org is an online platform, collecting, describing, presenting and generating documents of all sorts. It documents documents.

Your path through the collection lead along Mould, YAY HOORAY, Weight Bench, We Welcome Comments, Waybill, Vérandah, Une étoile est-elle un document?, Tipp-Ex, Thunder Afar, This Year’s Model, This site has been seized, The Imaginary Edge of the Roadway, The First Light of Day, The Face of a Chair, The Events That Took Place in Grimbergen, The Birds, The Authenticity in the woods of the Bosque Protector de Arraiján, Strings, Straight in the morning, curvy in the afternoon, Slightly Askew (2), Slightly Askew (1), Shoulder, Shelter, Schelp, Saturn Stationary, Room 3, Roofing (6) – JEM, Roofing (5) – UDI, Roofing (4) – Celine & Logan, Roofing (3) – Simon, tu me manques, Roofing (2), Roofing (1), Raisins, Quarry, Pretending to be an artichoke, Potholes, Populus, Plaster, Pipe, Phase, Passing Time Near a Particle Accelerator, Original Copy, N 47°12.346′ E 18°10.400′, Mushroom Picking Prohibited, Mould, Mirror, Measures, Marmara, Market, March, Mammoth Tree and the Golden Spurs, Mai Ndombe, Magnifier, Magic Mountain, LIGO, Lemon, Launching a Website, It’s Pouring, Investment, Inflation, Index, Iguanodon, I64.762/EDK/YDW, Hétéroclites, Hitch My Wagon To A Star

What constitutes a 'document' and how does it function?

According to the *Oxford English Dictionary*, the etymological origin is the Latin 'documentum', meaning 'lesson, proof, instance, specimen'. As a verb, it is 'to prove or support (something) by documentary evidence', and 'to provide with documents'. The online version of the *OED* includes a draft addition, whereby a document (as a noun) is 'a collection of data in digital form that is considered a single item and typically has a unique filename by which it can be stored, retrieved, or transmitted (as a file, a spreadsheet, or a graphic)'. The current use of the noun 'document' is defined as '*something* written, inscribed, *etc*., which furnishes evidence or information upon any subject, as a manuscript, title-deed, tomb-stone, coin, picture, etc.' (emphasis added).

Both 'something' and that first 'etc.' leave ample room for discussion. A document doubts whether it functions as something unique, or as something reproducible. A passport is a document, but a flyer equally so. Moreover, there is a circular reasoning: to document is 'to provide with documents'. Defining (the functioning of) a document most likely involves ideas of communication, information, evidence, inscriptions, and implies notions of objectivity and neutrality – but the document is neither reducible to one of them, nor is it equal to their sum. It is hard to pinpoint it, as it disperses into and is affected by other fields: it is intrinsically tied to the history of media and to important currents in literature, photography and art; it is linked to epistemic and power structures. However ubiquitous it is, as an often tangible thing in our environment, and as a concept, a document *deranges*.

the-documents.org continuously gathers documents and provides them with a short textual description, explanation, or digression, written by multiple authors. In *Paper Knowledge*, Lisa Gittelman paraphrases 'documentalist' Suzanne Briet, stating that 'an antelope running wild would not be a document, but an antelope taken into a zoo would be one, presumably because it would then be framed – or reframed – as an example, specimen, or instance'.
The gathered files are all documents – if they weren't before publication, they now are. That is what the-documents.org, irreversibly, *does*. It is a zoo turning an antelope into an 'antelope'.

As you made your way through the collection, the-documents.org tracked the entries you viewed.
It documented your path through the website.
As such, the time spent on the-documents.org turned into this – a new document.

This document was compiled by ____ on 06.02.2022 11:31, printed on ____ and contains 65 documents on 133 pages. (https://the-documents.org/log/06-02-2022-3772/)

the-documents.org is a project created and edited by De Cleene De Cleene; design & development by atelier Haegeman Temmerman.

the-documents.org has been online since 23.05.2021.

Notes

- De Cleene De Cleene is Michiel De Cleene and Arnout De Cleene. Together they form a research group that focusses on novel ways of approaching the everyday, by artistic means and from a cultural and critical perspective.
  www.decleenedecleene.be / info@decleenedecleene.be
- This project was made possible with the support of the Flemish Government and KASK & Conservatorium, the school of arts of HOGENT and Howest. It is part of the research project *Documenting Objects*, financed by the HOGENT Arts Research Fund.

At a dental practice, the white Alligat®-powder is mixed with the right amount of water to get a mouldable dough that is pressed upon a patient's teeth. After thirty seconds, the Alligat®-dough stiffens and takes on a rubber-like quality. At that point, still white, it must be removed from the patient's mouth. Over the next few hours, the mould turns increasingly pink as the substance becomes less humid. Now, it can be used as a mould to create a positive master cast of the patient's teeth.

Outside the dental practice, the powder's possibilities remain to be fully explored.

Depending on the perspective one chooses to look at the address, the house is adorned or not.
The perspective from the main road is an image made in August 2020, the website (Google Maps) says. Our car is in front of the garage. It must be the end of August. We drive home from the hospital with the newborn, who doesn't stop crying. Maybe I tightened the belts in the car seat too much.
Arriving at our house, we see the slogans and decorations friends have hung at our front door.
On the sill of the neighbour's first floor window, there's a brick that must have fallen from the second floor facade.

Today I brought an old bedspring, the styrofoam the air-humidifier came in, a few bags of sawdust and some scrap pieces of plywood to the municipal recycling center. As I was waiting to mount the stairs to the scrap metal container, a gray-haired man wearing blue leather shoes, dark jeans and a checkered shirt was tipping – with relative ease – a weight bench over the edge of the container.

Robert Nemiroff and Jerry Bonnell's lesser known project (R.N. and J.B. being the creators of Astronomy Picture of The Day), was making websites containing over a million of digits of square roots of irrational numbers, e.g. seven. 'They were computed during spare time on a VAX alpha class machine over the course of a weekend. […] We believe these are the most digits ever computed for the square root of seven on or before 1 April 1994.' Elsewhere, R.N. states: 'They are not copyrighted and we do not think it is legally justifiable to copyright such a basic thing as the digits of a commonly used irrational number.' If one wanted to get a copy of the 10 million digits of the square root of the number e R.N. and J.B. computed in their spare time, one can send an email to R.N. at nemiroff@grossc.gsfc.nasa.gov.

org We Welcome Comments

What follows are the first 1 million digits of the square root of 7. Actually, slightly more than 1 million digits are given here. These digits were computed by Robert Nemiroff (George Mason University and NASA Goddard Space Flight Center) and checked by Jerry Bonnell (University Space Research Association and NASA Goddard Space Flight Center). They were computed during spare time on a VAX alpha class machine over the course of a weekend. We do NOT guarantee the accuracy of these digits. Although these digits have been checked once we encourage others to check them as well. We believe these are the most digits ever computed for the square root of seven on or before 1 April 1994. If anyone is aware of more digits we ask them to please alert us of their existence. We have computed at least 10 million digits of the square root of two as well as several digits of the number e and the square roots of other numbers. These are available on this mosaic server (URL: http://antwrp.gsfc.nasa.gov/htmltest/rjn.html). We welcome comments.

- Robert Nemiroff and Jerry Bonnell

The square root of seven =

‘You see?!’

[The man points at the waybill[1] on the floor behind the glass door that closes off the abandoned and dismantled hall.]

‘It used to be here, I’m sure.’

[He looks around.]

‘I’m sure.’

[He turns towards me.]

‘Are you also here for the Leen Bakker?[2] This used to be a Leen Bakker. I just looked it up on their website. They are open from 9 to 6 today.’

[He points at the waybill again.]

‘It was here. I remember well. It’s been years. But it’s here.’

[He walks away.]

