

org is an online platform, collecting, describing, presenting and generating documents of all sorts. It documents documents.

Your path through the collection lead along Starry sky, long exposure, Sandersleben (Saxony-Anhalt), 14 April 2023, Detail of a wall, Salzmünde (Saxony-Anhalt), June 2023, March, Double Reward, 2024, It's Pouring, Bent Concrete, Plaster, 12M m3 [6/8] 56 years, Quarry, A Seismic Change, A Fever Dream, Backpack, Populus, Guzmanian, From Asturias, Into Cantabria, Neptune in opposition [13/20] – A foraging fox, Measures, Negative sheet 21, negative 24, negative 24,5, Negative sheet 16, negative 24, negative 24,5, Waybill

What constitutes a 'document' and how does it function?

According to the *Oxford English Dictionary*, the etymological origin is the Latin 'documentum', meaning 'lesson, proof, instance, specimen'. As a verb, it is 'to prove or support (something) by documentary evidence', and 'to provide with documents'. The online version of the *OED* includes a draft addition, whereby a document (as a noun) is 'a collection of data in digital form that is considered a single item and typically has a unique filename by which it can be stored, retrieved, or transmitted (as a file, a spreadsheet, or a graphic)'. The current use of the noun 'document' is defined as '*something* written, inscribed, etc., which furnishes evidence or information upon any subject, as a manuscript, title-deed, tomb-stone, coin, picture, etc.' (emphasis added).

Both 'something' and that first 'etc.' leave ample room for discussion. A document doubts whether it functions as something unique, or as something reproducible. A passport is a document, but a flyer equally so. Moreover, there is a circular reasoning: to document is 'to provide with documents'. Defining (the functioning of) a document most likely involves ideas of communication, information, evidence, inscriptions, and implies notions of objectivity and neutrality – but the document is neither reducible to one of them, nor is it equal to their sum. It is hard to pinpoint it, as it disperses into and is affected by other fields: it is intrinsically tied to the history of media and to important currents in literature, photography and art; it is linked to epistemic and power structures. However ubiquitous it is, as an often tangible thing in our environment, and as a concept, a document *deranges*.

the-documents.org continuously gathers documents and provides them with a short textual description, explanation, or digression, written by multiple authors. In *Paper Knowledge*, Lisa Gitelman paraphrases ‘documentalist’ Suzanne Briet, stating that ‘an antelope running wild would not be a document, but an antelope taken into a zoo would be one, presumably because it would then be framed – or reframed – as an example, specimen, or instance’. The gathered files are all documents – if they weren’t before publication, they now are. That is what the-documents.org, irreversibly, *does*. It is a zoo turning an antelope into an ‘antelope’.

As you made your way through the collection, the-documents.org tracked the entries you viewed. It documented your path through the website. As such, the time spent on the-documents.org turned into this – a new document.

This document was compiled by _____ on 29.11.2024 14:00, printed on _____ and contains 20 documents on 42 pages. (<https://the-documents.org/log/29-11-2024-6455/>)

the-documents.org is a project created and edited by De Cleene De Cleene; design & development by atelier Haegeman Temmerman.

the-documents.org has been online since 23.05.2021.

Notes

- De Cleene De Cleene is Michiel De Cleene and Arnout De Cleene. Together they form a research group that focusses on novel ways of approaching the everyday, by artistic means and from a cultural and critical perspective.
www.decleenedecline.be / info@decleenedecline.be
- This project was made possible with the support of the Flemish Government and KASK & Conservatorium, the school of arts of HOGENT and Howest. It is part of the research project *Documenting Objects*, financed by the HOGENT Arts Research Fund.

State of the Art

A constant, dependable presence. With the camera focused on the North Star for an extended period, the rotation of the Earth becomes visible. Nearby, in the municipality of Wiederstedt, the geologist, poet and philosopher Friedrich von Hardenberg (better known by his pen name Novalis) spent his childhood years between 1772 and 1784. A quote of his is engraved on a stone bench in the park surrounding the chateau where he was raised: “The human being does not speak alone – the universe also speaks – everything speaks – infinite languages.”

