

org is an online platform, collecting, describing, presenting and generating documents of all sorts. It documents documents.

Your path through the collection lead along Seacat, Debatably graded, Neptune in opposition [20/20] – A constellation, Neptune in opposition [16/20] – Unrest, Croûton d'Or, Backpack, Another letter from abroad, Mirror, Raisins, 12M m3 [8/8] Heating, 12M m3 [6/8] 56 years, Last night I dreamt of Juan Pedro, Pipe, Battery, Potholes, Neptune in opposition [10/20] – Kinship, Gatun Locks

What constitutes a 'document' and how does it function?

According to the *Oxford English Dictionary*, the etymological origin is the Latin 'documentum', meaning 'lesson, proof, instance, specimen'. As a verb, it is 'to prove or support (something) by documentary evidence', and 'to provide with documents'. The online version of the *OED* includes a draft addition, whereby a document (as a noun) is 'a collection of data in digital form that is considered a single item and typically has a unique filename by which it can be stored, retrieved, or transmitted (as a file, a spreadsheet, or a graphic)'. The current use of the noun 'document' is defined as '*something* written, inscribed, etc., which furnishes evidence or information upon any subject, as a manuscript, title-deed, tomb-stone, coin, picture, etc.' (emphasis added).

Both 'something' and that first 'etc.' leave ample room for discussion. A document doubts whether it functions as something unique, or as something reproducible. A passport is a document, but a flyer equally so. Moreover, there is a circular reasoning: to document is 'to provide with documents'. Defining (the functioning of) a document most likely involves ideas of communication, information, evidence, inscriptions, and implies notions of objectivity and neutrality – but the document is neither reducible to one of them, nor is it equal to their sum. It is hard to pinpoint it, as it disperses into and is affected by other fields: it is intrinsically tied to the history of media and to important currents in literature, photography and art; it is linked to epistemic and power structures. However ubiquitous it is, as an often tangible thing in our environment, and as a concept, a document *deranges*.

the-documents.org continuously gathers documents and provides them with a short textual description, explanation, or digression, written by multiple authors. In *Paper Knowledge*, Lisa Gitelman paraphrases ‘documentalist’ Suzanne Briet, stating that ‘an antelope running wild would not be a document, but an antelope taken into a zoo would be one, presumably because it would then be framed – or reframed – as an example, specimen, or instance’. The gathered files are all documents – if they weren’t before publication, they now are. That is what the-documents.org, irreversibly, *does*. It is a zoo turning an antelope into an ‘antelope’.

As you made your way through the collection, the-documents.org tracked the entries you viewed. It documented your path through the website. As such, the time spent on the-documents.org turned into this – a new document.

This document was compiled by _____ on 24.11.2022 15:13, printed on _____ and contains 17 documents on 39 pages. (<https://the-documents.org/log/24-11-2022-4856/>)

the-documents.org is a project created and edited by De Cleene De Cleene; design & development by atelier Haegeman Temmerman.

the-documents.org has been online since 23.05.2021.

Notes

- De Cleene De Cleene is Michiel De Cleene and Arnout De Cleene. Together they form a research group that focusses on novel ways of approaching the everyday, by artistic means and from a cultural and critical perspective.

Flanders
State of the Art

Coming back from holidays, we were waiting for the ferry to take us from Ramsgate to Ostend. We were well on time. As the ship entered the harbour, I asked my parents if I could take a photograph. It's the first photograph I recall taking. I remember my dad telling me to wait long enough for the ship to get closer. I didn't. I only got one try.¹

It took a while before the film was developed. I couldn't stop imagining what the photograph would look like: some picturesque waves in the foreground, the shining white ship, the red and blue text on the side, and a cloud filled sky.

Notes

- 1 Following every holiday, when we got home, the garden and our house would be photographed with the remaining exposures on the roll of film in the camera.