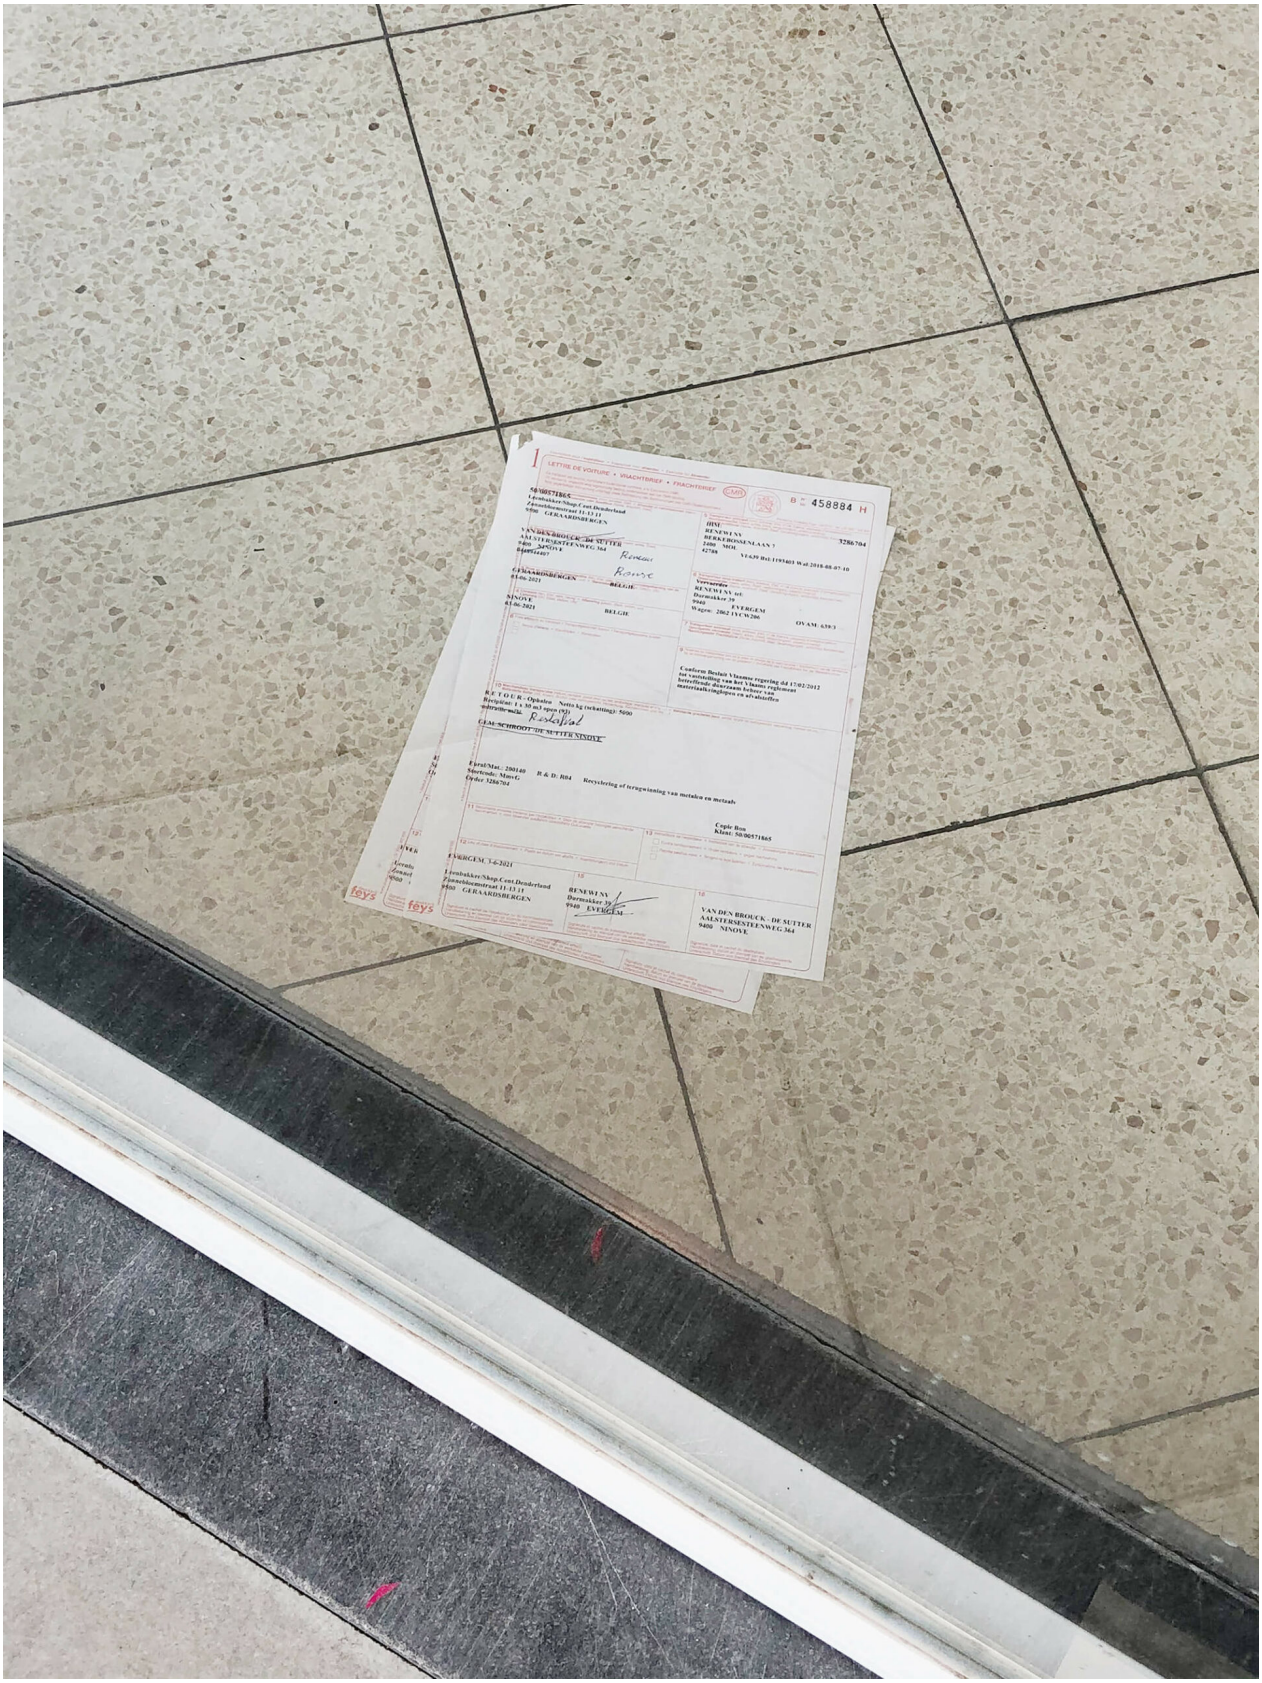

‘I’ll look around.’

Notes

1 The waybill documents the transport of a 30m^3 container filled with approximately 5000 kg of waste from this branch of Leen Bakker to a scrap processing company in nearby Ninove. They take care of scrap, both ferrous and non-ferrous metals. They also have a recognized depollution center for end-of-life vehicles.

2 A chain of furniture and interior stores with branches in the Netherlands, Belgium and the Caribbean part of the Kingdom of the Netherlands.

In the archive of the architect O. Clemminck, there is a piece of a plan of a building in a suburb in Gent. It presents the ground floor. There is a kitchen, a salon, an eating place, a meeting place. The missing part would have stated the exact address, the name, and maybe the profession of the owners. The plan of the first floor might have given an indication of the number of (anticipated) family members, based on the number and size of sleeping rooms.

At the southern edge of (the plan of) the lot, O. Clemminck has drawn a laundry room that gives out to a *vérandah*. The spelling of the Dutch word – nowadays written as *veranda* – is remarkable, as is its etymology, which is unclear and a matter of debate among scholars. The word might have Portuguese (*varanda*: railing) and Catalan roots (*baranda*: barrier), maybe also origins in the Lithuanian Žemaitan dialect (*varanda*: loop plaited from flexible wings) and might also be traced back to a Sanskrit root (*varandaka*: rampart separating two fighting elephants).

The *vérandah* O. Clemminck proposes is 2,40 meters by, at least, 2,80 meters.

In the introduction to her book *Qu'est-ce que la documentation?*, French 'documentalist' Suzanne Briet asks what a document is. In a scrappy scan of her book I found online I am highlighting almost everything she writes. Is a star a document? Briet says it isn't. But the catalogues and photographs of stars are. When I quickly opened the file with Apple's 'Preview' application to check the above paraphrase, the highlighted sentences were illegible.

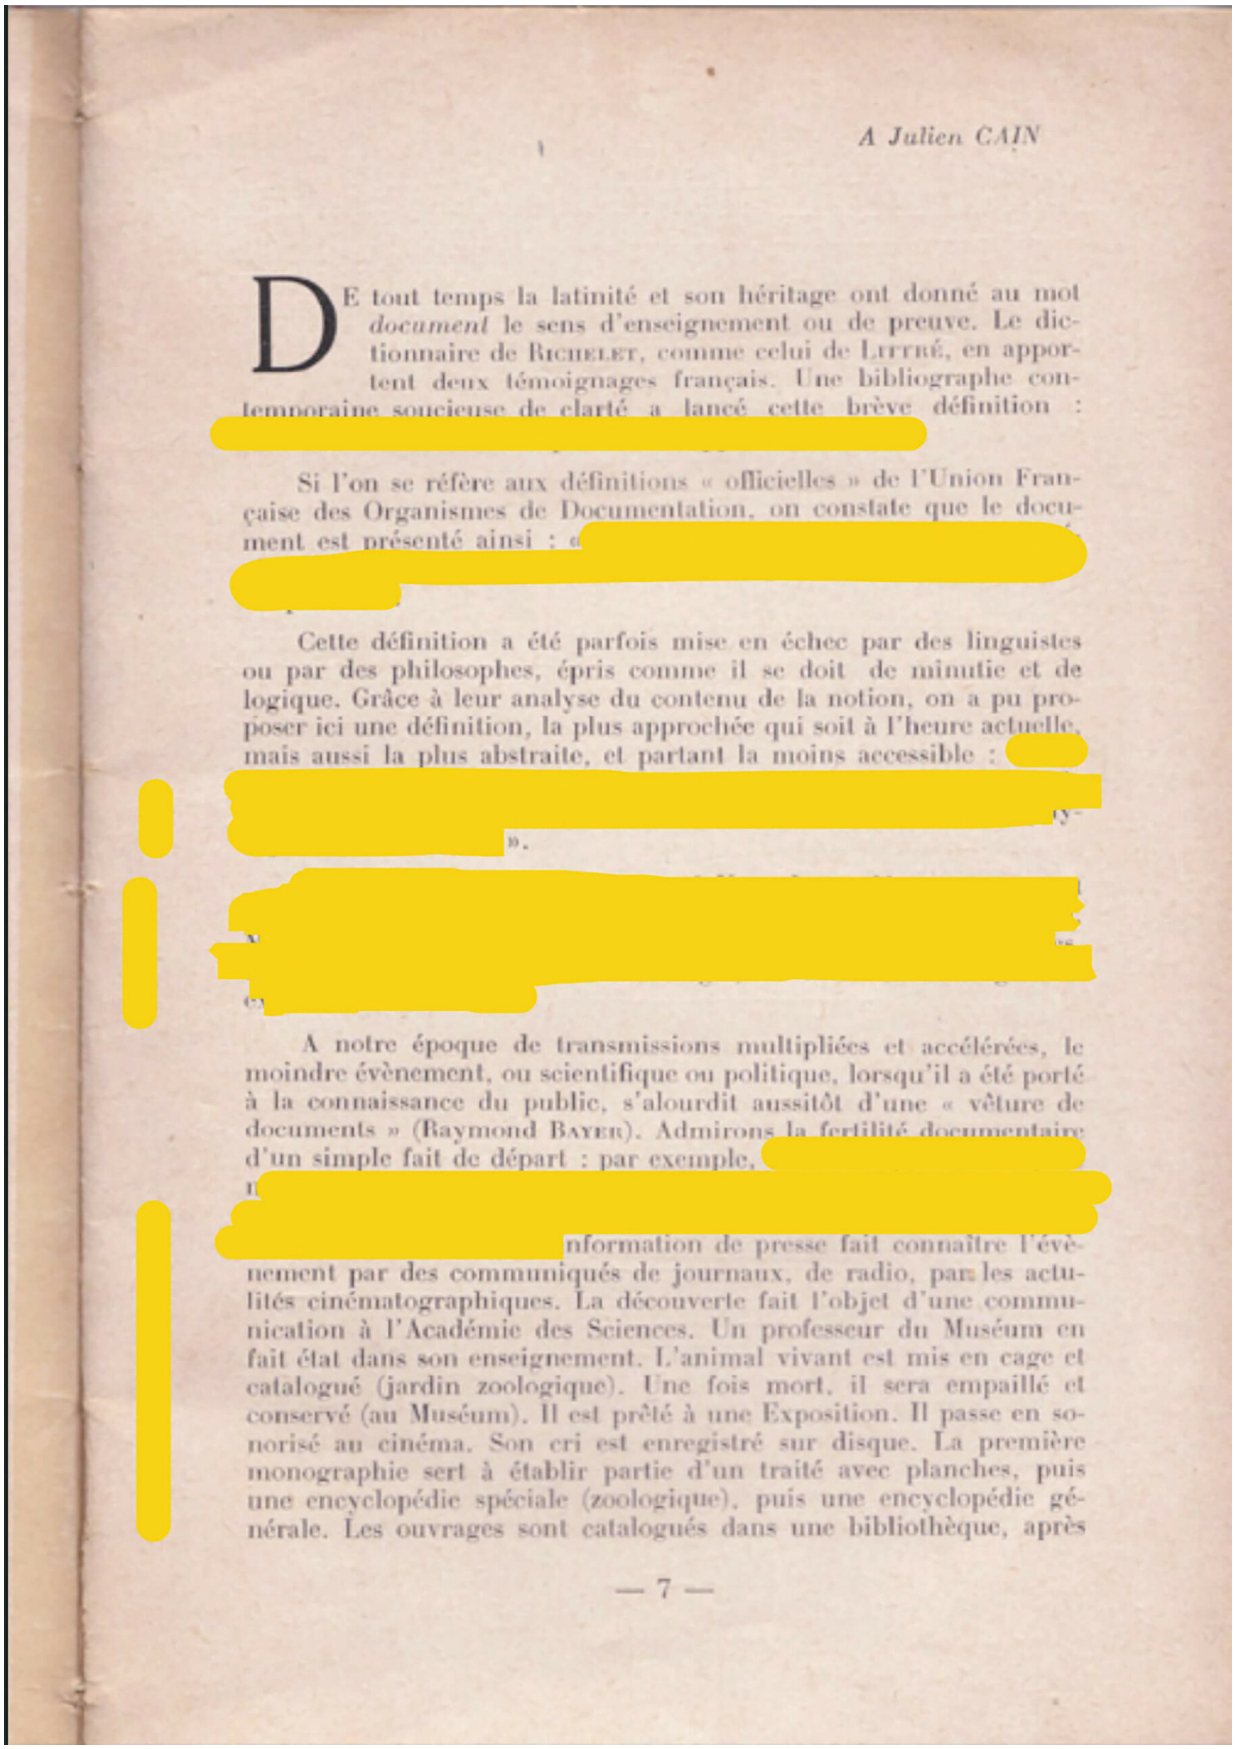

Notes

Briet is cited in Lisa Gittelman's *Paper Knowledge* (2014).

