org is an online platform, collecting, describing, presenting and generating documents of all sorts. It documents documents.

Your path through the collection lead along Residu, Roofing (5) – UDI, Le dos-cul ment, Crocodile Copy, A Fever Dream, Swarms, Wheelhouse (replica), Dust, Backpack, This Year’s Model, LIGO, Neptune in opposition [6/20] – Pier, A Seismic Change, The Birds, License Plate, Tipp-Ex

What constitutes a 'document' and how does it function?

According to the *Oxford English Dictionary*, the etymological origin is the Latin 'documentum', meaning 'lesson, proof, instance, specimen'. As a verb, it is 'to prove or support (something) by documentary evidence', and 'to provide with documents'. The online version of the *OED* includes a draft addition, whereby a document (as a noun) is 'a collection of data in digital form that is considered a single item and typically has a unique filename by which it can be stored, retrieved, or transmitted (as a file, a spreadsheet, or a graphic)'. The current use of the noun 'document' is defined as '*something* written, inscribed, *etc*., which furnishes evidence or information upon any subject, as a manuscript, title-deed, tomb-stone, coin, picture, etc.' (emphasis added).

Both 'something' and that first 'etc.' leave ample room for discussion. A document doubts whether it functions as something unique, or as something reproducible. A passport is a document, but a flyer equally so. Moreover, there is a circular reasoning: to document is 'to provide with documents'. Defining (the functioning of) a document most likely involves ideas of communication, information, evidence, inscriptions, and implies notions of objectivity and neutrality – but the document is neither reducible to one of them, nor is it equal to their sum. It is hard to pinpoint it, as it disperses into and is affected by other fields: it is intrinsically tied to the history of media and to important currents in literature, photography and art; it is linked to epistemic and power structures. However ubiquitous it is, as an often tangible thing in our environment, and as a concept, a document *deranges*.

the-documents.org continuously gathers documents and provides them with a short textual description, explanation, or digression, written by multiple authors. In *Paper Knowledge*, Lisa Gitelman paraphrases 'documentalist' Suzanne Briet, stating that 'an antelope running wild would not be a document, but an antelope taken into a zoo would be one, presumably because it would then be framed – or reframed – as an example, specimen, or instance'.
The gathered files are all documents – if they weren't before publication, they now are. That is what the-documents.org, irreversibly, *does*. It is a zoo turning an antelope into an 'antelope'.

As you made your way through the collection, the-documents.org tracked the entries you viewed. It documented your path through the website. As such, the time spent on the-documents.org turned into this – a new document.

This document was compiled by ____ on 30.09.2025 14:44, printed on ____ and contains 16 documents on 35 pages. (https://the-documents.org/log/30-09-2025-6661/)

the-documents.org is a project created and edited by De Cleene De Cleene; design & development by atelier Haegeman Temmerman.

the-documents.org has been online since 23.05.2021.

Notes

- De Cleene De Cleene is Michiel De Cleene and Arnout De Cleene. Together they form a research group that focusses on novel ways of approaching the everyday, by artistic means and from a cultural and critical perspective.
  www.decleenedecleene.be / info@decleenedecleene.be
- This project was made possible with the support of the Flemish Government and KASK & Conservatorium, the school of arts of HOGENT and Howest. It is part of the research project *Documenting Objects*, financed by the HOGENT Arts Research Fund.

The last couple of days have been dry. Rain is expected for the weekend. The office buckets are in place and are empty, except for some residue. Dirt, sand, a few hairs. Some particles must have come along with the drops when they made their way through the roof.

The torn off section of roofing on the grass has part of a text carved in it: ‘UDI’ and ‘EN’ are still legible. It must have come from another roof; the one shown in the photograph has no missing sections, nor visible repairs.

The roofing that is still on the garage shows a drawing of some kind. A floorplan for a squarish building with a supporting column along each side, or the layout for a tactical explanation, perhaps.

This is a trace, and it is not.
Ceci est une trace et ne l'est pas.
What is a trace?
Qu'est-ce qu'une trace?
Le document n'en est pas, le document documente.
Documents what?
Peu importe, le mot 'document' est dérivé du latin *docere*, c'est à dire…
to show, to teach, to instruct. The document is docile, unlike the trace.
La trace ne montre pas, n'enseigne pas, n'instruit en rien, à moins d'interpréter.
The trace as indexical: it does not 'show' though one can see it. It does not teach,
sauf que tout nous pré-existe, ou plutôt, nous insiste, n'est-ce pas?
It doesn't: it's never there as such until we name it so.