The two photographs arrived in Belgium inside a used hardback¹ in spring 2016, though it is unclear how long before that time they were actually taken.²

Photograph #1 measures 151 x 100 mm and shows

Notes

- The book is a first edition, first printing hardback copy of *Word Virus: the William S. Burroughs reader*, edited by James Grauerholz and Ira Silverberg, with an introduction by Ann Douglas, published by Grove Press (New York) in 1998 (160mm x 235mm, 532pp.). On the used book aggregator webstore, the book was graded 'Very Good' (or, VG),* which proved a realistic assessment as it appeared (in fact, still does) largely unread with a dust jacket in equally good condition and no markings inside whatsoever. In fact, the book's condition might well have warranted a 'Fine' (F) grading were it not for the only notable (yet not noted) defect, which was that the 'Spoken Word CD' that was originally included — as indicated by a 32mm diameter round sticker in the top right corner of the front of the dust jacket, and the glued-in envelope in the back of the book — was no longer present. This defect may well have accounted for the apparent disparity between the state and grading of the book and the low price of \$4.53 (shipping not included) it was sold at, although the fact remains that this incomplete state ought to have been mentioned in the listing. Since the time of purchase, however, markings were added to the book, presumably with an additional adverse effect on its market value: appearing on the half-title page, they are in dark green crayon and of an abstract nature and were made by the current owner's infant son.
* According to the terminology of the grading scale proposed in 1949 by *AB Bookman's Weekly* and still widely, if not universally, in use in the online used book market today, albeit with some additions or modifications by individual platforms. See [Wikipedia](#) for a brief overview.
- Elements of style and physical nature of the artifacts may be taken to indicate an origin roughly contemporaneous with the book.
- '[In the United States of America, the] twelfth grade is the twelfth school year after kindergarten. It is also the last year of compulsory secondary education, or high school. Students are often 17–19 years old. Twelfth graders are referred to as Seniors.' (Wikipedia)
- A 7-digit phone number, without country or area code, redacted here.
- Located in the state of Nevada, no further identification of the particular shop was provided on the aggregator webstore, and it must be noted that the book was subsequently shipped from 'Auburn', presumably Auburn, CA.
- Indeed in accordance with its 'Very Good' grading, which is generally understood to explicitly list any defects such as markings (including dedications) but also any missing materials.
- Quality hardbacks being notably easier to read without damaging the book.
- Speculations on this, and any potential subsequent extrapolations are, fortunately perhaps, further inhibited by the fact that the book presents a rather generous cross-section of writings spanning the entirety of William S. Burroughs' famously prolific career. The inclusions span the period between 1929 and 1994. Although undertakings of this kind will inevitably meet with criticism, the consensus indeed seems to be that the editors have done an excellent job in selecting and presenting the material. Was 'Clay' mainly drawn by the hard-boiled straightforward prose style of the early novels; the highly experimental and provocative writings of the 'middle period' (traditionally labeled as rather 'hermetic' and 'cold', though they are quite often not without a haunting, perhaps even 'poetic' quality); or the later, one might say 'integrated' style which saw the earlier experiments wedded to a certain 'return to narrative' and, in old age, traces of a much more 'humane' author than ever before (if a point of critique may yet be formulated, one might indeed say that the writings from this later period (roughly 1978–1997) are somewhat favoured (quantitatively) in the *Word Virus* volume; as these have a (still: relatively) greater 'readability' than much of the older material that may indicate a decision of a commercial nature, yet there is also the fact that these texts were written in collaboration with one of the editors of *Word Virus*)?
- Being in fact a promo sampler for the 4CD *Giorno Poetry Systems* compilation of William S. Burroughs material also released (by Mouth Almighty Records and Mercury Records) in 1998. See [Discogs](#).
- Nevada has three area codes (702, 725, and 775), yet quick Google searches of the 7-digit number combined with any one of those yield no easy identification. Considering the overall scarcity of information, however, it seems clear that anyone seeking to reconstruct the biographies of 'Clay' and/or the note-writer should take up this line of investigation.
- David Depestel hesitates in trying to make something of himself; a character, a profession, a fixed mode of being, are for him concepts that already shadow forth the outlines of the skeleton, which is all that will be left of him in the end.

two young people who appear to be mountain climbing and captured while clearing a ridge. Behind the two subjects a bluish mountainous landscape is vaguely visible, suggesting a vantage point of some considerable elevation. The person on the left is wearing a white T-shirt and a bracelet, and has several earrings. The person on the right is carrying a backpack. What appears to be a black tank-top may in fact also be the straps of the pack. On their head they wear what appears to be a grey T-shirt or other garment, presumably to protect the subject from the sun; this person also has earrings and is wearing a necklace and sunglasses. The weather appears nice, both subjects are smiling and appear relaxed. The effort may well have been staged.