Une étoile est-elle un document?

A Julien CAIN

DE tout temps la latinité et son héritage ont donné au mot *document* le sens d'enseignement ou de preuve. Le dictionnaire de RICHELET, comme celui de LITTRÉ, en apportent deux témoignages français. Une bibliographe contemporaine soucieuse de clarté a lancé cette brève définition :

Si l'on se réfère aux définitions « officielles » de l'Union Française des Organismes de Documentation, on constate que le document est présenté ainsi : «

Cette définition a été parfois mise en échec par des linguistes ou par des philosophes, épris comme il se doit de minutie et de logique. Grâce à leur analyse du contenu de la notion, on a pu proposer ici une définition, la plus approchée qui soit à l'heure actuelle, mais aussi la plus abstraite, et partant la moins accessible :

».

A notre époque de transmissions multipliées et accélérées, le moindre évènement, ou scientifique ou politique, lorsqu'il a été porté à la connaissance du public, s'alourdit aussitôt d'une « vêture de documents » (Raymond BAYER). Admirons la fertilité documentaire d'un simple fait de départ : par exemple,

nformation de presse fait connaître l'événement par des communiqués de journaux, de radio, par les actualités cinématographiques. La découverte fait l'objet d'une communication à l'Académie des Sciences. Un professeur du Muséum en fait état dans son enseignement. L'animal vivant est mis en cage et catalogué (jardin zoologique). Une fois mort, il sera empaillé et conservé (au Muséum). Il est prêté à une Exposition. Il passe en sonorisé au cinéma. Son cri est enregistré sur disque. La première monographie sert à établir partie d'un traité avec planches, puis une encyclopédie spéciale (zoologique), puis une encyclopédie générale. Les ouvrages sont catalogués dans une bibliothèque, après

A white Mercedes van inserts in front of me in a traffic jam near Antwerp. The back of the van has been altered in several ways: a latch was added to the door,[1] a footstep was bolted to the bumper, a couple of tie-wraps are holding up the lights on the left side.[2] Traffic is moving slow. There is no Mercedes logo.[3] Some parts have been retouched with white paint that differs slightly from the rest of the bodywork,[4] not unlike a tipp-ex'ed document.

Notes

1 Maybe the original locking mechanism no longer functions, or, perhaps, the owner wants to add a padlock to the doors at night.

2 Maybe a corroded screw caused the lights to come loose, or a slight collision.

3 Someone might have stolen it. Mercedes stars are often stolen, although mostly from the hood.

4 Maybe to counter corrosion, to conceal a mark someone made on the van or to cover up a fixed dent.

• Legislation concerning the publication of someone else's licence plate on the internet and the demand to blur it, is somewhat ambiguous.

It’s 21:49 on Tuesday May 4th 2021. I’m sifting through the folders of a back-up drive. When I reach Archief2A/2017/wigny donder, the subfolder contains 103 items (97 DNG-files, 1 JPEG-file and 5 PSD-files). The photographs are all very similar. They show the silhouette of the same tree and hills, the red light of the telecommunications mast on the left and the orange glow of the street’s sodium lights. The thunderstorm moves from right to left. _44A3920 is the only exposure (10 seconds) that recorded lightning bolts.

I looked up *heat lightning*, also known as *silent lightning*, *summer lightning*, or *dry lightning*, which is simply cloud-to-ground lightning that occurs very far away, with thunder that dissipates before it reaches the observer. On YouTube I watched: *Top 10 Dangerous Lightning Strikes Thunder recorded on Camera (HIGH VOLTAGE!!)* followed by *Lightning Strikes at the 2019 U.S. Women’s Open*. It’s 22:07, I am doubtful at first but become convinced I can hear thunder afar.

‘Because there is a kind of technological beauty to it.’
[…]
‘Yes, a perfect combination of the analogous on the one hand, and a kind of state of the art-futuristic cool on the other hand. It was elegant (unlike audio-cassettes), you could see the disc upon which your music was written (unlike the unfathomable MP3), it was less fragile than a CD(-R), and conveniently sized (you could hold it in the palm of your hand, slip it into your pocket). It had a kind of Mission Impossible-esque gadget feel to it. It had the aura of being permanently ahead of its time, but not in a far-fetched sci-fi kind of way. It was *real*.’
[…]
‘You mean the clicks. Yes, it had a sound of its own. A pleasant sound – the hard plastic hitting the hard plastic sleeve. The slidable, uhm, metal thing. The small read/write handle at the side. The small disc that was just a little bit loose. It – without being played – looked, felt and sounded like, like data, yes, like palpable data.’
[…]
‘Not any more.’
[…]
‘My uncle’s Elvis Costello *This Year’s Model* LP with way too little bass-sounds. *Watching the detectives*, to be precise.’

Conducting research into the effects on energy consumption of blockchain-based applications such as bitcoin, I was triggered by the fact that many of the facilities making blockchain-mining[1] possible are located in Georgia. Low energy prices and a relaxed taxation policy are said to be among the reasons why companies such as Bitfury locate their plants there.

After a three-day hike in the Caucasus Mountains, on the Georgian side of the border with Chechnya, we are invited to pitch our tent in the garden of Murati, a local farmer in a small mountain village. We are overwhelmed by the scenery and Murati's hospitality. Many of the villages, thrown on the mountain flanks, have tower-like structures of some twenty meters high, making them all look fortified. They have no windows or doors on the ground floor.[2]

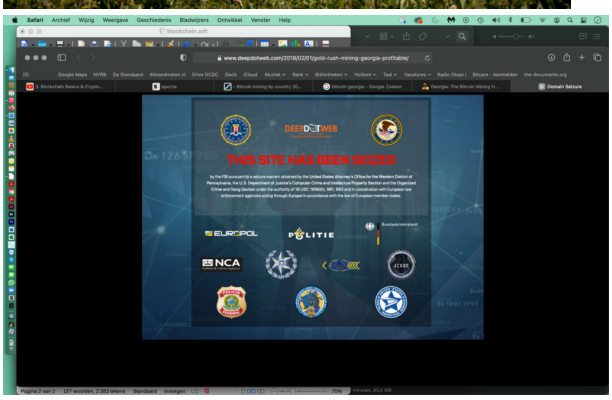

Murati invites us into his house to drink warm milk with his family and brings us cheese-filled bread. One of us speaks Russian. He inspects our backpacks, headlights and drinking bags. He tells us a 500 kilogram pig of his did not return to the house that night. The family is saddened.

In the evening, we see him taking his granddaughter by the hand. They walk to the highest point of the gravel road in front of his house and together watch the last light of the day fall on the snow-covered triangular peak of one of the Caucasus' highest mountains.

I'm mistrusting my memory and look the passage up in the journal we kept. The village is called Zagar. The mountain is Mount Tetnuldi. The granddaughter's name is Anna.

When I click through to one of the websites promising information on Georgia's blockchain economy, I happen to stumble on a dark web-related website and access is denied.[3]

Notes

1. 'Mining' is what is being done when data – a transaction – has to be added to the blockchain (which, in itself, is the sum of all previous transactions, added to each other as data). To do this, computers have to solve a complex mathematical puzzle, which is crucial for the trustworthiness of the system, but for which loads of energy is needed. Criticism on the effects of blockchain-mining is growing, as it has a gruesome effect on resources. In 2018, Andrew North writes, Bitfury used 28 million kilowatt-hours of electricity per month, equalling the consumption of 120,000 Georgian households.

Article 75 of the Royal Decree containing general regulations for road traffic and the use of public roads, published in *Het Belgisch Staatsblad* on 9 December 1975, lists the rules for longitudinal markings indicating the edge of the roadway.