Documenti!
Papiere!
Poètes, vos papiers!
(Léo Ferre 1956)

Le document.
Le dos-cul ment.
Le d'au-cul ment.
Le dé au cul ment.
Mais co-ment?

Butt how?
The do-cum-meant.
The doc-cue-mint.
The dock-comment.

This is a cardboard mousepad.
Are you happy now?
Are you happy?
Are you?
Now?

Our one year old’s favourite toy he’s not supposed to play with is the *HP Officejet Pro L7590 All-in-one* in my office. I have given up on forbidding him to play with it. We have a new game: he brings me one of his other toys, we put it on the flatbed, close the lid – as far as possible –, press the button ‘START COPY – COLOR’ and wait for the print to come out of the machine. When we place the original onto the copy, he laughs. So far we have copied his blue pacifier, his planet-earth-bouncy-ball and his rattling crocodile.

During the night, both of us get unwell. One of us is shaking, intensely and relentlessly. The windows are open. For minutes that seem to be hours, it feels like it’s freezing. We get extra blankets. Then, it gets too hot.

One of us dreams about *coccodrillos*. It starts out with a single animal, like the one we saw in the National Archaeological Museum, escaping from an aquarium, and ends with lots of little ones crawling all over the place. It’s impossible to know how many have escaped.

The other dreams about seismologist Luigi Palmieri’s unfortunate assistant and his family’s quest to redeem his good name. To deprive him of the burden and guilt set upon him by Luigi Palmieri’s report of the 1872 eruption of Vesuvius, the assistant’s offspring were building a monument just below the observatory in which their great-grandfather fell asleep. The monument was permanently, and continuously, unfinished.

We both dream of hearing fireworks in Naples.

In the morning, we’re slightly alarmed that we both got sick and feverish at the same instant. It’s the middle of January, and the weather has been summerlike all week. A gentle morning breeze flies in from the Neapolitan bay while we wait for the bus to take us to the airport.

July. Our eight-month-old son has a fever. We have a hard time getting him to drink enough. The tally marks on the back of a tortellini-box keep track of the diapers he wets and the millilitres of milk and electrolytes he’s able to hold down.
Stuck inside with worrying parents, a sticker-book about a farm is his brother’s favourite pass-time. Tired of having to go back and forth between the pastures and the sticker-filled sheets we decide to use my arm as a repository for animals that share a habitat.

14:42:00

Ten years ago, in November, I drove up to Frisia – the northernmost province of The Netherlands. I was there to document the remains of air watchtowers: a network of 276 towers that were built in the fifties and sixties to warn the troops and population of possible aerial danger coming from the Soviet Union. It was very windy. The camera shook heavily. The poplars surrounding the concrete tower leaned heavily to one side.

I drove up to the seaside, a few kilometers farther. The wind was still strong when I reached the grassy dike that overlooked the kite-filled beach. I exposed the last piece of film left on the roll. Strong gusts of wind blew landwards.

Months later I didn’t bother to blow off the dust that had settled on the film before scanning it. A photograph without use, with low resolution, made for the sake of the archive’s completeness.

The dust on the film appears to be carried landwards, by the same gust of wind lifting the kites.

_44A6588.dng
At 13:26:43 I took a photograph of a concrete building without windows in an industrial zone just south of Brussels.

_44A6590.dng
At 16:46:15 I photographed a succession of office buildings in the same industrial zone.