Interior of Eben-Ezer: photocopies and replicas of among other things an *Edit du Roy* and a photograph of a *Marche pour la liberté de conscience*, 1956. Handwritten labels are added beneath the blue frames. Due to limited lighting, and an interdiction to use the camera's flash, some labels are illegible, even when zooming in on the picture. It is unclear what the bottom left replica of a painting is (it has a Brueghelian air to it) and the upper right replica of a photograph.

The walls are made of flint, harvested from quarries in the neighbourhood.

In the world of *National Geographic*, white people overlooking a landscape are not uncommon. “The Red Shirt School of Photography” was a label used to describe National Geographic photographers who allegedly brought red clothing and props with them on assignment to put on their subjects in order to make better photographs when working with Kodachrome film, which is famous for its capability of rendering rich colors. Overlooking a landscape wearing red, the observer asserts dominance over the land. They glorify it, seeing a country that is beautiful, rich in resources, and therefore “worth taking”.

Notes

- Max Pinckers (°1988, BE) and Victoria Gonzalez-Figueras (°1988, CA) are based in Brussels, Belgium. They have been working together for the past ten years on documentary photography projects. Victoria works in the cultural field as a researcher and producer. Max is a speculative documentarian, teacher and occasional writer on photography. They are married, in love, and have a son. Victoria has consistently assisted Max in his projects as a production manager, but they have recently been making new work together as co-authors. “Double Reward” is the first such project.
- In spring 2024 the-documents.org and Trigger co-publish a series of online articles with a focus on the meeting ground between photography and the document.

In his debut novel 'De Metsiers' Hugo Claus employs a multiple narrative perspective. In the copy I picked up in a thrift store, there's a bookmarker between pages 44 and 45 where the perspective shifts from Ana to Jim Braddok. It's pouring. The pink piece of paper lists 9 sessions at a driving school. There's a total of 20 hours, taught alternately by Johan and Guy.

Notes

In 2000, 2006 and 2017 the twenty-sixth of December was a Tuesday. (Earlier years are improbable, since the Euro was not introduced yet.)

Sources

Claus, H. *De Metsiers*. Amsterdam: Uitgeverij De Bezige Bij, 1978.

A block of concrete. Fissures are showing and rebar is sticking out from all sides. If it were still straight, the block would measure approximately 130 x 15 x 40cm.

It is lying by the side of the road, a few hundred meters from a construction site. It appears to be shaped by impact. Maybe the block plummeted to the ground from a great height. Perhaps, something heavy hit it. For all one knows, it served as a column and was exposed to an unforeseen amount of pressure, causing it to buckle.

According to Eyal Weizman '[a]rchitecture emerges as a documentary form, not because photographs of it circulate in the public domain but rather because it performs variations on the following three things: it *registers* the effect of force fields, it contains or *stores* these forces in material deformations, and, with the help of other mediating technologies and the forum, it *transmits* this information further.'

As a result of intense drainage of drinking water, an area around the Belgian city of Waver was designated as having a potential for land subsidence – the downward movement of the soil over an extended period of time. People in Waver were startled to find their town mentioned in an international study published in *Science*. Flemish newspaper *De Standaard* uncovered that the researchers had used an older study, published in 2005, which claimed that the soil in Waver had moved some five centimeters in a period of eleven years. Pictures of fissures in Waver-facades had been added to the original article.

Last year, cracks in our living room wall were covered up by placing plasterboard in front of the plastered brick wall. As such, we avoided having to paint the wall with the cracks and the marks left by the IKEA Billy bookcases.

On May 6th 2020, 14h06 and 31 seconds, the Belgian Seismological Institute records an earthquake with a 1,7 magnitude in the region of Braine-Le-Compte. Three reactions from people in the neighbourhood, filed by the Institute, confirm the official seismological recordings. The Institute's website classifies the earthquake as a 'quarry blast'.