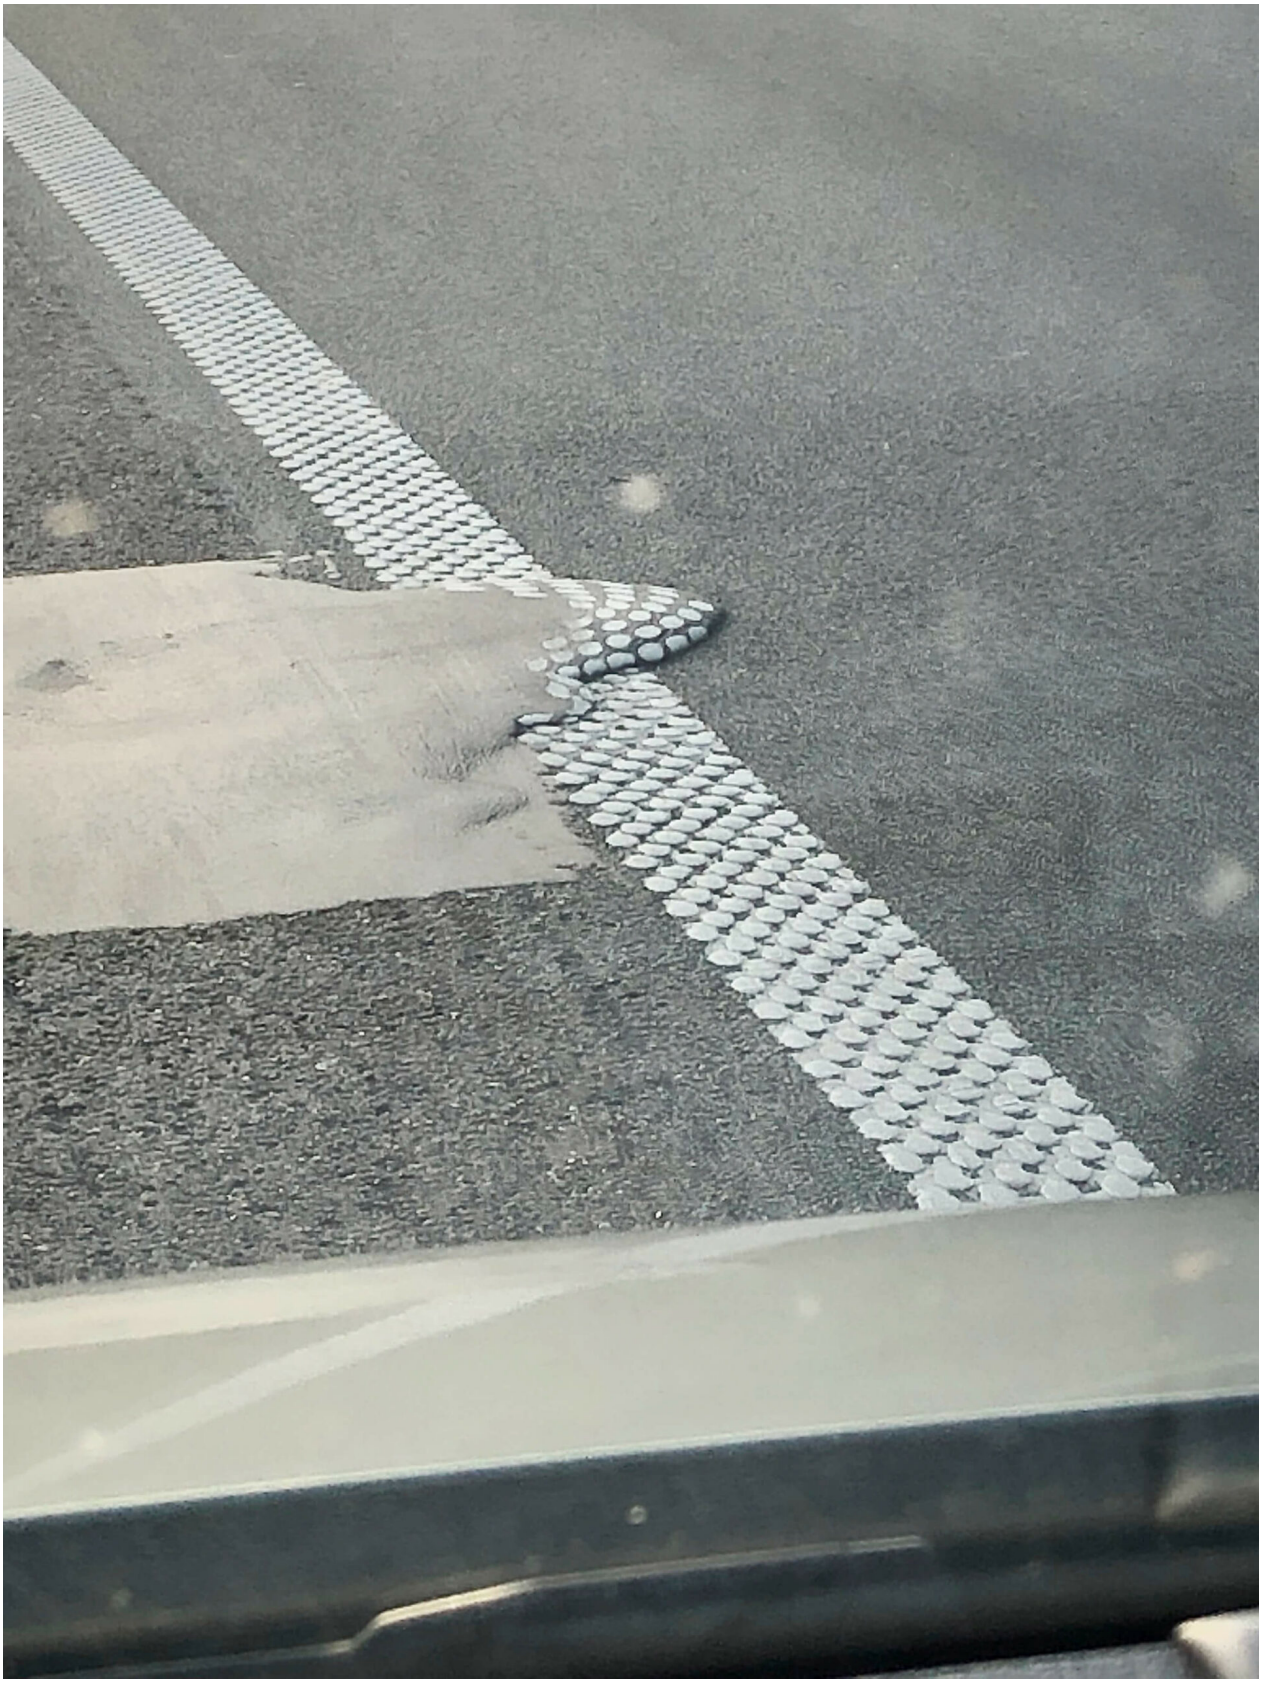

According to 75.1, there are two types of markings that indicate the actual edge of the roadway: a white, continuous stripe and a yellow interrupted line. The former is mainly used to make the edge of the roadway more visible; the latter indicates that parking along it is prohibited.

In 75.2, the decree focuses on markings that indicate the imaginary edge of the roadway. Only a broad, white, continuous stripe is permitted for this purpose. The part of the public road on the other side of this line is reserved for standing still and parking, except on motorways and expressways.

A year ago, mid-August, just before sunrise, the mostly unlit office buildings line the road that leads to the underground parking. I turn off the ignition. I'm in F36. The walls are painted pink. Looking for the exit, I take the escalator and get stuck in an empty shopping mall. The music is playing but all the shops are closed off with steel shutters. So are the exits. I'm out of place. In keeping early customers out, the mall is keeping haphazard visitors in. I'm back in the parking lot. The elevator is broken. I take the stairs and walk by a homeless man, sleeping. There's shit on the floor. I open the door that leads out of the stairwell. It slams shut behind me. There's no doorknob. I find myself on a dark floor between mall and parking lot. People are sleeping; some are awake. Heads turn toward me. I start walking slightly uphill towards where I think I might find an exit, or an entrance. The scale of the architecture has shifted from car (F36) and customer (the closed mall) to truck. I find myself amidst the supply-chain. It takes five minutes, maybe fifteen, maybe more to get out and see the office buildings towering over me in the first light of day.

All chairs are empty, but all face something different. The bottom photograph shows empty chairs facing empty desks. In the middle picture, empty chairs face each other (underneath the inaudible sound of the cinema above). In the top photograph, the chairs seem to be facing the photographer. However, the altar's in front of the photographer. He stands at the back of the provisional church. The chairs face the photographer and have turned their backs to the altar.

11:30:29

09:10:00 The frame shows the first movement on the terrain. The gate has been opened, the barrier lowered. A black car is in the back. In the forefront, aviation signs on the ground: a yellow cross on a surface painted red; an arrow in a 90° angular shape; two circles connected by a line; a T-shaped line.

09:20:00 Two men talking, each one on one side of the barrier. The man on the side of the airstrip has two dogs with him. The aviation signs have changed: the arrow is gone; the horizontal bar of the T-symbol has moved to the other side of the vertical line; one yellow line that made up the cross on the red surface is gone, leaving one yellow diagonal line.

10:09:01 A small white aircraft (the two men and the dogs are gone).

10:20:01 The aircraft in the same position, with what seems to be an open roof.

10:40:00 Aircraft leaving the gas station where it was before.

11:10:01 A white car at the gas station, where previously the aircraft was stationed; a silhouette of a man, perhaps.

11:30:01 White car gone.

11:50:01 Small white aircraft at the gas station; man in red jacket next to the aircraft. Not clear if it is the same aircraft seen in frame 10:09:01.

12:10:01 Aircraft appears to be heading for take-off.

12:20:01 Aircraft gone.

12:40:01 White dots on the grass that appear to be birds.

14:10:00 First precipitation: snow, visibility lessens.

14:20:00 More snow, wind is stronger; someone has replaced the yellow stripe so that, again, a yellow cross is formed on the red background.

15:10:00 The grass and the concrete get increasingly white. No aircrafts, vehicles or persons can be discerned. The aviation signs beneath the thin-layered snow are still visible, and unaltered.

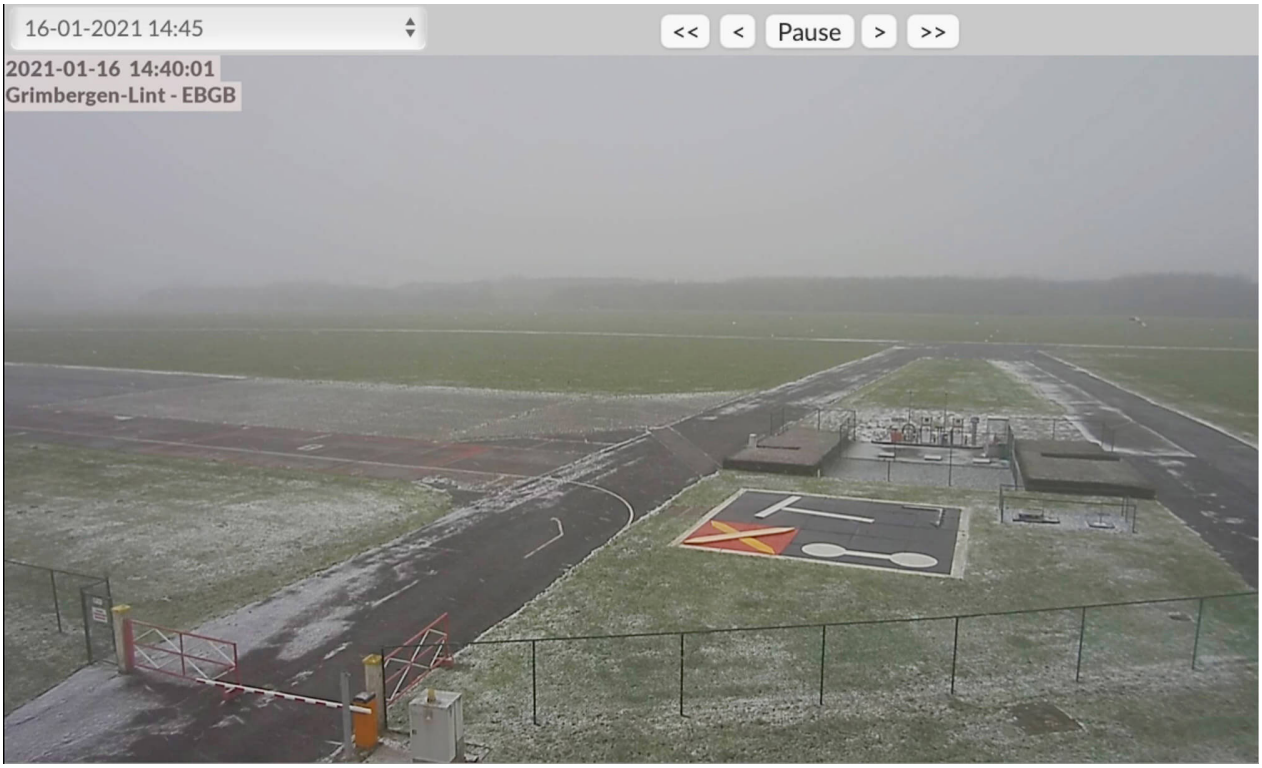

Notes

Every so often architects ask me to photograph projects of theirs under a blanket of snow. Snow-days are rare around here. In an attempt to avoid a futile drive along roads in winter conditions, I check webcams near the project-to-be-photographed before setting out.