Photograph #2 measures (approximately) 43 x 62 mm with the left, bottom and right sides appearing to be cut, rather unevenly, with scissors. It has the typical appearance of an American high school yearbook photo and shows a young person wearing a shiny black blouse and a necklace. They have blue eyes and below-shoulder length auburn hair. The red lips appear painted. On the back of this photograph is written in a clearly legible hand:

*Clay, I can't
wait until next
year when we're
in grade 12!³
Have a great
Summer and
call me [XXX XXXX]⁴
by the way, I haven't
forgot about how big UR*

The only assumptions to be made somewhat safely from these two items are that (a) the book has once belonged to 'Clay', and, (b) a relationship of a close, friendly, perhaps even intimate, nature has at one time existed between 'Clay' and the person in the second photograph (assuming also that (c) the note on the back of the second photograph was indeed written by the person in that photograph). The circumstances surrounding, and/or motivations ('Clay's or any third parties') behind the book's ending up in a used-book shop⁵ must necessarily remain a matter of speculation. There are no reasons to assume that the book was gifted to 'Clay' by the note-writer (or by anyone else) as no dedication appears in it.⁶ It must also remain inconclusive whether there are either two or three different

persons appearing across the two photographs, and whether any of these is in fact ‘Clay’.

the-documents.c

Indeed, the number of questions raised by these items far exceeds the number of answers they provide. Even leaving aside the nature of the writings in the book, one cannot help but speculate as to:

- how much, if any, of the book ‘Clay’ ever read;^{7,8}
- what happened to the CD originally included with the book;⁹
- why the unrelated inserted materials were not removed from the book before sale (as opposed to the CD);
- whether ‘Clay’ did in fact ring up the writer of the note over that summer;¹⁰ indeed whether the two ever did meet again, remain close during their ‘senior’ year, perhaps even stay in contact after graduating;
- the meaning of the rather cryptic final line of the note.

As we point the telescope to the sky – cloudy, and filled with chaotic bursts of rain – the dispersion of the city lights accentuates the swirling, frantic raindrops. The roof we are standing on is uneven. A puddle forms underneath the apparatus, around the right leg of the tripod and our feet. The sound of a car on a wet street, below. A kitchen light is flicked on. Temperature is low for a mid-September night, and getting lower by the minute. It seems impossible to tell the depth of field we are documenting, and at what distance from our position these fleeting constellations occur.

In *Six Stories from the End of Representation*, James Elkins writes: ‘Astrophysicists are well practised in “cleaning up” photographic plates by adjusting colour and contrast, removing images of dust, correcting aberrations, restoring lost pixels, and balancing uneven background illumination. When it comes to blur, the usual strategy is to specify what counts as “smooth” and what counts as “pointlike,” and then refine the image until it exhibits the required pointlike properties’¹. Still, some astronomic images keep a certain amount of blur (although it would be technically possible to delineate them). Elkins continues: ‘blur does not need to be a matter of distance from some hypothetical optimal clarity: it can be a functional scale, independent of the viewer’s notions of clarity and even of the image itself’².

On the night of 22 November 2021, I join John Sussenbach in his backyard while he captures Neptune.

