

org is an online platform, collecting, describing, presenting and generating documents of all sorts. It documents documents.

Your path through the collection lead along Backpack, Dust, 12M m3 [1/8] Rapid Snowmelt, 12M m3 [2/8] Thaw, 12M m3 [3/8] Swell, 12M m3 [4/8] Dam, 12M m3 [5/8] It's Freezing, 12M m3 [6/8] 56 years, 12M m3 [7/8] A Fissure, 12M m3 [8/8] Heating, Populus, Investment, Crocodile Copy, At the copyshop, Une étoile est-elle un document?, Saturn Stationary, Schelp, From Asturias, Into Cantabria, Passing Time Near a Particle Accelerator, Iguanodon

What constitutes a 'document' and how does it function?

According to the *Oxford English Dictionary*, the etymological origin is the Latin 'documentum', meaning 'lesson, proof, instance, specimen'. As a verb, it is 'to prove or support (something) by documentary evidence', and 'to provide with documents'. The online version of the *OED* includes a draft addition, whereby a document (as a noun) is 'a collection of data in digital form that is considered a single item and typically has a unique filename by which it can be stored, retrieved, or transmitted (as a file, a spreadsheet, or a graphic)'. The current use of the noun 'document' is defined as '*something* written, inscribed, etc., which furnishes evidence or information upon any subject, as a manuscript, title-deed, tomb-stone, coin, picture, etc.' (emphasis added).

Both 'something' and that first 'etc.' leave ample room for discussion. A document doubts whether it functions as something unique, or as something reproducible. A passport is a document, but a flyer equally so. Moreover, there is a circular reasoning: to document is 'to provide with documents'. Defining (the functioning of) a document most likely involves ideas of communication, information, evidence, inscriptions, and implies notions of objectivity and neutrality – but the document is neither reducible to one of them, nor is it equal to their sum. It is hard to pinpoint it, as it disperses into and is affected by other fields: it is intrinsically tied to the history of media and to important currents in literature, photography and art; it is linked to epistemic and power structures. However ubiquitous it is, as an often tangible thing in our environment, and as a concept, a document *deranges*.

the-documents.org continuously gathers documents and provides them with a short textual description, explanation, or digression, written by multiple authors. In *Paper Knowledge*, Lisa Gitelman paraphrases ‘documentalist’ Suzanne Briet, stating that ‘an antelope running wild would not be a document, but an antelope taken into a zoo would be one, presumably because it would then be framed – or reframed – as an example, specimen, or instance’. The gathered files are all documents – if they weren’t before publication, they now are. That is what the-documents.org, irreversibly, *does*. It is a zoo turning an antelope into an ‘antelope’.

As you made your way through the collection, the-documents.org tracked the entries you viewed. It documented your path through the website. As such, the time spent on the-documents.org turned into this – a new document.

This document was compiled by _____ on 19.02.2022 09:53, printed on _____ and contains 20 documents on 43 pages. (<https://the-documents.org/log/19-02-2022-3839/>)

the-documents.org is a project created and edited by De Cleene De Cleene; design & development by atelier Haegeman Temmerman.

the-documents.org has been online since 23.05.2021.

Notes

- De Cleene De Cleene is Michiel De Cleene and Arnout De Cleene. Together they form a research group that focusses on novel ways of approaching the everyday, by artistic means and from a cultural and critical perspective.

_44A6588.dng

At 13:26:43 I took a photograph of a concrete building without windows in an industrial zone just south of Brussels.

_44A6590.dng

At 16:46:15 I photographed a succession of office buildings in the same industrial zone.

_44A6589.dng

I must have walked about 1 kilometer between the concrete building without windows and the section of the industrial zone with the offices. At 13:43:49, the camera, safely stored in my backpack, recorded 0.4 seconds of the 20 minutes it took me to get there.