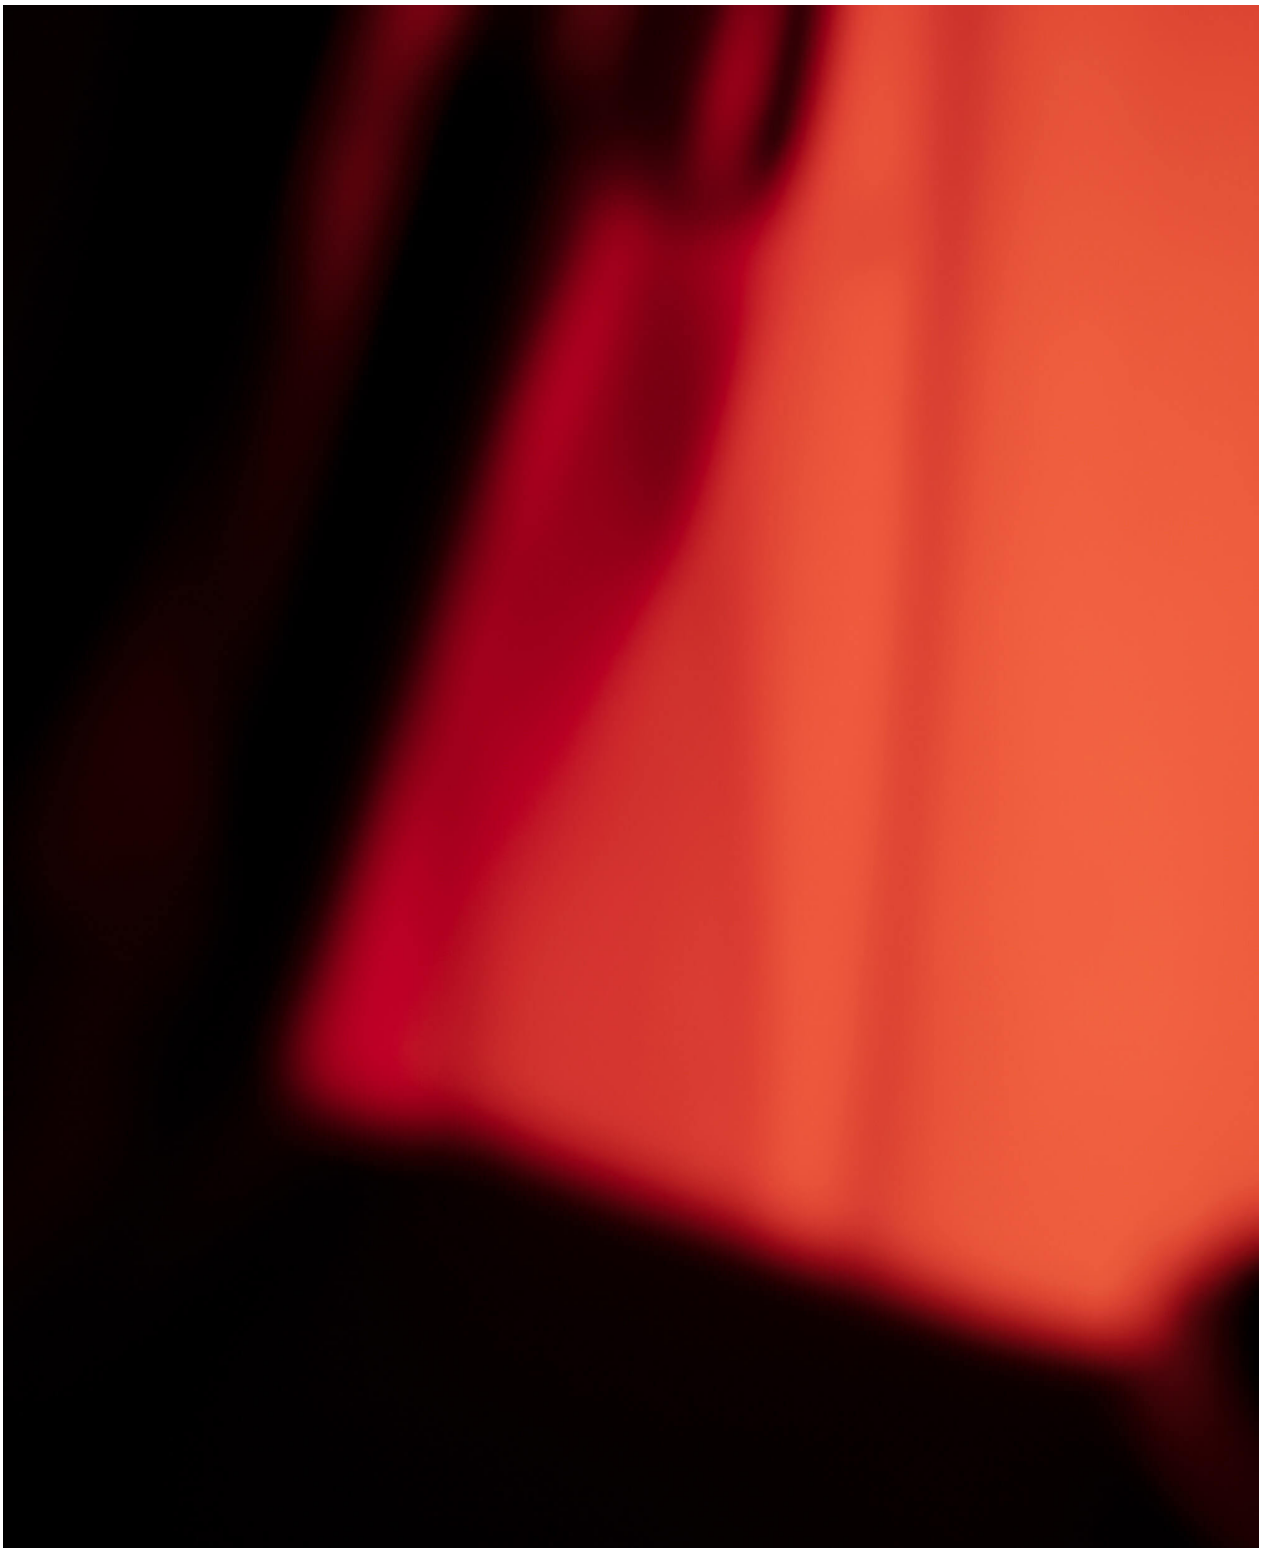

_44A6589.dng
I must have walked about 1 kilometer between the concrete building without windows and the section of the industrial zone with the offices. At 13:43:49, the camera, safely stored in my backpack, recorded 0.4 seconds of the 20 minutes it took me to get there.

In *The Snows of Venice*, Alexander Kluge wonders whether he can take the liberty to conjure up what the sky looked like on 31 December 1799, as Schiller made his way to Goethe's house. He goes on by saying that, historically, there's a 'LACK OF SENSORY ATTENTION AT CRUCIAL MOMENTS'.[1] There are exceptions, though, like the cameraman that was sent out to document the fireworks on New Year's Day 2000. The camera was turned on prematurely. The batteries were used up by midnight, but 'certain gray tones, however, filtered through the cracks of its protective case, conveyed the motion of the walking cameraman, the transportation. The incompletely shut, low-information container was documented exactly […] To this day it provides inexact testimony as to the qualities of the leather of a twenty-first century carrying case and the precise sensitivity to light and dark demonstrated by a twenty-first century recording medium.'[2]

To detect gravitational waves, physicists built enormous research centers, amongst others at Livingston, Louisiana. The facility mainly consists of two tunnels in an L-shape. Mirrors inside provide data. Disturbances from gravitational waves are miniscule. To prevent interference from outside, such as vibrations caused by people passing in the neighbourhood, the mirrors have to be detached from the earth. They ‘float’, suspended by glass fibers in a pendulum-like construction.
As I was watching my screen, a courier was on his way to deliver a book (Noel-Todd, J. *The Penguin Book of the Prose Poem: From Baudelaire to Anne Carson*. London: Penguin, 2019).

As an architectural structure, the pier is fundamental in observational astronomy: it can be found in the backyards of amateur observatories, as well as in professional ones. This column is a quintessential part of the physical interventions that are necessary to distinguish noise from valuable data. The pier disjoints the telescope from the observer, from the observatory and from the surroundings. Tremors of passing cars, the astronomer’s footsteps and coughs, the neighbour’s soundsystem: they could result in an agitated telescope. A falling mug would cause the instrument to shift lightyears away from its target.

Notes

- In August 2019, I visited Chris De Pauw, an astrophotographer, at home. He showed me his private observatory. As we were both waiting for clouds to obscure the sun and get softer light for the photograph, he told me about the rolling shed, its advantages and the modifications he was planning on.
  On closing the observatory – by rolling the shed over the instrument – he manoeuvred the instrument into its ‘park’-position: an azimuth of 160 degrees and an elevation of 8 degrees above the horizon. The shed’s doors and hinges barely cleared the telescope.