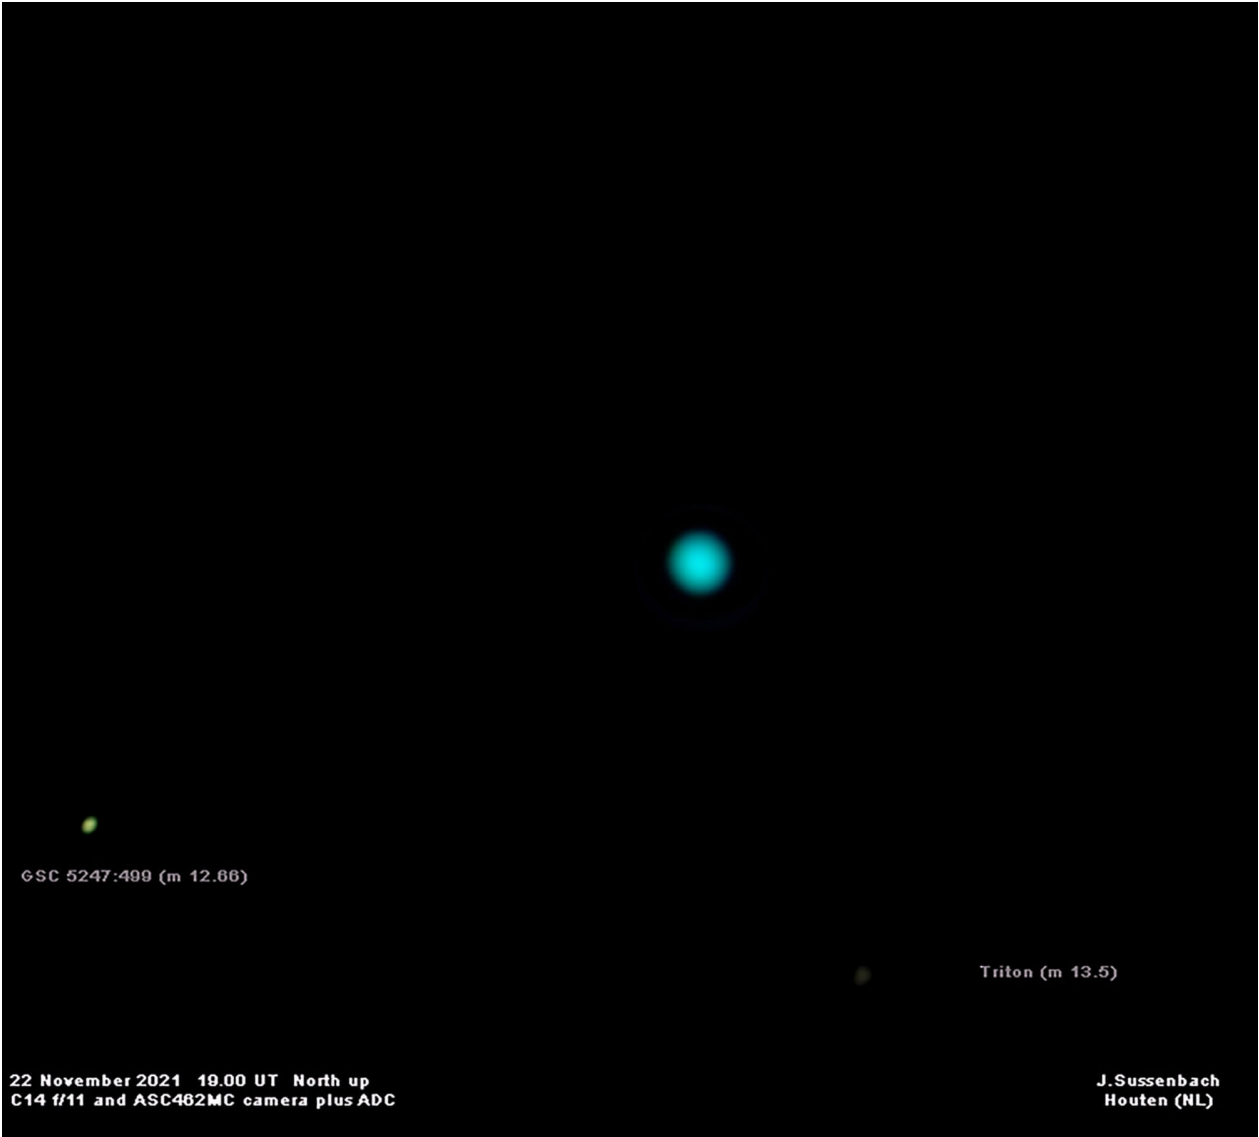

He invites me to join him and his wife for dinner. A prayer. Soup and bread. The images he makes, he explains, are complex from a temporal point of view. The light coming from Neptune has travelled for four hours before it reaches us. Moreover, these images are not photographs of a singular moment, but stacked frames of a video-recording. In doing so, he can, to some extent, eliminate the effects of a bad ‘seeing’: the negative effect atmospheric turbulence has on the light that reaches the telescope.

