt back on and went into the waiting room. The nurse called out my name, charged me 14,00 EUR and gave me a card. ‘This code will allow you to look at the images of the ultrasound at home’, she said.

Today I entered the code and password and – instead of my shoulder – found the röntgen-images of someone else’s broken heel.

While I was sitting in the laundromat one evening waiting for my laundry to finish its cycle, *La Isla Bonita* by Madonna came on the radio. Competing with the rustle of seven rotating laundry machines, the song reminded me of a T-shirt that was now being washed.

The short phrase in the song's lyrics 'last night I dreamt of San Pedro' would nestle itself somewhere in the back of my head and bubble up every now and again for no particular reason. I made this shirt for the occasion of Valentine's Day in 2019 to commemorate my friendship with Jan-Pieter. I remember once mumbling the lyrics to *La Isla Bonita*, replacing 'San Pedro' for 'Juan Pedro', forgetting it for some time and then a while later printing it on a T-shirt.

At the end of the day, riding home after work, I find a text on my hand:

C  
D[...]ers  
Desk  
K  
Communication book

‘Diapers’, I recall, and stop at the shop to buy them. Sweat, dust, and manic hand rubbing have rendered parts of the writing illegible. ‘C’ is for Carl, whose newborn I need to visit as soon as possible. Sometimes, I can’t remember what the initial stands for. I don’t have any friends with names beginning with a K (who have newborns I need to visit).

The right hand writes, the left hand serves as the canvas. The back of the right hand, folded around the pen, is blank and tells the always already written on back of the left hand, whose palm never holds a pen, what to register. Right: an author. Left: a poem, sunken into the pores.

Back home, I trace ‘Desk’ again, as not to forget to clean it tomorrow.

The European flag symbolises both the European Union and, more broadly, the identity and unity of Europe. It features a circle of 12 gold stars on a blue background. They stand for the ideals of unity, solidarity and harmony among the peoples of Europe. The number of stars has nothing to do with the number of member countries, though the circle is a symbol of unity.<sup>1</sup>

A visit to the Royal Observatory of Belgium, in Ukkel. Most of the domes are damaged and need repairing. Only a few telescopes are in use. It is difficult to find a good spot from which to film the site. When we asked the people at the Royal Meteorological Institute – the Observatory’s neighbouring institution – if we could access their building’s roof to film the observatory, the answer was ‘no’.

#### Notes

I (M.D.C.) remember there was a fire nearby. We couldn’t see the flames, but a tall dark plume of smoke rose above the trees lining the site. We didn’t insist any longer and ceased our attempt to access the roof, hoping we might find a good spot to film the smoke with a dome in the foreground.