This is the spread one sees upon opening the bird field guide that once stood, as the stamp indicates, in the library of a psychiatric institution.[1] It shows birds' silhouettes, as they can be seen beside the road.

The drawing has a kind of Hitchcock feel to it.[2] The birds seem to be spying on each other, as they also seem to be spying on the unsuspecting passer-by.

The composition of the scene is marvelous. The electric wires, the tree, the wire fence, the double framed list with the birds' names, handsomely positioned in a birdless patch, at once superimposed on the telephone wires, and pushed to the background by the skylark.

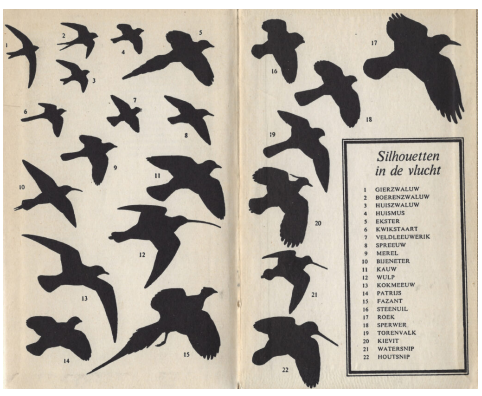

Imagine seeing this scene. What are the odds: to see the silhouettes of Europe's twenty most common species of birds in one glance, from your car's window, as you are driving home at dusk.

Before closing the book, the last spread seems to show the birds fleeing, maybe attacking.[3]

Notes

1 The stamp indicates that, at the psychiatric institution, the book was part of the sublibrary for the Catholic Brothers of Charity. The crossed-out part indicates that there was also a separate physicians' library, to which the book might have originally belonged.

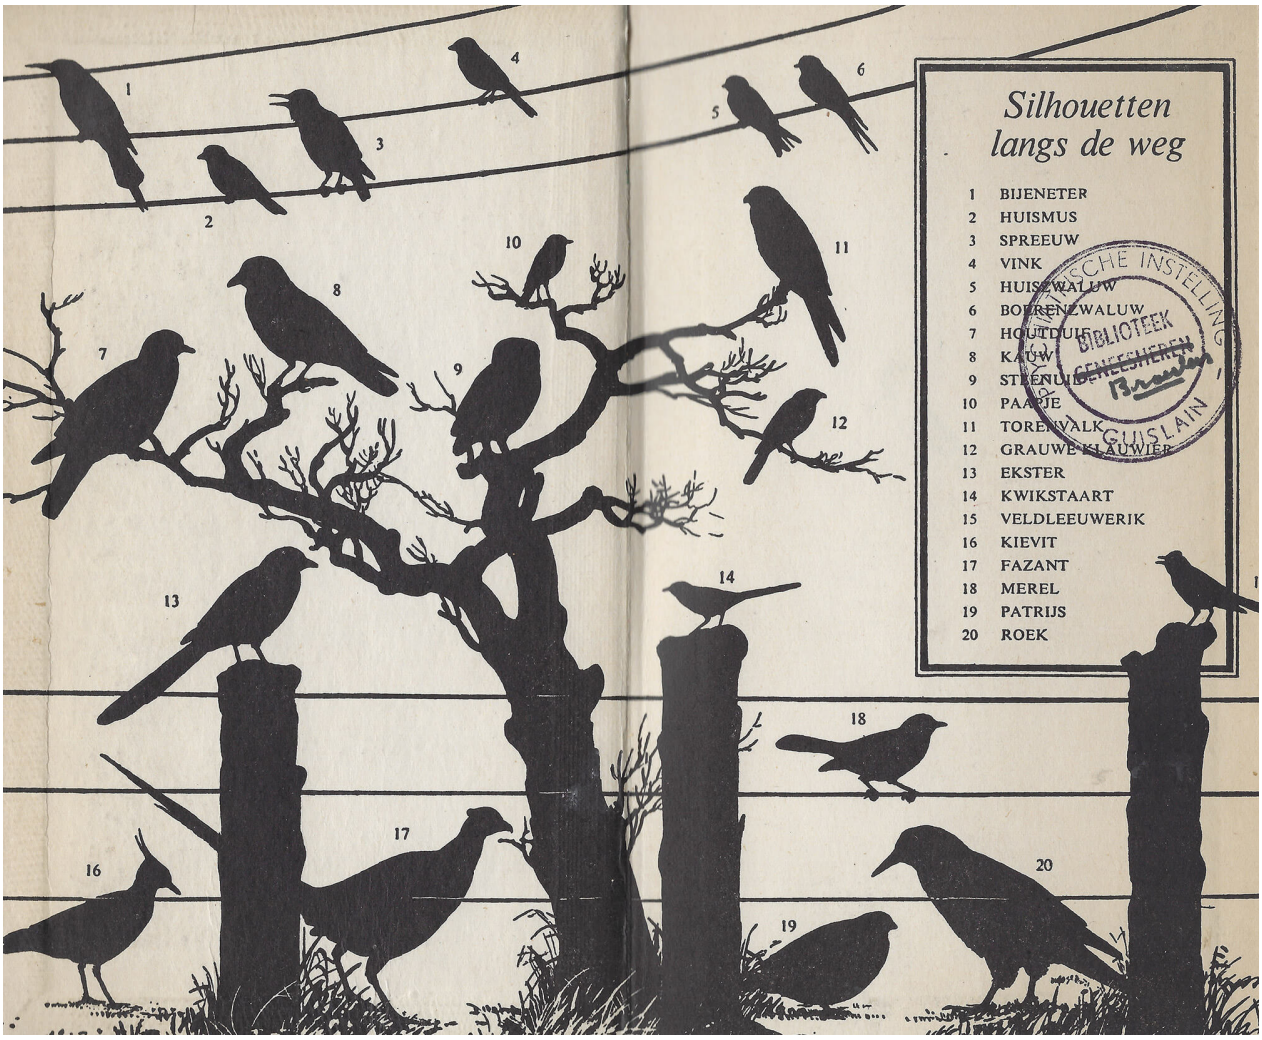

2 On the web, discussions on whether Alfred Hitchcock's *The Birds* (1963) was shot in colour or in black and white, abound.

The Authenticity bunkered crude fuel in the Panama Bay. She navigated back and forth between the artificial island Isla Melones and ships leaving or waiting to enter the Panama Canal. On February 14th 2015 she had been moored for a couple of days near the Centennial bridge when the AIS-transponder momentarily signalled the ship's position in the woods of the Bosque Protector de Arraiján. Afterwards no signal of the ship was received for 41 days, until she reappeared near the port of Bahia Las Minas, at the other side of the Panama Canal.

The weeds and bushes on what over the years has become savanna are being chopped to clear the ground to replant trees and reinstate the forest. During the dry season, forest fires are frequent. In between the future lots of planted trees, firebreaks are made to keep fires from spreading. Wires are used to measure the required distance between plant beds and to keep a straight line. The sun is sinking. In a bit, the workers will return home and the field will empty out. In a couple of years, the Acacias, Ebben trees, Millettia laurentii and Umbrella trees will testify to the strings.

On a pile of fresh hospital sheets, near the radiator, the tangerine curtains and the black marble window sill (the window looks out over the parking lot), underneath the two-day-old bouquet of flowers and next to a pile of magazines with a handwritten note on top (about a syrup that relieves slime and tastes like oranges), lie two sheets of paper.

Earlier that day the physiotherapist had come by. Twice. Once in the morning and once in the afternoon. He had each time drawn the first line, as an example. A straight line in the morning, a curvy line in the afternoon.

With a ballpoint pen my grandfather, who is recovering from an accident, diligently copied the examples (31 in the morning, 5 in the afternoon).

Straight in the morning, curvy in the afternoon

It must have been four or five years ago, that I noticed the change in Tabasco's® up until then stable, unchanged and thus kind of unfashionable presence in supermarkets (vinegar section). On one of the box's sides, there had always been a photograph of a man, clipboard in hand, looking upwards to a huge wooden barrel full of Tabasco®. He was inspecting something, from the outside, writing it down.

A couple of years ago, the man disappeared from the packaging. I think he was replaced by a pizza (as one of the suggestions for using Tabasco® on, besides on hashed meat (with an egg yolk, fries and lettuce) and spaghetti bolognese) or a black-and-white image of a part of an oak barrel. It is unclear who is inspecting the barrels now.

Until recently, for as long as I could remember, the packaging of Tabasco® Pepper Sauce had been unchanged. On the front of the packaging, there is a photograph of a bottle of Tabasco®, scale 1:1, against an orange background.As far as packaged goods go, this is a highly idiosyncratic and quirky example.

The background colour approximates the colour of the liquid inside the bottle, resulting in as good as no contrast. Moreover, as the image of the bottle is scale 1:1, the packaging becomes kind of unnecessary and superfluous, also because the life-sized image of the bottle is the only way information is given to the customer: there are no additional slogans, no repetition of the brand name, no props and no decor. The image of the bottle advertises the bottle. It seems to add nothing the bottle could not do by its own (like a bottle of wine does).

What makes the packaging truly stand out, however, is the fact that the image of the bottle is not positioned vertically, but is slightly askew. It seems to be the result of a design error, and has an amateur feel to it. The decision to keep it as such and not correct it up until today, is, however, a stroke of genius. The non-vertical positioning alters the relation of the image of the bottle to the bottle inside: as the box is standing on a shelf, the tilted image of the bottle undermines its representational superfluousness.

Yesterday I had my shoulder checked by a radiologist. He took an ultrasound and saw some minor inflammation of my right subscapularis.
After giving me some advice – ‘we could give you a shot of cortisone in the shoulder. It would relieve you from your pain for six weeks and then, without proper exercise, you’d be back where you are now’– he walked towards the door. ‘I propose you do this exercise thirty times, three times a day.’
The radiologists put his right hand on the doorframe, his arm stretched, the weight of his body on it and then leaned forward and back again, while keeping his arm stretched. ‘This will increase the muscles around the sore subscapularis. It will take months.’ After giving me his advice, he sent me back into the dressing room. I put my shirt back on and went into the waiting room. The nurse called out my name, charged me 14,00 EUR and gave me a card. ‘This code will allow you to look at the images of the ultrasound at home’, she said.

Today I entered the code and password and – instead of my shoulder – found the röntgen-images of someone else’s broken heel.