The road down from the top of Mount Vesuvius, at Atrio Del Cavallo. The sun sets. The last tourist bus has headed down. Then the headlights of the guardian’s car swing their way down. It must be freezing. I am holding an orange-sized piece of petrified lava, probably stemming from the 1872 or 1944 eruption. A kilometer further down the road, the old Observatory is empty. Nowadays, monitoring seismic changes is done in a research centre in the city of Naples. Their seismographic registrations can be followed online, in real time. Two headlights swirling along the slopes, underneath me, are coming upwards.

This is the spread one sees upon opening the bird field guide that once stood, as the stamp indicates, in the library of a psychiatric institution.[1] It shows birds' silhouettes, as they can be seen beside the road.

The drawing has a kind of Hitchcock feel to it.[2] The birds seem to be spying on each other, as they also seem to be spying on the unsuspecting passer-by.

The composition of the scene is marvelous. The electric wires, the tree, the wire fence, the double framed list with the birds' names, handsomely positioned in a birdless patch, at once superimposed on the telephone wires, and pushed to the background by the skylark.

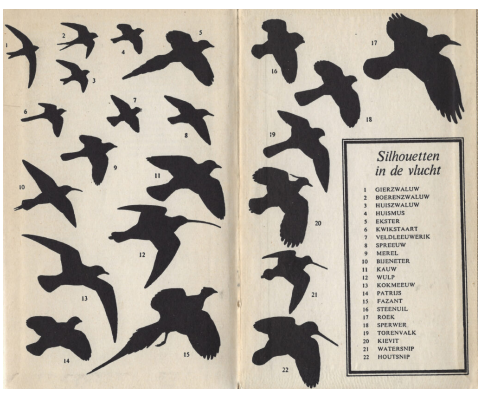

Imagine seeing this scene. What are the odds: to see the silhouettes of Europe's twenty most common species of birds in one glance, from your car's window, as you are driving home at dusk.

Before closing the book, the last spread seems to show the birds fleeing, maybe attacking.[3]

Notes

1 The stamp indicates that, at the psychiatric institution, the book was part of the sublibrary for the Catholic Brothers of Charity. The crossed-out part indicates that there was also a separate physicians' library, to which the book might have originally belonged.