In *The Snows of Venice*, Alexander Kluge wonders whether he can take the liberty to conjure up what the sky looked like on 31 December 1799, as Schiller made his way to Goethe's house. He goes on by saying that, historically, there's a 'LACK OF SENSORY ATTENTION AT CRUCIAL MOMENTS'.¹ There are exceptions, though, like the cameraman that was sent out to document the fireworks on New Year's Day 2000. The camera was turned on prematurely. The batteries were used up by midnight, but 'certain cray tones, however, filtered through the cracks of its protective case, conveyed the motion of the walking cameraman, the transportation. The incompletely shut, low-information container was documented exactly [...] To this day it provides inexact testimony as to the qualities of the leather of a twenty-first century carrying case and the precise sensitivity to light and dark demonstrated by a twenty-first century recording medium.'²

Ten years ago, in November, I drove up to Frisia – the northernmost province of The Netherlands. I was there to document the remains of air watchtowers: a network of 276 towers that were built in the fifties and sixties to warn the troops and population of possible aerial danger coming from the Soviet Union. It was very windy. The camera shook heavily. The poplars surrounding the concrete tower leaned heavily to one side.

I drove up to the seaside, a few kilometers farther. The wind was still strong when I reached the grassy dike that overlooked the kite-filled beach. I exposed the last piece of film left on the roll. Strong gusts of wind blew landwards.

Months later I didn't bother to blow off the dust that had settled on the film before scanning it. A photograph without use, with low resolution, made for the sake of the archive's completeness.

The dust on the film appears to be carried landwards, by the same gust of wind lifting the kites.

It snows on December 19, but the situation changes on the 22nd with the arrival of an Atlantic low-pressure area, bringing masses of hot and humid air. Thaw follows.

And then, it snows again on December 26 and 27, before the arrival of a new warm front on the same day. A significant and brutal rise in temperature ensues: at Lac Noir, at 920 m, the temperature shoots up from 0,3 °C on December 27 at 7 AM to 7,4 ° C on the 28th at 9 PM.

Seven years after the devastating flood, in 1954, the building of the dam is decided upon. Between 1959 and 1963 the infrastructure is built, and the reservoir gets filled with water in 1964 to act as a buffer for sudden floods and to guarantee a flowing Thur through the highly industrialized area downstream.

A Sunday stroll near my parents' house. Along one of the roads between the fields, old poplars have been felled. Young trees have been planted. Each one has a baby blue coloured label, identifying them as Poplar tree, and, more specifically, the 'Vesten' cultivar. This cultivar is planted since it is one of the cultivars known for its resistance with regards to bacteria, diseases and insects. The tags on the trunks have staples keeping them together. They're like bracelets. Come spring, the expanding diameter of the fast growing poplar species' trunk will tear them apart.

The oldest coin in the collection has darkened over time, but upon inspection, the text 'AD USUM BELGII AUSTRI' (left) and the contours of a (female) head (right) can be discerned. A quick search learns it stems from the middle of the 18th century. The coin was made and used in the Austrian Netherlands, reigned by Maria Theresa, who is the one depicted. My mother recollects finding it in the backyard when she was a kid.

About 40 years later, the euro was introduced. The ringbinder with my mother's coin collection was taken from the shelf. A dilemma came to the fore: we wondered if we should keep one of each existing Belgian coin and banknote and put them in the binder, alongside Maria Theresa, or if we should exchange them for the new European currency. The decision to keep a coin of five Belgian francs was not difficult to make, but as the amount raised, the answer was increasingly hard to give. This was an assessment of the old currency's emotional and projected historical value, compared to its current financial worth. It was a decision based on investment principles.

To accentuate the value of the Maria Teresa kronenthaler of 1 liard, I put the coin on a pile of red post-it-notes when photographing it. Coins like these are sold on eBay for prices ranging from 0,70 euros to 16 euros.

Our one year old's favourite toy he's not supposed to play with is the *HP Officejet Pro L7590 All-in-one* in my office. I have given up on forbidding him to play with it. We have a new game: he brings me one of his other toys, we put it on the flatbed, close the lid – as far as possible –, press the button 'START COPY – COLOR' and wait for the print to come out of the machine. When we place the original onto the copy, he laughs. So far we have copied his blue pacifier, his planet-earth-bouncy-ball and his rattling crocodile.

In the introduction to her book *Qu'est-ce que la documentation?*, French 'documentalist' Suzanne Briet asks what a document is. In a scrappy scan of her book I found online I am highlighting almost everything she writes. Is a star a document? Briet says it isn't. But the catalogues and photographs of stars are. When I quickly opened the file with Apple's 'Preview' application to check the above paraphrase, the highlighted sentences were illegible.