The paths in the valley of the Bayehon are covered with ice. We are making our way down towards the valley of the Ghâster. The temperature is minus 15 degrees Celsius. The water in our drinking bottles is frozen. We are betting on the shelter indicated on the map (*Au Pied des Fagnes, Carte De Promenades,* 1:25.000, Institut Geographique National) to pitch our tent. There is almost no wind, but every breath of air feels like we're being hit with a thousand needles. What the map indicates as a shelter appears to be a picnic table.

11:30:34

Halfway March my dad started finding empty clam shells on the banks of the Zuidlede along the pasture where he used to herd sheep. He had never seen this type of clam before. There were easily seventy of them along a hundred metre stretch of riverbank.

He brought two specimens to someone he knows in the neighbouring provincial domain. She would look into it, she said, and that she would probably pass it on to someone at the educational department.

Yesterday he (my dad) received a printout of the Dutch wikipedia-page on the Brakwaterstrandschelp (Rangia Cuneata). On the page Paul (who sends his regards at the bottom of the document) traced around the scallops with a blue ballpoint pen.

My dad added in capitals – also with a blue ballpoint pen – that the Rangia Cuneata is an invasive species, native to the Gulf of Mexico. The first time it was observed in Europe was in Antwerp in August 2005, most probably they reached Europe in the ballast water tanks of large ships.

On May 23rd 2021, the planet Saturn appears to be stationary among the surrounding celestial bodies in the night sky.[1] This is an attempt to capture this planetary standstill.[2]

A telescope is set up in a pasture, near a forest edge, pointed to the south-southeast morning sky.[3]

Notes

1 The standstill is de facto inexistent. It's the moment when Saturn's apparent prograde motion turns to a retrograde motion. Since Earth completes its orbit in a shorter period of time than the planets outside its orbit, it periodically overtakes them, like a faster car on a multi-lane highway. When this occurs, the planet being passed will first appear to stop its eastward drift, and then drift back toward the west.

2 In astrology, Saturn's retrograde movement is generally a time of karmic rebalancing. Previous bad behavior could be punished. But hard work and responsibility could also be rewarded.

3 This is the third instalment of De Cleene De Cleene's Public Observatory. Thanks to Volkssterrenwacht Mira, Grimbergen.

A square photograph with an Arabic and French text underneath it is mounted on a foam board, in turn mounted on a sheet of plexiglass. The picture in the middle is flanked by a photograph of and a text about the tumuli of Umm Jidr (left) and the excavations at Abou Saybi (right). They are mounted on the West wall of Guest Room 3 at the Qual'at Al-Bahrain Site Museum, Seef, Bahrain.

Necropolises make up the main archaeological testimonies of the Tylos period (4th century BC – 3rd century AD). The urn in the photograph contains the remains of several babies. They most likely fell victim to an epidemic. The size of the ruler next to the urn remains unspecified.

Notes

The photograph of Room 3 was made while in mandatory self-isolation after flying to Bahrain from Frankfurt and waiting for the result of a Covid-19 test.

11:30:36

The torn off section of roofing on the grass has part of a text carved in it: ‘UDI’ and ‘EN’ are still legible. It must have come from another roof; the one shown in the photograph has no missing sections, nor visible repairs.

The roofing that is still on the garage shows a drawing of some kind. A floorplan for a squarish building with a supporting column along each side, or the layout for a tactical explanation, perhaps.

Roofing (5) – UDI

11:30:36

A carving that looks like a stitched-up scar (a long, slightly curved line crossed at a right angle by eleven short straight lines) is inserted into a short statement about Celine and Logan. An initial of Celine's last name is included. At first sight it looks like a 'D', but the line through the middle might just as well make it a 'B'. Maybe it was Celine D who added the line in an attempt to convince those reading the roofing that it's actually Celine B who blows Logan.

Roofing (4) – Celine & Logan

11:30:37

In what order and by whom the various texts and drawings were carved into the soft roofing is unclear. To the right of ‘EVA’, a heart symbol and an arrow (pointing to the left), the roofing reads ‘SIMON TU ME MANQUES’.

The short sentence usually – yet hastily – translates to ‘Simon, I miss you’. However, in French the ‘you’ (tu) is the subject and has an active role, whereas the ‘I’ *(me)* is the direct object. In short: by his not being there, Simon actively effectuates hurt to the one who carved this text.

Roofing (3) – Simon, tu me manques

11:30:37

Five white boulders close off a shortcut for motorists who attempt to cut the bend in the road. The southernmost roof’s pitch runs opposite to the landscape’s slope. The lower roofline is, therefore, only about one meter above a small, triangular patch of grass which is hidden from view by a hedge. In summer, when the roofing gets hot and soft, text and drawings get pressed or carved into it.

Seven very similar and rudimentary buildings take in a trapezoid plot of land in Gilly. They are located between the school on the Rue Circulaire and the houses along the Rue de l’Abbaye. The structures are built of orange brick, concrete structural elements, whitish steel gates and roofing. Every garage has its own number, hand-painted in white on the concrete lintel above each gate. In summer the roofing gets hot and soft.

When I grew up, my parents told me that the number of raisins in the local baker’s raisin bread attested to the result of the most recent soccer match of KAA Gent. A victory was celebrated by throwing more raisins into the dough than usual, a loaf following a painful loss was hardly a raisin bread at all.

The baker retired long ago. Today my two-year-old son picked out all the raisins from his slice of bread. KAA Gent’s last game was a tie against Union.

On May 6th 2020, 14h06 and 31 seconds, the Belgian Seismological Institute records an earthquake with a 1,7 magnitude in the region of Braine-Le-Compte. Three reactions from people in the neighbourhood, filed by the Institute, confirm the official seismological recordings. The Institute's website classifies the earthquake as a 'quarry blast'.

The *Sedum reflexum* grows on rocky soils and in crevices of walls. In *L'herbier classique*, it is depicted in two ways, just like the other plants in the book. This double portraiture is important, the author states in the introduction: 'one consists of the reproductions of the photographs taken by the author of this book […]; the other, drawings made by excellent artists who observed the plants themselves, showing details photography can't reproduce, highlighting aspects the photographs leave untouched. […] From this double representation, interesting comparisons can be made, highly enlightening from an artistic point of view, between the realistic aspect of nature's "productions" and the interpretation thereof by the draftsman' (5).

A detail not covered by the drawing of the *sedum reflexum*, is the presence of other species in the vicinity of the plant, a detail shown in the photograph and described in the caption:
'The Common houseleek grows on the same rocks, with its rosette of leaves pretending to be an artichoke' (59).

Pretending to be an artichoke

58 HERBIER CLASSIQUE

CRASSULACÉES Orpin

16. — L'Orpin réfléchi (*Sedum reflexum* — *Sedum*, du latin *sedere*, s'asseoir, parce que beaucoup de ces plantes ont des tiges rampantes qui se redressent dans leur partie supérieure, formant un angle droit ; elles sont comme assises sur le sol).

Fig. 75. — Orpin brûlant. *a*. Fleur.

Herbe vivace, de 10 à 40 centimètres de haut, à *feuilles épaisses* (*plante grasse*), renfermant une provision d'eau qui permet à la plante de supporter longtemps la sécheresse sur les rochers ou dans les fentes des murs. Certaines tiges ne portent pas de fleurs et se terminent en cône renversé.

Fleurs élégantes, délicates, pédonculées, groupées en cymes dont les rameaux sont d'abord recourbés, *réfléchis*, vers le bas, puis se redressent plus tard. Calice ayant de 6 à 8 sépales libres. Corolle d'un jaune superbe formée de *6 à 8 pétales égaux, libres*. 12 à 16 étamines. *Ovaire libre formé d'autant de carpelles séparés qu'il y a de pétales*. Chaque carpelle se transforme en un fruit sec s'ouvrant par une seule fente (*follicule*). L'Orpin réfléchi fleurit de juillet en août dans les lieux secs, sur les rochers, sur les toits, entre les fentes des murs et à leur sommet.

Usages. Sert en horticulture pour orner les rochers artificiels, les vases des jardins, pour garnir les poteries suspendues. Comme tous les Orpins, il renferme un principe âcre qui l'a fait longtemps employer, en médecine populaire, comme vomitif. Il est peu recommandable pour cet usage.

Espèces voisines. Très nombreuses; toutes fleurissent, comme la précédente, au cœur de l'été. L'*Orpin brûlant* ou *Poivre de muraille* (*S. acre*) [*fig. 75*], à fleurs jaunes à 5 pétales, à feuilles cylindriques, courtes, rapprochées. L'*Orpin blanc* ou *Raisin-de-rat* (*S. album*) a des fleurs blanches à 5 pétales, des feuilles allongées, écartées. Ces deux espèces vivent sur les rochers. L'*Orpin reprise* (*S. telephium*) vit dans les bois humides et atteint 60 centimètres. Il a des racines renflées, des feuilles dentées, de jolies fleurs roses très nombreuses. A joui autrefois d'une grande réputation pour la *reprise* des plaies.

DESCRIPTION DES ESPÈCES 59

Fig. 76. — L'Orpin réfléchi.

(*Sur les mêmes rochers croît la Joubarbe des toits, dont la rosette de feuilles simule un artichaut.*)

A Sunday stroll near my parents' house. Along one of the roads between the fields, old poplars have been felled. Young trees have been planted. Each one has a baby blue coloured label, identifying them as Poplar tree, and, more specifically, the 'Vesten' cultivar. This cultivar is planted since it is one of the cultivars known for its resistance with regards to bacteria, diseases and insects. The tags on the trunks have staples keeping them together. They're like bracelets. Come spring, the expanding diameter of the fast growing poplar species' trunk will tear them apart.

As a result of intense drainage of drinking water, an area around the Belgian city of Waver was designated as having a potential for land subsidence – the downward movement of the soil over an extended period of time. People in Waver were startled to find their town mentioned in an international study published in *Science*. Flemish newspaper *De Standaard* uncovered that the researchers had used an older study, published in 2005, which claimed that the soil in Waver had moved some five centimeters in a period of eleven years. Pictures of fissures in Waver-facades had been added to the original article.

Last year, cracks in our living room wall were covered up by placing plasterboard in front of the plastered brick wall. As such, we avoided having to paint the wall with the cracks and the marks left by the IKEA Billy bookcases.

The 48-inch Oschin Schmidt, a renowned reflecting telescope at Palomar Observatory, California, was used for the Palomar Observatory Sky Survey (POSS), published in 1958, one of the largest photographic surveys of the night sky.

Based on the man’s pipe shadow’s direction, thrown onto the telescope, there is reason to believe an off-camera flash was used to make the picture.

At the Tunis Institut National du Patrimoine, the sand-covered floor has traced Anne Teresa De Keersmaeker's movements to Steve Reich's *Violin Phase*. The venue empties out. It is dark and the way back to the hotel through the medina is labyrinthian and eerie. It has been a couple days since we arrived, and I have managed to make a mental image of the inner city by memorizing some waymarks – intersections, buildings, shops – coupled to a direction. Sometimes, a newly entered street would give out to such a waymark – a peculiar sensation: a flash of spatial insight, like a crumpled ball of paper unfolding. The narrow streets turn and turn. Some passages are closed at night. I must improvise a route, but the basic mental structure to do so is missing. Shopkeepers have moved their goods inside.