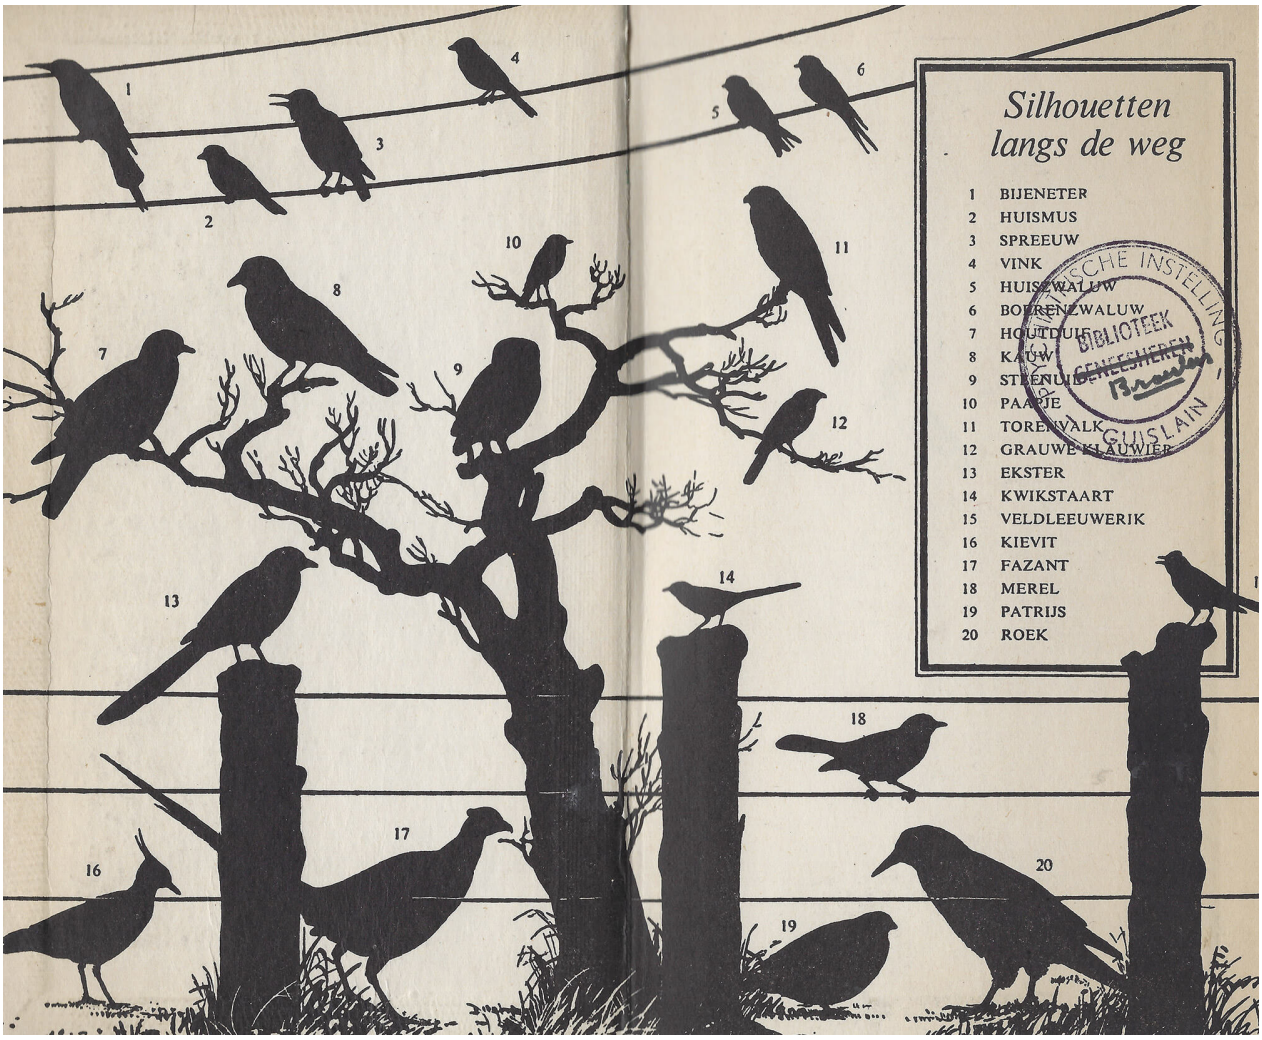

2 On the web, discussions on whether Alfred Hitchcock's *The Birds* (1963) was shot in colour or in black and white, abound.

During the preparation of a seminar, I reread Pierre Bayard's *Qui a tué Roger Ackroyd?* (2008). On the inside of the back cover, there's an inscription: it appears I wrote down a license plate number – something I have the habit of doing when a situation seems suspicious.

In *Qui à tué Roger Ackroyd?*, Bayard analyzes Agatha Christie's famous detective novel *The Murder of Roger Ackroyd* (1926). The literary critic disagrees with detective Hercule Poirot's conclusion: Ackroyd's murderer is not the narrator, James Sheppard, as Poirot would have it. It's a delirious interpretation, 'consistant à rechercher minutieusement des indices, à interpréter des faits et à organiser nos déductions en une construction d'ensemble harmonieuse'.

The car with license plate number XHD 558 is unknown to me. I can't recall what I saw that urged me to write it down, nor the time or location when I saw it.

A white Mercedes van inserts in front of me in a traffic jam near Antwerp. The back of the van has been altered in several ways: a latch was added to the door,[1] a footstep was bolted to the bumper, a couple of tie-wraps are holding up the lights on the left side.[2] Traffic is moving slow. There is no Mercedes logo.[3] Some parts have been retouched with white paint that differs slightly from the rest of the bodywork,[4] not unlike a tipp-ex'ed document.

Notes

1 Maybe the original locking mechanism no longer functions, or, perhaps, the owner wants to add a padlock to the doors at night.

2 Maybe a corroded screw caused the lights to come loose, or a slight collision.

3 Someone might have stolen it. Mercedes stars are often stolen, although mostly from the hood.

4 Maybe to counter corrosion, to conceal a mark someone made on the van or to cover up a fixed dent.

• Legislation concerning the publication of someone else's licence plate on the internet and the demand to blur it, is somewhat ambiguous.