The road down from the top of Mount Vesuvius, at Atrio Del Cavallo. The sun sets. The last tourist bus has headed down. Then the headlights of the guardian's car swing their way down. It must be freezing. I am holding an orange-sized piece of petrified lava, probably stemming from the 1872 or 1944 eruption. A kilometer further down the road, the old Observatory is empty. Nowadays, monitoring seismic changes is done in a research centre in the city of Naples. Their seismographic registrations can be followed online, in real time. Two headlights swirling along the slopes, underneath me, are coming upwards.

During the night, both of us get unwell. One of us is shaking, intensely and relentlessly. The windows are open. For minutes that seem to be hours, it feels like it's freezing. We get extra blankets. Then, it gets too hot.

One of us dreams about *cocodrillos*. It starts out with a single animal, like the one we saw in the National Archaeological Museum, escaping from an aquarium, and ends with lots of little ones crawling all over the place. It's impossible to know how many have escaped.

The other dreams about seismologist Luigi Palmieri's unfortunate assistant and his family's quest to redeem his good name. To deprive him of the burden and guilt set upon him by Luigi Palmieri's report of the 1872 eruption of Vesuvius, the assistant's offspring were building a monument just below the observatory in which their great-grandfather fell asleep. The monument was permanently, and continuously, unfinished.

We both dream of hearing fireworks in Naples.

In the morning, we're slightly alarmed that we both got sick and feverish at the same instant. It's the middle of January, and the weather has been summerlike all week. A gentle morning breeze flies in from the Neapolitan bay while we wait for the bus to take us to the airport.

At 13:26:43 I took a photograph of a concrete building without windows in an industrial zone just south of Brussels.

_44A6590.dng

At 16:46:15 I photographed a succession of office buildings in the same industrial zone.

_44A6589.dng

I must have walked about 1 kilometer between the concrete building without windows and the section of the industrial zone with the offices. At 13:43:49, the camera, safely stored in my backpack, recorded 0.4 seconds of the 20 minutes it took me to get there.

In *The Snows of Venice*, Alexander Kluge wonders whether he can take the liberty to conjure up what the sky looked like on 31 December 1799, as Schiller made his way to Goethe's house. He goes on by saying that, historically, there's a 'LACK OF SENSORY ATTENTION AT CRUCIAL MOMENTS'.¹ There are exceptions, though, like the cameraman that was sent out to document the fireworks on New Year's Day 2000. The camera was turned on prematurely. The batteries were used up by midnight, but 'certain gray tones, however, filtered through the cracks of its protective case, conveyed the motion of the walking cameraman, the transportation. The incompletely shut, low-information container was documented exactly [...] To this day it provides inexact testimony as to the qualities of the leather of a twenty-first century carrying case and the precise sensitivity to light and dark demonstrated by a twenty-first century recording medium.'²

A Sunday stroll near my parents' house. Along one of the roads between the fields, old poplars have been felled. Young trees have been planted. Each one has a baby blue coloured label, identifying them as Poplar tree, and, more specifically, the 'Vesten' cultivar. This cultivar is planted since it is one of the cultivars known for its resistance with regards to bacteria, diseases and insects. The tags on the trunks have staples keeping them together. They're like bracelets. Come spring, the expanding diameter of the fast growing poplar species' trunk will tear them apart.

Anastasio Guzmán was a Spanish pharmacist and naturalist. He spent most of his career in South-America. He died in 1807 during an expedition in the Cordillera de Los Llanganates in Ecuador, in search of the lost treasure of the Incas. Some time after his death, his colleague Juan José Tafalla suggested naming a certain genus of plants after his friend.

Guzmanias are mainly stemless, evergreen, epiphytic perennials native to Florida, the West Indies, southern Mexico, Central America, and northern and western South America. They are found at altitudes of up to 3.500m in the Andean rainforests.

The symbols beneath the photographs indicate that these Guzmanias require full light, but it is advised to avoid bright sunlight in spring and summer (HALF WHITE, HALF BLACK SUN), the compost should be kept moderately moist during growth, allowing it to dry slightly between each watering period (HALF FILLED WATERING CAN). Unlike, for instance, the Grevillea Robusta, a Guzmania does not require being sprayed regularly (SPRAYER). The four digit code is the AUCTION CODE: 'Every product has a code. This code is indispensable for the trade.' The COLOURED BAR at the bottom shows the availability of a plant quarterly. RED means good, PINK means moderate and WHITE means not available.