A bright dot is jumping around on his laptop’s screen. ‘That’s Neptune’, he says. With his index finger he follows the dot. ‘That’s the bad seeing. That’s the unrest.’

The next day I send him the photograph I took of him standing on his ladder, dangerously placed on the edge of the tarp covering his pool. ‘Nice to see the open star cluster Pleiades in your photograph’, he replies. He attaches the image he made that night: ‘If there would have been a clear storm on Neptune, it would have shown’.

The archive of O. Clemminck, architect, was preserved in a box of croutons – by him, the historian who gave it to my father, or someone else (it contains a letter written by Clemminck's widow asking a client to pay the bill her husband had sent). The croutons had a flavor of fine herbs and, a stamp on the box with the plans in it says, should have been consumed before April 1987.

_44A6588.dng

At 13:26:43 I took a photograph of a concrete building without windows in an industrial zone just south of Brussels.

_44A6590.dng

At 16:46:15 I photographed a succession of office buildings in the same industrial zone.

_44A6589.dng

I must have walked about 1 kilometer between the concrete building without windows and the section of the industrial zone with the offices. At 13:43:49, the camera, safely stored in my backpack, recorded 0.4 seconds of the 20 minutes it took me to get there.

In *The Snows of Venice*, Alexander Kluge wonders whether he can take the liberty to conjure up what the sky looked like on 31 December 1799, as Schiller made his way to Goethe's house. He goes on by saying that, historically, there's a 'LACK OF SENSORY ATTENTION AT CRUCIAL MOMENTS'.¹ There are exceptions, though, like the cameraman that was sent out to document the fireworks on New Year's Day 2000. The camera was turned on prematurely. The batteries were used up by midnight, but 'certain gray tones, however, filtered through the cracks of its protective case, conveyed the motion of the walking cameraman, the transportation. The incompletely shut, low-information container was documented exactly [...] To this day it provides inexact testimony as to the qualities of the leather of a twenty-first century carrying case and the precise sensitivity to light and dark demonstrated by a twenty-first century recording medium.'²

Because an acquaintance of the family was a missionary, the postage stamp collection had a large quantity of stamps from the Philippines. You had to boil water, hold the empty envelope above it, wait until the glue and the missionary's saliva loosened and evaporated, and then gently peel off the stamp. Then, it was put on a piece of pink blotting paper. Once dry, the stamp was slid into a tailor-made booklet.

Between a Horta building's facade and King Baudouin's portrait, there are exotic fish, religious scenes, butterflies, and advertisements for NGOs.

Mango is the Philippines' national fruit. Pope John Paul II visited it in 1995. There was a guerrilla unit in Northwest Pampanga during WWII.

On the online thrift shop 2dehands.be the homepage generates a 'for you' section. On November 9th this section listed, among other things, a picture of the sky on a patch of concrete. On closer inspection, it became clear that it was the sky's reflection in a mirror with a red frame and four lightbulbs in it, the kind you might see at the hairdresser's or backstage in a television studio or theatre. The seller estimates the mirror's current value to be 45,00 EUR. The listing includes five photographs. In the fifth one, the object for sale reflects a bucolic landscape: a blue sky, white clouds, some trees and a fragment of a barn.

When I grew up, my parents told me that the number of raisins in the local baker's raisin bread attested to the result of the most recent soccer match of KAA Gent. A victory was celebrated by throwing more raisins into the dough than usual, a loaf following a painful loss was hardly a raisin bread at all.

The baker retired long ago. Today my two-year-old son picked out all the raisins from his slice of bread. KAA Gent's last game was a tie against Union.

While I was sitting in the laundromat one evening waiting for my laundry to finish its cycle, *La Isla Bonita* by Madonna came on the radio. Competing with the rustle of seven rotating laundry machines, the song reminded me of a T-shirt that was now being washed.