I have no sense of orientation. I can't estimate distances nor can I tell north from south. Everything is scaleless. My highly simplified scheme of the city's layout gets us to our destination. The functional interpretation of Tunis differs completely from the actual Tunis. It is a different city we crossed, and made while crossing.

On the second to last day of a research visit at CERN, there was some spare time in the schedule. I took a long walk towards building 282 in search of some excavation samples: cylindrical pieces of rock that were preserved when the tunnel was dug, glued to a block of wood and frequently exhibited in museums over the last three decades as material evidence of the earthwork and as a witness to the depth. The route led me along the back of building 363 where the wind caused young trees – now gone – to scuff the facade over time.

On Wednesday, May 9, 2018 at 2:23:14 PM Koh Elaine starts the thread *original or original copy* on the The Free Dictionary by Farlex's forum.

> 'Is "original copy" correct or should it be "original"? Thanks.'

The seventh reply to Elaine's question is Wilmar's on Thursday (his was preceded by towan52, georgew, NKM, Koh Elaine, Sarrriesfan, ChrisKC, Ashwin Joshi).

> 'An original copy IS the original.
>
> Folks usually call the document first created the original, but some will say original copy. If I run that original thru the copy machine, I end up with two copies (yes, I said copies) of the same thing – the original and the duplicate of it (in terms of content). This is how the term is commonly used.
>
> If your writing or conversation depends heavily on understand the difference, I would recommend using the terms original and duplicates. There are many times when that is very important, in that the original must be retained by a particular party, and the duplicates are marked as such and distributed or stored as required depending on the document and the circumstance.
>
> If you are just trying to make sure that you have enough copies to distribute to everyone at the company meeting this afternoon, use whatever terms trips your trigger. But, if you want to ensure that you keep custody of the original, so that you can make additional duplicates (copies) when additional people attend, then be more specific about the words you use.
>
> OH, and, please, in the future, include some context with your question. Asking if "word" is correct doesn't go very far in supplying a reasonably useful response.'

During the 1950s, as part of the communist reconstruction, a large coal/gas power plant was built close to the village of Inota, Hungary. This is the place where I grew up. It operated until about 1994. In the run-up to the final shutdown of the operation they gradually lowered its output. By this time the coal mines in the neighboring city had shut down as well due to the diminishing yield of the low-quality brown coal they had mined for the purpose of fueling the power plant. This resulted in mass unemployment and general decline in the area. The small lake in the photo is an artificial reservoir that collected all the water from the nearby streams. The substantial flow of one of those rivers powered about 11 water-driven flour mills; I know this on account of my grandmother, who would often pick up bags of flour for bread.

The ruin in the photograph once was a pumping facility that drove the water from the lake to the power plant about 3 kilometres away. In the years following the systemic change of Hungary and its celebrated evolution towards a western-type capitalism in ‘89-’90, the rules of ownership and the perception of public and private property were somewhat elusive. The lack of state control resulted in a transfer of public property to private hands on a monumental scale throughout the whole country, and – by extension – the Eastern Bloc. At the time some of the village dwellers of Inota, driven by the force of a major change and the prospect of a new, prosperous future of capitalist entrepreneurship, gathered to disassemble the water-pumping facility along the artificial lake. Slowly, day by day, under the mist of this elusive moment, they carried away carriageful after carriageful of bricks, disassembled from the facade of the building. It was perhaps a way of taking revenge, but certainly also claiming the moment’s opportunity. The bricks made their way into the walls of the new-built family homes of some of the villagers. The former water pumping facility became a sort of material reservoir for the construction of a new future. The transformation from a water reservoir to a material (and ideological) one and its subsequent exhaustion, left a ruin that has remained untouched for the last 30 years. The bricks that were difficult to reach were left in place, thus forming a curtain around the upper part of the building just above the pillars. Freed from all perimeter walls, the leftover structure appeared as a pavilion-like, open floor plan.

Notes

- The cliffs at the sides of the valley on the photo served as the location for the film *My Way Home* (Így Jöttem, 1965) by the iconic Hungarian filmmaker Miklós Jancsó, about a 17-year-old boy who falls prisoner to the Russian army and forms a friendship with one of the foes. The film is said to display all the main themes of the director: the psychological presence of landscape, the randomness of violence and the arbitrary nature of power.
- In the distance a formation of meadows can be seen in the photograph. Those meadows make up 16 acres of land that were given to my grandfather and subsequently inherited by my mother. It was a reparation for having been stripped of their wealth by the Soviet establishment in the 1950s. The worth of the land is a couple thousand euros as of today. It is part of the largest consistent nature reserve area of the EU.
- While standing on the cliffs and looking south-eastward, the power plant can be seen. The orientation of the photograph is approximately north facing.
- Turning southwards one can see the stone cellar, about a kilometre away, where my grandfather’s adolescent sister had spent more than a year, while two German SS officers occupied their family home. During the advancement of the Red Army, a Russian soldier, entering the cellar, attempted to take advantage of her. The soldier’s superior intervened and shot him in the head without hesitation. My parents store potatoes and apples in the cellar to keep them from rotting in the summer and freezing in the winter. It is easy to say when a potato or an apple comes from the cellar; it has an unmistakable, musty taste.

I must have driven past this rocky landscape about sixteen times, going back and forth between viewpoints and the house the parents of a friend let me stay in. On the last day, I left early for the airport, pulled into a lay-by, took my tripod and camera out of the trunk of the red Volkswagen Polo rental car and made two photographs.[1] It was only when I got home, had the film developed, scanned it and was removing dust particles from the file, that I discovered the hand painted text on the rock: ‘PROIBIDO BUSCAR SETAS’.

At a dental practice, the white Alligat®-powder is mixed with the right amount of water to get a mouldable dough that is pressed upon a patient's teeth. After thirty seconds, the Alligat®-dough stiffens and takes on a rubber-like quality. At that point, still white, it must be removed from the patient's mouth. Over the next few hours, the mould turns increasingly pink as the substance becomes less humid. Now, it can be used as a mould to create a positive master cast of the patient's teeth.

Outside the dental practice, the powder's possibilities remain to be fully explored.

On the online thrift shop 2dehands.be the homepage generates a ‘for you’ section. On November 9th this section listed, among other things, a picture of the sky on a patch of concrete. On closer inspection, it became clear that it was the sky’s reflection in a mirror with a red frame and four lightbulbs in it, the kind you might see at the hairdresser’s or backstage in a television studio or theatre. The seller estimates the mirror’s current value to be 45,00 EUR. The listing includes five photographs. In the fifth one, the object for sale reflects a bucolic landscape: a blue sky, white clouds, some trees and a fragment of a barn.

Besides the scale indicating the length in centimeters, and the marks made by using it, a folding ruler displays other marks. These are the marks found on the *weber broutin www.weber-broutin.be* folding ruler, from left to right:

- 2m (in a frame, between 1cm and 2cm); indicating the total length of the folding ruler.
- a hexagon, barely visible, punched into the wood (between 2cm and 3cm); unknown signification.
- LUXMA (in a frame, between 4cm and 5cm); the manufacturer of the folding ruler (different from the company who ordered the folding ruler, their (the company's, i.c. weber-broutin's) name is printed on the sides of the ruler, and is only readable when the ruler is folded together for at least 50% (=1m).
- III (in an oval, between 6cm and 7cm); indication of the preciseness of the scale in centimeters, with 'I' in roman numbers meaning the most precise, and 'IV' in roman numbers meaning the least precise. (It is therefore not entirely certain that the 'III' on *weber-broutin*'s folding ruler can actually be found between 6cm and 7cm.)
- D 99 (in an oval, probably between 7cm and 8cm, see argument mentioned above); unknown signification.
- 1.1.60 (in an oval, probably between 7cm and 8cm, beneath D 99), signification unknown.

Fairly detailed map of the two major marble quarries on the island of Tinos, Greece. The spontaneous route-advice was prepared by a local marble worker, P.D., in the Karia region of the island on a locally extracted, green marble slab. The waved lines represent roads traversing uphill, while the straight lines represent roads following a contour line of the topography.

‘Tell your friend that the wine is for girls; it’s very sweet,’ the marble worker alerted my travel companion K.S. after offering us local sweet wine. The workshop smelled like boiled meat and bones.

Notes on map from left to right, top to bottom:

Interior of Eben-Ezer: photocopies and replicas of among other things an *Edit du Roy* and a photograph of a *Marche pour la liberté de conscience, 1956*. Handwritten labels are added beneath the blue frames. Due to limited lighting, and an interdiction to use the camera's flash, some labels are illegible, even when zooming in on the picture. It is unclear what the bottom left replica of a painting is (it has a Brueghelian air to it) and the upper right replica of a photograph.

The walls are made of flint, harvested from quarries in the neighbourhood.

Between the rhinos and the kangaroos in the Antwerp Zoo a wooden footpath curves through a grove of Sequoiadendron Giganteum trees. In the middle of this Californian forest, visitors find the giant slice of a felled tree of the same species. It was brought to the zoo in 1962 and was approximately 650 years old at the time. Eleven labels point out significant moments in history on the tree's growth rings. They range from zoo- and zoology-related moments (for instance: '1901: The Okapi is described as a species', or '1843: Foundation of the RZSA and opening of the Zoo', or '1859: Darwin publishes *The Origin of Species*', etc.), to cultural and historical milestones ('1555: Plantijn starts publishing books in Antwerp', or '1640: Rubens (baroque painter) dies', or '1492: Columbus in America'). Another label points to the last growth ring and reads: '1962: this tree is felled and this tree disc is installed at the Zoo.'

The label pointing to the centre of the tree implies a simultaneity between the tree's first growth year and the Battle of the Golden Spurs in 1302.

Notes

On closer inspection the slice seems to consist of two halves that were put together like a jigsaw puzzle. The resulting gap is skilfully patched with what appears to be wood from the same species – possibly even the same mammoth tree.

(‘Slice of more than three meters in diameter, sawn from a Mammoth-tree, given by California to the botanical garden of New York, and presented there’)

Thiery describes the ‘patriarchs’ of the plant world. This slice of a Sequoia, which fell in 1917 in Yosemite National Park, is 1694 years old. A woman of the New York Botanical Institue, where the slice of the patriarch is presented, counted the rings. If one would look at the picture with a magnifying glass, Thiery writes in a footnote, the reader (with good eyes and a fair amount of knowledge of the English language) would be able to read the labels indicating the important global events the tree witnessed. They are transcribed and translated by the author. The end of the Roman occupation of Great Britain. Columbus arriving in America. The Declaration of Independence. This is a lie: the text is illegible, even when using a magnifier.

In the photograph, the slice, as on view in the New York Botanical Institute, is presented upright. To prevent it from rolling away, two small triangular slices of wood were posited at the left and right side of the slice. The type of wood of these slices, nor the age of the patriarch from which they stem, are known.