The introduction to this booklet mentions that '[p]rinted colours are often not as accurate as the colours of the plants themselves, which is why it is possible that colours shown in pictures in this booklet may be a little different from the colours of the real pot plant.'

A half a day's walk from the Fuente Dé *teleférico*, there are less and less traces of passers-by. The path to Sotres suddenly runs through a lush green. The fence between two pastures keeps the sheep from crossing and coincides with the border between two regions. A hole in the fence would change the landscape's hue.

Besides the scale indicating the length in centimeters, and the marks made by using it, a folding ruler displays other marks. These are the marks found on the *weber broutin* www.weber-broutin.be folding ruler, from left to right:

- 2m (in a frame, between 1cm and 2cm); indicating the total length of the folding ruler.
- a hexagon, barely visible, punched into the wood (between 2cm and 3cm); unknown signification.
- LUXMA (in a frame, between 4cm and 5cm); the manufacturer of the folding ruler (different from the company who ordered the folding ruler, their (the company's, i.c. weber-broutin's) name is printed on the sides of the ruler, and is only readable when the ruler is folded together for at least 50% (=1m).
- III (in an oval, between 6cm and 7cm); indication of the preciseness of the scale in centimeters, with 'I' in roman numbers meaning the most precise, and 'IV' in roman numbers meaning the least precise. (It is therefore not entirely certain that the 'III' on *weber-broutin's* folding ruler can actually be found between 6cm and 7cm.)
- D 99 (in an oval, probably between 7cm and 8cm, see argument mentioned above); unknown signification.
- 1.1.60 (in an oval, probably between 7cm and 8cm, beneath D 99), signification unknown.

A malfunctioning of the camera leading to a double-exposed negative. The car is decisive in establishing the relationship between the superimposed photographs. In the middle of the image, we see it parked in front of the house. Slightly less visible is the same car, repeated but further away. This makes it possible to deduce that the dark outline of the house, with the roof and the chimney, is also the same house as in the other photograph. This time, the house is photographed relatively frontally (the slightly angled point of view allows to bring the shed at the back of the house in the line of sight), and from nearby. At the bottom left, the lines that make up the street help to see the continuity of the one photograph, while the electric wires at the top right aid to comprehend the other one.

The camera malfunction speculates on a future addition to the plot. The dark, outlined shed's scale is realistic with regards to the scale of the house and itself (the shed) in the other photograph. Its position with regards to the other buildings seems logical. It imposes itself as a possible second shed for the owner to build in the next few years. In that future shed, the car, now standing in front of the house, could be comfortably parked.

‘Meunerie Duyckers & Conors, les nouveaux moulins’, better known as ‘De Nieuwe Molens’, is a flour mill established in 1897 in the north of Gent along the Verbindingskanaal. Due to increased production, the original 1897 building doubled in 1904.

Only the facade of the iconic warehouse has been preserved along with the recently renovated gasometers. The building is now part of the Tondeliersite. It has been converted into lofts and flats, and was extended with a new construction.

‘You see?!’

[The man points at the waybill¹ on the floor behind the glass door that closes off the abandoned and dismantled hall.]

‘It used to be here, I’m sure.’

[He looks around.]

‘I’m sure.’

[He turns towards me.]

‘Are you also here for the Leen Bakker?² This used to be a Leen Bakker. I just looked it up on their website. They are open from 9 to 6 today.’

[He points at the waybill again.]

‘It was here. I remember well. It’s been years. But it’s here.’

[He walks away.]

‘I’ll look around.’

Notes

- 1 The waybill documents the transport of a 30m³ container filled with approximately 5000 kg of waste from this branch of Leen Bakker to a scrap processing company in nearby Ninove. They take care of scrap, both ferrous and non-ferrous metals. They also have a recognized depollution center for end-of-life vehicles.
- 2 A chain of furniture and interior stores with branches in the Netherlands, Belgium and the Caribbean part of the Kingdom of the Netherlands.