Notes

Briet is cited in Lisa Gitelman's *Paper Knowledge* (2014).

A Julien CAIN

DE tout temps la latinité et son héritage ont donné au mot *document* le sens d'enseignement ou de preuve. Le dictionnaire de RICHELET, comme celui de LITTRÉ, en apportent deux témoignages français. Une bibliographie contemporaine soucieuse de clarté a lancé cette brève définition :

Si l'on se réfère aux définitions « officielles » de l'Union Française des Organismes de Documentation, on constate que le document est présenté ainsi : «

Cette définition a été parfois mise en échec par des linguistes ou par des philosophes, épris comme il se doit de minutie et de logique. Grâce à leur analyse du contenu de la notion, on a pu proposer ici une définition, la plus approchée qui soit à l'heure actuelle, mais aussi la plus abstraite, et partant la moins accessible :

A notre époque de transmissions multipliées et accélérées, le moindre évènement, ou scientifique ou politique, lorsqu'il a été porté à la connaissance du public, s'alourdit aussitôt d'une « vêtture de documents » (Raymond BAYER). Admirons la fertilité documentaire d'un simple fait de départ : par exemple,

l'information de presse fait connaître l'évènement par des communiqués de journaux, de radio, par les actualités cinématographiques. La découverte fait l'objet d'une communication à l'Académie des Sciences. Un professeur du Muséum en fait état dans son enseignement. L'animal vivant est mis en cage et catalogué (jardin zoologique). Une fois mort, il sera empaillé et conservé (au Muséum). Il est prêté à une Exposition. Il passe en sonorisé au cinéma. Son cri est enregistré sur disque. La première monographie sert à établir partie d'un traité avec planches, puis une encyclopédie spéciale (zoologique), puis une encyclopédie générale. Les ouvrages sont catalogués dans une bibliothèque, après

On May 23rd 2021, the planet Saturn appears to be stationary among the surrounding celestial bodies in the night sky.¹ This is an attempt to capture this planetary standstill.²

A telescope is set up in a pasture, near a forest edge, pointed to the south-southeast morning sky.³

Notes

- 1 The standstill is de facto inexistent. It's the moment when Saturn's apparent prograde motion turns to a retrograde motion. Since Earth completes its orbit in a shorter period of time than the planets outside its orbit, it periodically overtakes them, like a faster car on a multi-lane highway. When this occurs, the planet being passed will first appear to stop its eastward drift, and then drift back toward the west.
- 2 In astrology, Saturn's retrograde movement is generally a time of karmic rebalancing. Previous bad behavior could be punished. But hard work and responsibility could also be rewarded.
- 3 This is the third instalment of De Cleene De Cleene's Public Observatory. Thanks to Volkssterrenwacht Mira, Grimbergen.

09:52:47

Halfway March my dad started finding empty clam shells on the banks of the Zuidlede along the pasture where he used to herd sheep. He had never seen this type of clam before. There were easily seventy of them along a hundred metre stretch of riverbank.

He brought two specimens to someone he knows in the neighbouring provincial domain. She would look into it, she said, and that she would probably pass it on to someone at the educational department.

Yesterday he (my dad) received a printout of the Dutch wikipedia-page on the Brakwaterstrandschelp (*Rangia Cuneata*). On the page Paul (who sends his regards at the bottom of the document) traced around the scallops with a blue ballpoint pen.

My dad added in capitals – also with a blue ballpoint pen – that the *Rangia Cuneata* is an invasive species, native to the Gulf of Mexico. The first time it was observed in Europe was in Antwerp in August 2005, most probably they reached Europe in the ballast water tanks of large ships.

On the second to last day of a research visit at CERN, there was some spare time in the schedule. I took a long walk towards building 282 in search of some excavation samples: cylindrical pieces of rock that were preserved when the tunnel was dug, glued to a block of wood and frequently exhibited in museums over the last three decades as material evidence of the earthwork and as a witness to the depth. The route led me along the back of building 363 where the wind caused young trees – now gone – to scuff the facade over time.