The short phrase in the song's lyrics 'last night I dreamt of San Pedro' would nestle itself somewhere in the back of my head and bubble up every now and again for no particular reason. I made this shirt for the occasion of Valentine's Day in 2019 to commemorate my friendship with Jan-Pieter. I remember once mumbling the lyrics to *La Isla Bonita*, replacing 'San Pedro' for 'Juan Pedro', forgetting it for some time and then a while later printing it on a T-shirt.

The 48-inch Oschin Schmidt, a renowned reflecting telescope at Palomar Observatory, California, was used for the Palomar Observatory Sky Survey (POSS), published in 1958, one of the largest photographic surveys of the night sky.

Based on the man's pipe shadow's direction, thrown onto the telescope, there is reason to believe an off-camera flash was used to make the picture.

Due to strict regulations during the COVID-19-pandemic, the yearly vehicle inspection had to be scheduled by appointment. Getting ready to drive to the DMV, the car wouldn't start. It had rained heavily, the preceding days. The day before the DMV-appointment, water had come running into the car on pushing the pedals. My socks were wet.

I called the DMV to say I needed to cancel the appointment and make a new one (but that the car, besides not being able to drive, was perfectly fine, vehicle-inspection-wise).

Later that day, we got the engine up and running again, using jumper cables and a second car, so we would be able to drive to meet the midwife the next day.

Renault Clio. Instructieboekje. 2012. PDF-file

ACCU: storting (4/4)

Starten met starthulpkabels

Sluit de starthulpkabels als volgt aan tussen de twee auto's:

Controleer of de starthulpkabels, verkrijgbaar bij uw merkdealer, dik genoeg zijn en in goede staat verkeren.

Beide accu's moeten dezelfde spanning hebben: 12 volt. De hulpaccu moet minstens de capaciteit (Ampère-uur, Ah) hebben van de ontladen accu.

Let erop dat de auto's elkaar niet raken (kortsluitingsgevaar als u de pluspolen met elkaar verbindt) en dat de ontladen accu goed aangesloten is. Zet het contact af van uw auto.

Laat de motor van de hulpauto met een middelmatig toerental draaien.

Sluit de positieve kabel **A** op de **steun 1** op de **pluspool 2 (+)** van de ontladen accu aan en daarna op de **pluspool 3 (+)** van de hulpaccu.

Sluit de negatieve kabel **B** aan op de **minpool 4 (-)** van de hulpaccu en daarna op de **minpool 5 (-)** van de ontladen accu.

Sluit de kabels A en B uitsluitend aan op de aangegeven aansluitingen.

Start de motor op de normale wijze. Maak, zodra hij draait, de kabels **A** en **B** in omgekeerde volgorde (**5-4-3-2**) los.

Controleer of de kabels **A** en **B** elkaar nergens raken en of de positieve kabel **A** geen metalen delen van de hulpauto raakt.

Risico van letsel en/of beschadiging van de auto.

Theory becomes the apparatus. A metonymic relation. A trope of nearness. Miniscule gravitational disturbances become known as a kilometres-long, L-shaped facility. Particle physics: a circular tunnel beneath the Geneva hinterland.

Somewhere in the early 1970s, our grandfather, a carpenter by trade, buys a telescope^{1,2}, installs it on the lawn, and points it over the hedge. ‘I remember seeing the craters on the moon. The rings of Saturn,’ he told us.

In the shabby plywood box I made to transport the telescope lies a metal ring I ground flat to be able to attach my camera and focus it on infinity.

The hedge, now three metres in height, shields the lower part of the sky from sight and needs pruning.

Notes

On March 23th 2015, a high pressure system above Panama Bay blew strong winds landwards. At the Gatun locks, one of the webcams overlooking the Canal neglected the traffic and briefly captured its own images. The ship's presumed passage through the Gatun locks wasn't recorded by this camera and the AIS-transponder did not save any data of the ship's transit from the Pacific to the Atlantic side of the canal: the Authenticity managed to swap oceans undetected.

On February 16th 2016, the transponder still signals the ship near the port of Bahia Las Minas. The current is calm, the ship has been practically immobile for a year.