To detect gravitational waves, physicists built enormous research centers, amongst others at Livingston, Louisiana. The facility mainly consists of two tunnels in an L-shape. Mirrors inside provide data. Disturbances from gravitational waves are miniscule. To prevent interference from outside, such as vibrations caused by people passing in the neighbourhood, the mirrors have to be detached from the earth. They ‘float’, suspended by glass fibers in a pendulum-like construction.
As I was watching my screen, a courier was on his way to deliver a book (Noel-Todd, J. *The Penguin Book of the Prose Poem: From Baudelaire to Anne Carson*. London: Penguin, 2019).

Depending on the language one chooses, the Wikipedia entry for ‘document’ shows a different picture. The French-language page shows what appears to be a Slovenian thesis written in 1984. The caption states it is a ‘book of Czechoslovak computer science author Květoslav Šoustal about computer networks’. The image was uploaded by Kelovy, a Slovakian mushroom-picker.

The anonymous hand rests on a lemon-yellow tablecloth, on which a yellow book and a blue binded file lie. The top left corner is the most intriguing, however: the tablecloth seems to be draped over a lemon, alongside a drinking glass. The cloth, however, does not get shaped by the lemon. Nor does the shadow-side of the lemon coincide with the shadow the other documents throw on the tablecloth. A closer look seems to indicate that the lemon is in fact an image of a lemon, printed on a plastic napkin.

The Russian wikipedia shows the image of a lease agreement. The German wikipedia for ‘document’ is text only.

As the hours passed, and while clouds continuously kept us from seeing stars and planets, we started to photograph the set-up used to launch this website. To highlight the umbrella that protected the gear from the unpredictable bursts of rain, we used a flashlight: during the thirty second long exposure, it was lit for two seconds. This proved to be enough to give the whole the feel of an untampered, realistic view. Meanwhile, the website was in all likelihood streaming a grey haze, as the telescope was pointed to the fleeting clouds and gradually spinning along with the earth’s movement to keep track of the same invisible celestial bodies. As we returned to the base, planet Jupiter had become visible to the naked eye.

In another exposure of the same length, we left the flashlight on for approximately eight seconds and pointed the beam a bit lower.

In his debut novel ‘De Metsiers’ Hugo Claus employs a multiple narrative perspective. In the copy I picked up in a thrift store, there’s a bookmarker between pages 44 and 45 where the perspective shifts from Ana to Jim Braddok. It’s pouring. The pink piece of paper lists 9 sessions at a driving school. There’s a total of 20 hours, taught alternately by Johan and Guy.

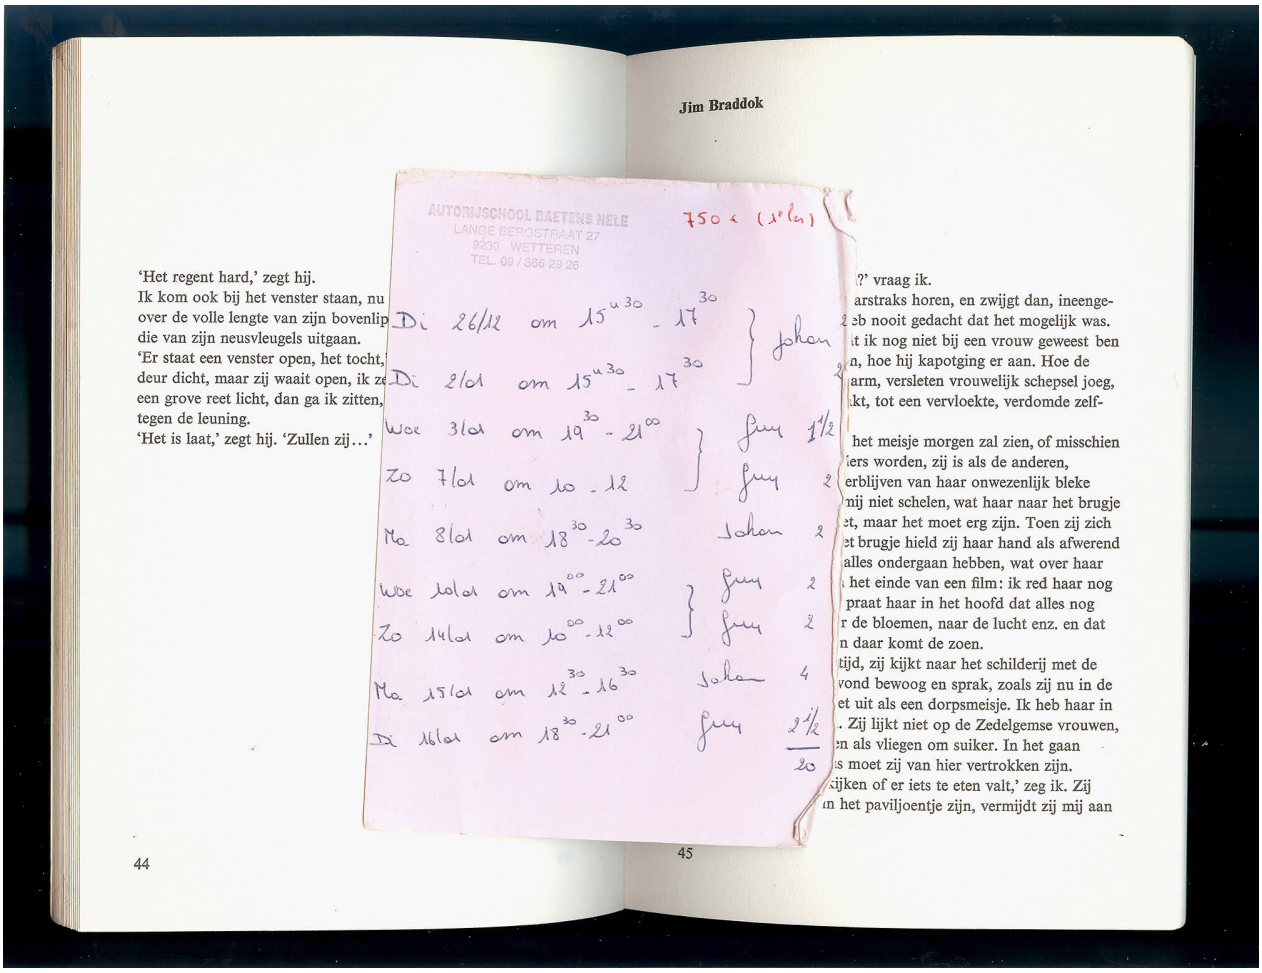

Notes

In 2000, 2006 and 2017 the twenty-sixth of December was a Tuesday. (Earlier years are improbable, since the Euro was not introduced yet.)

The oldest coin in the collection has darkened over time, but upon inspection, the text ‘AD USUM BELGII AUSTR’ (left) and the contours of a (female) head (right) can be discerned. A quick search learns it stems from the middle of the 18th century. The coin was made and used in the Austrian Netherlands, reigned by Maria Theresa, who is the one depicted. My mother recollects finding it in the backyard when she was a kid.

About 40 years later, the euro was introduced. The ringbinder with my mother’s coin collection was taken from the shelf. A dilemma came to the fore: we wondered if we should keep one of each existing Belgian coin and banknote and put them in the binder, alongside Maria Theresa, or if we should exchange them for the new European currency. The decision to keep a coin of five Belgian francs was not difficult to make, but as the amount raised, the answer was increasingly hard to give. This was an assessment of the old currency’s emotional and projected historical value, compared to its current financial worth. It was a decision based on investment principles.

To accentuate the value of the Maria Teresa kronenthaler of 1 liard, I put the coin on a pile of red post-it-notes when photographing it. Coins like these are sold on eBay for prices ranging from 0,70 euros to 16 euros.

the-documents.c

A 250 meter walk away from the seaside. A sign states in Dutch and French:
‘!!! NO PARKING !!!
Wrongly parked cars will be chained and only released upon payment of a € 40 parking fee’

The 40 EUR parking fee the sign threatens to charge is communicated by a relatively new sticker stuck on an older sign. Underneath the three black characters (€, 4 and 0) on a white background, there’s a relief: 7 characters declaring a parking fee of 1500 BEF.

1500 BEF equals 37,18 EUR[1]. In changing currency, the fee increased by 7,58%.

Notes

1. The Belgian franc was the currency of the Kingdom of Belgium from 1832 until 2002 when the Euro was introduced. 1 EUR is worth 40,3399 BEF.

In John Berger and Jean Mohr's groundbreaking book *Another Way of Telling*, the index at the end gives information on the images printed throughout the book. Most of them are Jean Mohr's. In the section 'If each time…' – a wordless sequence of images which aims to develop an alternative way of telling a story – some images are referenced as 'documents'. The information is sparse. On page 138, the index states, there is a 'Document, detail'. It features a closeup of a knitted piece of fabric. It appears to be the same picture as seen on the first page of the section (p. 135), where it is printed beneath another image – a photo by Mohr of hands knitting. On this occasion, the image is indexed as 'Document'.

I recognized it in a flash, the late Jurassic-early Cretaceous herbivore looming dangerously over the road I was cycling on. I thought of *Some Windy Trees*.[1]

A utility pole (425638, 07/99, 07/2002, COBRA), electrical wires, a hawthorn (Crataegus) and an old man’s beard (Clematis vitalba). A symbiosis.

An architect in Z. receives a reminder. ‘Please send, as soon as possible, the plans of the construction before the damage.’ The reminder was sent by the Ministry of Reconstruction, in 1951. The architect’s address in Z., as mentioned in this file, is nowadays a house adjacent to Saloon Redbarn, a hall used for activities organized by a club of country and western-aficionados.

French writer Raymond Queneau did extensive research into what he called *hétéroclites*, and at other times *fous littéraires*, a continuation of a longstanding bibliographic project of assembling texts proposing eccentric theories that were never picked up by the scientific community. Disappointed by the results of his research and unable to find a publisher, he abandoned the idea of publishing the encyclopaedia he was compiling. Later, in his encyclopaedic novel *Les enfants du limon*, he picks up the thread, from a different perspective. It tells the story of two quirky characters, Chambernac and Purpulan, wanting to compile an encyclopedia on *fous littéraires*. The novel cites from the texts they have dug up. The novel ends when they give up on the project, and give their findings to a novelist they meet and who says to be interested in the material, and asks if it would be OK if he'd attribute it to a character in a story he's writing. Chambernac agrees, asking the name of the novelist he's meeting: 'Monsieur comment?' – 'Queneau'.

Every two weeks, *The New York Review of Books* falls into my letterbox. Those are good days. Most often, I won't get to reading it, but what I instantly do, is check the last page with 'The Classifieds'. The people writing the (genuine, not fictitious) adverts and inquiries reappear every so often. I happily assume the position of the implied reader, as they address the presumed readers of the review. There's a 'charismatic, aging French rock star' providing original songs in Franglais. There are top notch apartments in Paris for aspiring writers. There are those seeking love and astronomical peculiarities: 'Hitch my wagon to a star – Looking for a bright sophisticated senior star gazer! *CStein3981@aol.com*'.
